Watson,Andrew Parker,2016-04-14 This ground breaking book provides a fascinating insight into the relationship between sports and leisure religion and disability In the shadow of the London 2012 Olympic and Paralympic Games at which athletes that were both able bodied and disabled provided an extravaganza of sporting excellence and drama this text is a timely and important synthesis of ideas that have emerged in two previously distinct areas of research i disability sport and ii the theology of

disability Many of the elite athletes at this global sporting mega event often explicitly displayed their religious beliefs and in turn their importance in the context of sport by observing different religious rituals and or utilising the multi faith sports chaplaincy service This raises a whole range of unanswered questions with regard to the intersections between sports religion and disability which to date has been under researched Examples of subjects addressed in this text include elite physical disability sport Paralympics intellectual disability sport Special Olympics reflections on the illness narrative of the cyclist Lance Armstrong through the lens of the theology of radical orthodoxy the application of biblical athletic metaphors in understanding modern conceptions of disability sport the role of sport and spirituality in the rehabilitation of injured British Military personnel and the importance of sports and leisure in L Arche communities This book begins a critical conversation on these topics and many others for both researchers and practitioners This book was based on two special issues of the Journal of Religion Disability and Health

Haegele, 2024-11-28 This book presents research on disabled children and young people in sport physical activity and physical education settings using empirical data gathered either with or from disabled children and young people centring their experiences and amplifying their voices while decentralising non disabled voices in research about them Much of the albeit limited research relating to disabled children and young people in sport physical activity and physical education settings is from the perspective of teachers school leaders coaches support assistants and special educational needs coordinators While this research has undoubtedly contributed to developing a rich tapestry of knowledge about disability and sport physical activity and physical education the views and experiences of disabled children and young people are conspicuous by their absence Thus in this book contributors showcase research that centres on the experiences and amplifies the voices of disabled children and young people When reading these articles readers are encouraged to reflexively consider the ways and extent to which their own research and practice endeavours to include empower and emancipate disabled children and young people Contributors hope that this book will encourage sport physical activity and physical education scholars especially those who do not research disability to consider the significance of including disabled people as active participants in more general research studies This book will be an essential reading for those who want to learn more about involving disabled children and young people in research centring their experiences and amplifying their voices in sport physical activity and physical education as part of the multi stakeholder approach advocated by Vickerman and Maher 2018 It was originally published as a special issue of Sport Education and Society

Equity and Difference in Physical Education, Youth Sport and Health Fiona Dowling, Hayley Fitzgerald, Anne Flintoff, 2012. Issues of equity remain an essential theme throughout the study and practice of physical education. PE youth sport and health. This important new book confronts and illuminates issues of equity and difference through the innovative use of narrative method, telling stories of difference that enable students, academics and professionals alike to engage both emotionally and cognitively with the subject. The book is arranged into three sections. The first provides an overview of current theory and research on difference and inequality in PE youth sport and health together with an introduction to narrative forms of knowing. The second section includes short narratives about difference that bring to life the key themes and issues in a range of physical activity contexts. The third section draws upon a selection of narratives to offer detailed practical suggestions for how they might be used in or inform teaching sessions. This is the first book to explore issues of equity through narrative and the first to examine the pedagogical value of a narrative approach within PE youth sport and health. With contributions from many of the world's leading equity specialists, it will be invaluable reading for all students, scholars and professionals working in PE youth sport, health, sports development, gender studies and mainstream education programmes.

A Critical History of Health, Sport, and Physical Education Michelle Gorzanelli, Jorge Knijnik, 2025-07-01. This book fills a gap in literature by generating a combined history of Physical Education, PE, School Sport, SS and Health Education, HE in New South Wales (NSW) public schools from 1880 to 2024. It includes broad discussions on how political issues such as the World Wars influenced i) the PE curriculum which was used as a medium to prepare a fit army; ii) the school sport system which acted as an expression of national strength via showcasing sporting prowess on the international stages of the Olympic Games; and iii) the health education curriculum which addressed infectious diseases resulting from poor hygiene associated with poverty. The book also adopts a socio-cultural perspective to the constructs of PE, SS and HE curricula and highlights significant local, national and international historical events and issues as factors driving curriculum developments and paradigm shifts in these subjects in the NSW public education and beyond. It brings new and engendering socio-historical findings to the discipline fields of PE, SS and HE combined with an innovative methodology in critical historiographical studies.

Touch in Sports Coaching and Physical Education Heather

Piper,2014-08-07 In our increasingly risk averse society touch and touching behaviours between professionals and children have become a fraught issue In sports coaching and physical education touching young sports performers and participants has in some contexts come to be redefined as dubious and dangerous Coaches find themselves operating in a framework of regulations and guidelines that create anxiety for them and others and for many volunteer and sometimes professional coaches this fearful context has led them to question the risks and benefits of their continuing involvement in sport Touch in Sports Coaching and Physical Education is the first book to explore this difficult topic in detail Drawing on a series of international studies from the US UK Australia Canada Sweden and elsewhere it presents important new research evidence and examines theories of risk and moral panic that frame the discussion By challenging prevailing orthodoxies the book makes a significant contribution to critical discussion around practice pedagogy politics and policy in sport and physical education and also informs current debates around the nature and quality of all in loco parentis relationships
