in Society Jacques Berleur, Chrisanthi Avgerou, 2006-01-20 Governments the media the information technology industry and scientists publicly argue that information and communication technologies ICT will bring about an inevitable transition from industrial to information or knowledge based economies and societies It is assumed that all aspects of our economic and social lives in both the public and private spheres will be radically different from what they are today The World Summit on the Information Society Geneva 2003 Tunis 2005 shows the importance of a worldwide reflection on those topics Perspectives and Policies on ICT in Society explores the ICT policies of different nations and regions such as Africa China Europe and India The authors assess the arguments surrounding the impending new age as well as some of the more sensitive issues of its developments This progress will signal an expansion of ICT in many domains the so called ubiquity such as in the workplace the home government and education and it will affect privacy and professional ethics The expansion will also encompass all parts of the earth particularly developing countries Such growth must take place in the context of historical dimensions and should underscore the accountability of professionals in the field The intent of this book is to address these issues and to serve as a handbook of IFIP s TC9 Computers and Society committee Thirty authors from twelve countries consider the ICT policies with their associated perspectives and they explore what may be the information age and the digital society of tomorrow The book provides reflection on today s complex society and addresses the uncertain developments rising from an increasingly global and technologically connected world Jacques Berleur is at the University of Namur Belgium and Chrisanthi Avgerou at the London School of Economics United Kingdom *Human Values and the Design of Computer Technology* Batya Friedman, 1997-12-13 Human values including accountability privacy autonomy and respect for person emerge from the computer systems that we build and how we choose to use them Yet important questions on human values and system design have remained largely unexplored If human values are controversial then on what basis do some values override others in the design of for example hardware algorithms and databases Do users interact with computer systems as social actors If so should designers of computer persona and agents seek to build on such human tendencies or check them How have design decisions in hospitals research labs and computer corporations protected or degraded such values This volume brings together leading researchers and system designers who take up these questions and more *InfoWorld* , 1983-08-22 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *The Social Impact of Computers* David Sarnoff, American Bankers Association, National Council of the Churches of Christ in the United States of America.
