Agriculture, Autonomous Development, and Prospects for Industrialization in Africa Emmanuel Ndhlovu, 2025-03-06 The book investigates the intersection of agriculture and development in Africa and how it impacts rural industrialisation prospects It provides a comprehensive view of the position of agriculture in African socio economic activities and the agricultural sector's potential as the source for continental development and industrialisation prospects Significant research has been done on African development with a focus placed on the problematic role played by slavery colonialism and later by incompetent African leaders who failed to steer development of the type that delivers a progressive sustained and sustainable transformation of lives and societies There is limited focus on the possibility of agriculture being the potential basis of African development and the chance for industrialisation This is a matter of concern considering the dominance of agriculture as a livelihood and income source for many people on the continent In contributing to the debate on development in Africa this book aims to show how agriculture can serve as the basis for African development and industrialisation This will be achieved by i providing a detailed historical description of the position of agriculture in African socio economic activities ii outlining the trajectory of African development with a focus on agriculture innovation and mechanisation iii identifying challenges to the development of African agriculture iv exploring the opportunities for agricultural development in Africa and v providing practical and policy recommendations to improve African agriculture and make it the engine for development and industrialisation Utilising a multidisciplinary approach which combines political economy social policy financial inclusion and empowerment approaches the book also shows how engagement of youth and women digitalisation and the provision of support by public and private actors can jump start agriculture as the engine of African development and industrialisation Taken together with this conscious effort to promote a multi disciplinary discussion the book is valuable reading for students policymakers and activists interested in emerging new directions in African development thinking and research *Law and Social Policy in the Global South* Ulrike Davy, Albert H.Y. Chen, 2022-12-13 The book is an in depth study of the origins and the trajectories of the law governing social policies in Brazil China India and South Africa four middle income countries in the global South with a history in social policy making that starts in the 1920s The policies of these countries affect almost half of the world's population The book takes the legal

framework of the policies as a starting point but the main interest lies behind the letter of the law What were the objectives and goals of social policy over the course of the last 100 years What were the ideas ideologies and values pursued by relevant actors The book comprises four country studies and a comparative study The country studies concentrate on the political and social context of social policy making in Brazil China India and South Africa as well as on the ideas ideologies and values underpinning the constitution statutory laws and case law that frame and shape social policy at the national level The country studies are complemented by a comparative study exploring and describing the commonalities and differences in the ideational approaches to social policies across the four countries nationally and in the formative decades internationally The comparative study also identifies the characteristics that make Brazilian Chinese Indian and South African social policies distinct from European social policies With its emphasis on law and drawing on legal scholarship the book adds a new dimension to the existing accounts on welfare state building which so far are dominated by European narratives and by scholars with a background in sociology political science and development studies This book is relevant to specialists and peers and will be invaluable to those individuals interested in the fields of comparative and international social security law human rights law comparative constitutional law constitutional history law and development studies comparative social policies global social policies social work and welfare state theory The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
