Description **Studying Societies and Cultures** Lawrence A. Kuznar, Stephen K. Sanderson, 2015-12-03 A thought provoking stimulating volume on the past present and future of cultural materialism that is both laudatory of Harris research strategy and critical of it Paul Shankman University of Colorado One of the most important anthropologists of all time Marvin

Harris was influential worldwide as the founder of cultural materialism This book accessibly analyzes Harris's theories and their important legacies today The chapters explore cultural materialism's epistemology and its relation to rational choice theory Darwinian social science and population pressures The authors assess recent attempts to extend and reformulate cultural materialism and highlight cross cultural archaeological and ethnographic applications of cultural materialism today

The Spiral of Capitalism and Socialism Terry Boswell, Christopher K. Chase-Dunn, 2000 At the core of this book is the argument that though the word socialism is widely held in disdain in the current discourse about the world's past and its future the idea of socialism as collective rationality and popular democracy is far from dead

Revisiting Institutionalism in Sociology Seth Abrutyn, 2013-11-07 There may not be a concept so central to sociology yet so vaguely defined in its contemporary usages than institution In *Revisiting Institutionalism in Sociology* Abrutyn takes an in depth look at what institutions are by returning to some of the insights of classical theorists like Max Weber and Herbert Spencer the functionalisms of Talcott Parsons and S N Eisenstadt and the more recent evolutionary institutionalisms of Gerhard Lenski and Jonathan Turner Returning to the idea that various levels of social reality shape societies Abrutyn argues that institutions are macro level structural and cultural spheres of action exchange and communication They have emergent properties and dynamics that are not reducible to other levels of social reality Rather than fall back on old functionalist solutions Abrutyn offers an original and synthetic theory of institutions like religion or economy the process by which they become autonomous or distinct cultural spaces that shape the color and texture of action exchange and communication embedded within them and how they gain or lose autonomy by theorizing about institutional entrepreneurship Finally Abrutyn lays bare the inner workings of institutions including their ecology the way structure and culture shape lower levels of social reality and how they develop unique patterns of stratification and inequality founded on their ecology structure and culture Ultimately Abrutyn offers a refreshing take on macrosociology that brings functionalist conflict and cultural sociologies together while painting a new picture of how the seemingly invisible macro world influences the choices humans make and the goals we set

Sociology of Law as the Science of Norms Håkan Hydén, 2021-12-28 This book proposes the study of norms as a method of explaining human choice and behaviour by introducing a new scientific perspective The science of norms may here be broadly understood as a social science which includes elements from both the behavioural and legal sciences It is given that a science of norms is not normative in the sense of prescribing what is right or wrong in various situations Compared with legal science sociology of law has an interest in the operational side of legal rules and regulation This book develops a synthesizing social science approach to better understand societal development in the wake of the increasingly significant digital technology The underlying idea is that norms as expectations today are not primarily related to social expectations emanating from human interactions but come from systems that mankind has created for fulfilling its needs Today the economy via the market and technology via digitization generate stronger and more frequent expectations than the social

system By expanding the sociological understanding of norms the book makes comparisons between different parts of society possible and creates a more holistic understanding of contemporary society The book will be of interest to academics and researchers in the areas of sociology of law legal theory philosophy of law sociology and social psychology The Prospect of Global History James Belich, John Darwin, Margret Frenz, Chris Wickham, 2016-02-11 The Prospect of Global History takes a new approach to the study of global history seeking to apply it rather than advocate it The volume seeks perspectives on history from East Asian and Islamic sources as well as European ones and insists on depth in historical analysis The Prospect of Global History will speak to those interested in medieval and ancient history as well as modern history Chapters range from historical sociology to economic history from medieval to modern times from European expansion to constitutional history and from the United States across South Asia to China **Karl Marx** Frank W. Elwell, Brian Andrews, Kenneth S. Hicks, 2020-12-15 Karl Marx A Reference Guide to His Life and Works covers all aspects of his life and works Marx was a philosopher a crusading journalist as well as a political organizer and activist advocating democratic reforms working class political organizations and the establishment of a socialist political order Includes a comprehensive historical timeline of major events involving or related to Marx The A to Z section includes the major events works and concepts related to Marx Bibliography of major works by and about Marx and events surrounding his life and works The index thoroughly cross references the chronological and encyclopedic entries **Religious Evolution and the Axial Age** Stephen K. Sanderson, 2018-01-25 Religious Evolution and the Axial Age describes and explains the evolution of religion over the past ten millennia It shows that an overall evolutionary sequence can be observed running from the spirit and shaman dominated religions of small scale societies to the archaic religions of the ancient civilizations and then to the salvation religions of the Axial Age Stephen K Sanderson draws on ideas from new cognitive and evolutionary psychological theories as well as comparative religion anthropology history and sociology He argues that religion is a biological adaptation that evolved in order to solve a number of human problems especially those concerned with existential anxiety and ontological insecurity Much of the focus of the book is on the Axial Age the period in the second half of the first millennium BCE that marked the greatest religious transformation in world history The book demonstrates that as a result of massive increases in the scale and scope of war and large scale urbanization the problems of existential anxiety and ontological insecurity became particularly acute These changes evoked new religious needs especially for salvation and release from suffering As a result entirely new religions Zoroastrianism Judaism Christianity Hinduism Buddhism Confucianism and Daoism arose to help people cope with the demands of the new historical era **Interaction Ritual Chains** Randall Collins, 2014-05-06 Sex smoking and social stratification are three very different social phenomena And yet argues sociologist Randall Collins they and much else in our social lives are driven by a common force interaction rituals Interaction Ritual Chains is a major work of sociological theory that attempts to develop a radical microsociology It proposes that successful rituals create symbols of

