A HUMAN RELATIONS APPROACH TO MULTICULTURALISM IN K-12 SCHOOLS George Henderson, 2013-06-01 Explicit in this book is the author s belief that it is not enough to say that Americans live in culturally diverse and stratified

communities in which educational opportunities are not distributed fairly nor is it enough to reiterate that most educational opportunities are not based solely on students academic abilities Rather elementary and secondary school personnel must be involved in abating these problems The book is not meant to be read passively by teachers and teacher candidates it is intended to be a dialogue that encourages discussion and when possible action Explicit throughout each chapter is the belief that how teachers teach a course matters as much as what is taught Each chapter is written to achieve four major objectives 1 to discuss key societal factors that positively or negatively affect the quality of instruction students receive in elementary and secondary schools 2 to discuss selected racial and ethnic groups beliefs attitudes and behaviors that characterize teaching personnel students and parents 3 to present seminal research studies and their implications for educating elementary and secondary students and 4 to provide practical suggestions for abating or preventing selected human relation problems in schools Chapters include Challenges for Educators Human Relations in Education Caring About All Students Teachers as Professional Helpers Stress Anxiety and Coping Parents Are People Too and Student Teachers In addition the text seeks to 1 discuss educational reforms that served well in the past but must be altered or abandoned to fit current educational imperatives 2 discuss a wide variety of issues problems and strategies for change that offer readers a balanced view of challenges affecting administrators teachers counselors students and parents 3 employ a scaffolding or spiral approach to topics and 4 offer special attention to the effects of race ethnicity gender sexual orientation nationality and family income on students their parents and teachers Although the book is written primarily for students interested in pursuing careers as elementary or secondary school teachers it should also be of value to experienced teachers as well as school administrators counselors parents and policy makers The text may also complement and supplement other textbooks used in university courses focused on human relations related topics

Proctor,2003-11-26 This book bridges the gap between social work knowledge and empirically based practice Although there is a significant need for the use of empirically tested and verified knowledge in social work practice the empirical basis of support is nearly absent from practitioners considerations as they make clinical decisions in routine practice The authors advocate the development of readily available accessible and professionally sanctioned practice guidelines for use by practitioners a necessity in the age of managed care and demands for greater accountability effectiveness and efficiency in practice This book features a much needed discussion of racial and ethnic differentials in relation to practice guidelines and on the relationship between practice guidelines and different aspects of service delivery **My Mother's Dream** George

Henderson,2024-07-31 From the Preface The primary audience for this book is first generation college students Whether they are in two year or four year colleges I give the readers an example of the power of a parent s dream the positive and negative outcomes of a student s hard work the stuff caring teachers and supportive school administrators are made of and the significance of resilience tenacity and self growth Hopefully my story will give those who read this book a dose of what stick to itiveness means up close and personal My foremost message to first generation and other generation students is to ask for help when you are stumped seize whatever opportunities to help you improve and do your best work Secondly this book is written for teachers school counselors nurses and other personnel who help students during their educational journeys Their assistance can be helpful or hurtful to whatever generation of students they are helping What they do to students and how they do it matters hugely Thirdly this book is written for professional helpers who are not school related but who want to become better helpers in other careers Lastly this book is written for people who are not professional helpers but are curious about the travails and struggles of poverty stricken people like me and my family I have had a long tedious journey from illiteracy to literacy from segregation to desegregation from poverty to affluence and from disliking people who came from cultures different from my own to loving them Nonviolent theories and behavior were like a river flowing through my life slowly during my childhood and adolescence and rapidly after I enrolled in college The Civil Rights Movement is the name of that river It was the foremost foundation upon which I built my philosophy of helping other people

So of course the Reverend Dr Martin Luther King Jr was my hero role model and guide His words and strategies of change are generously sprinkled throughout the later chapters of this book
