Journal of Venereal Disease Information, 1950 *The Second Sickness* Howard Waitzkin, 2000-02-09 Since the appearance of Waitzkin's *The Second Sickness* a landmark book of the 1980s American medicine has been dramatically transformed Waitzkin's earlier edition used qualitative research to take readers inside the black box of medical decisionmaking This new fully updated and expanded edition retains the earlier edition's vivid approach and adds timely analysis of how managed care and other economic and social forces influence medical practice today

Pasteur's Empire Aro Velmet, 2019-12-31 In the 1890s the Pasteur Institute established a network of laboratories that stretched across France's empire from Indochina to West Africa Quickly researchers at these laboratories became central to France's colonial project helping officials monopolize industries develop public health codes establish disease containment measures and arbitrate political conflicts around questions of labor rights public works and free association Pasteur's Empire shows how the scientific prestige of the Pasteur Institute came to depend on its colonial laboratories and how conversely the institutes themselves became central to colonial politics This book argues that decisions as small as the isolation of a particular yeast or the choice of a laboratory animal could have tremendous consequences on the lives of Vietnamese and African subjects who became the consumers of new vaccines or industrially fermented intoxicants Simultaneously global forces such as the rise of international standards and American competitors pushed Pasteurians to their imperial laboratories where they could conduct studies that researchers in France considered too difficult or controversial Chapters follow not just Alexandre Yersin's studies of the plague Charles Nicolle's public health work in Tunisia and Jean Laigret's work on yellow fever in Dakar but also the activities of Vietnamese doctors African students and politicians Syrian traders and Chinese warlords It argues that a specifically Pasteurian understanding of microbiology shaped French colonial politics across the world allowing French officials to promise hygienic modernity while actually committing to little development In bringing together global history imperial history and science and technology studies Pasteur's Empire deftly

integrates micro and macro analyses into one connected narrative that sheds critical light on a key era in the history of medicine

Crystal Heroes , *Twenty-First Century Perspectives on Victorian Literature* Laurence W. Mazzeno, 2014-03-06 Victorian literature s fascination with the past its examination of social injustice and its struggle to deal with the dichotomy between scientific discoveries and religious faith continue to fascinate scholars and contemporary readers During the past hundred years traditional formalist and humanist criticism has been augmented by new critical approaches including feminism and gender studies psychological criticism cultural studies and others In *Twenty First Century Perspectives on Victorian Literature* twelve scholars offer new assessments of Victorian poetry novels and nonfiction Their essays examine several major authors and works and introduce discussions of many others that have received less scholarly attention in the past General reviews of the current status of Victorian literature in the academic world are followed by essays on such writers as Charles Dickens Alfred Tennyson Thomas Hardy and the Bront sisters These are balanced by essays that focus on writing by women the development of the social problem novel and the continuity of Victorian writers with their Romantic forebears Most importantly the contributors to this volume approach Victorian literature from a decidedly contemporary scholarly angle and write for a wide audience of specialists and non specialists

alike Their essays offer readers an idea of how critical commentary in recent years has influenced and in some cases changed radically our understanding of and approach to literary study in general and the Victorian period in particular Hence scholars teachers and students will find the volume a useful survey of contemporary commentary not just on Victorian literature but also on the period as a whole **From What We Should Do to Who We Should Be** Benedict Chidi