group membership and pump up individuals with emotional energy while failed rituals drain emotional energy Each person flows from situation to situation drawn to those interactions where their cultural capital gives them the best emotional energy payoff Thinking too can be explained by the internalization of conversations within the flow of situations individual selves are thoroughly and continually social constructed from the outside in The first half of *Interaction Ritual Chains* is based on the classic analyses of Durkheim Mead and Goffman and draws on micro sociological research on conversation bodily rhythms emotions and intellectual creativity The second half discusses how such activities as sex smoking and social stratification are shaped by interaction ritual chains For example the book addresses the emotional and symbolic nature of sexual exchanges of all sorts from hand holding to masturbation to sexual relationships with prostitutes while describing the interaction rituals they involve This book will appeal not only to psychologists sociologists and anthropologists but to those in fields as diverse as human sexuality religious studies and literary theory *Andre Gunder Frank and Global Development* Patrick Manning, Barry K. Gills, 2013-07-03 Containing previously unpublished material a review of the legacy and work of Andre Gunder Frank **Late Woodland Societies** Thomas E. Emerson, Dale L. McElrath, Andrew C. Fortier, 2000-01-01 Archaeologists across the Midwest have pooled their data and perspectives to produce this indispensable volume on the Native cultures of the Late Woodland period approximately A D 300 1000 Sandwiched between the well known Hopewellian and Mississippian eras of monumental mound construction the Late Woodland period has received insufficient attention from archaeologists who have frequently characterized it as consisting of relatively drab artifact assemblages The close connections between this period and subsequent Mississippian and Fort Ancient societies however make it especially valuable for cross cultural researchers Understanding the cultural processes at work during the Late Woodland period will yield important clues about the long term forces that stimulate and enhance social inequality *Late Woodland Societies* is notable for its comprehensive geographic coverage exhaustive presentation and discussion of sites artifacts and prehistoric cultural practices and critical summaries of interpretive perspectives and trends in scholarship The vast amount of information and theory brought together examined and synthesized by the contributors produces a detailed coherent and systematic picture of Late Woodland lifestyles across the Midwest The Late Woodland can now be seen as a dynamic time in its own right and instrumental to the emergence of complex late prehistoric cultures across the Midwest and Southeast

Human Nature and the Evolution of Society Stephen K. Sanderson, 2018-05-04 If evolution has changed humans physically has it also affected human behavior Drawing on evolutionary psychology sociobiology and human behavioral ecology *Human Nature and the Evolution of Society* explores the evolutionary dynamics underlying social life In this introduction to human behavior and the organization of social life Stephen K Sanderson discusses traditional subjects like mating behavior kinship parenthood status seeking and violence as well as important topics seldom included in books of this type especially gender economies politics foodways race and ethnicity and the arts Examples and research on a wide range of

human societies both industrial and nonindustrial are integrated throughout With chapter summaries of key points thoughtful discussion questions and important terms defined within the text the result is a broad ranging and comprehensive consideration of human society thoroughly grounded in an evolutionary perspective *Evolutionism and Its Critics* Stephen K. Sanderson,2015-12-03 *Evolutionism and Its Critics* is a critical history of evolutionary theories in the social sciences and a defense of them against their many critics Sanderson deconstructs not only the wide array of social evolutionary theories but the criticisms of the antievolutionists Deconstructing evolutionary theories means laying bare their fundamental epistemological methodological conceptual and theoretical assumptions and principles Deconstructing antievolutionism means showing just where and how the critics have for the most part gone wrong But *Evolutionism and Its Critics* aims to reconstruct as well as deconstruct and does this by building on the shoulders of past giants of evolutionary theorizing a comprehensive evolutionary interpretation of human society based on abundant scientific and historical evidence

Rethinking Sociological Theory Stephen K.
