SOCIOLOGY OF CHANGE AND DEVELOPMENT Dr. Henna Tabassum, 2022-01-16 Evolutionary theories are based on the assumption that societies gradually change from simple beginnings into even more complex forms Early sociologists beginning with Auguste Comte believed that human societies evolve in a unilinear way that is in one line of development According to them social change meant progress toward something better They saw change as positive and beneficial To them the evolutionary process implied that societies would necessarily reach new and higher levels of civilization L H Morgan believed that there were three basic stages in the process savagery barbarism and civilization Auguste Comte's ideas relating to the three stages in the development of human thought and also of society namely the theological the metaphysical and the positive in a way represent the three basic stages of social change This evolutionary view of social change was highly influenced by Charles Darwin's theory of Organic Evolution Those who were fascinated by this theory applied it to human society and argued that societies must have evolved from the simple and primitive to that of too complex and advanced such as the western society Herbert Spencer a British sociologist carried this analogy to its extremity The present publication introduces the students of sociology to main concepts and theories in a lucid and interesting style The textbook will enable the student to understand the process of social change and the way it affects development and progress Contents Culture and Society Groups and Organizations Population Urbanization and Social Movements The Rationalization of Society Comprehensive Theory of Social Development Social Inequality and Exclusion Programmes Schemes for Women's Development Social Aspects of Television Intra and Inter Cultural Diversities in the Era of Globalization New Media as a Tool for Social Change Television and Audience Cultural Proximity

Integral Research and Innovation Ronnie Lessem, Alexander Schieffer, 2016-05-23 The core question underlying Integral Research and Innovation is How can social research be turned into social or indeed integral innovation Complementing their acclaimed Transformation Management this second book in the Transformation and Innovation Series explains how the knowledge creation that underpins transformative processes occurs The authors show how research has to be transformative rather than just informative if it is to contribute usefully to building integrated and sustainable enterprises At a time when business practitioners and others responsible for organizational development are desperate for usable knowledge the authors contend that social science research is failing to support business and management generally Instead academic researchers engage in esoteric arguments about research methodology which do not contribute usefully to the resolution of real world problems Drawing on their experience of environments where researchers and practitioners do engage constructively resulting in research that is active participative and genuinely innovative Professor Lessem and Dr Schieffer are in territory that is far beyond that covered by standard works on research methodology This is a book not just for academics and researchers wanting to make a meaningful contribution but also for reflective practitioners from the corporate organizational and consultancy based worlds who operate in the area of interface between business and management education learning and society and who need to know how research can be used to make a real difference

Hunter-Gatherers Robert L. Bettinger, Raven Garvey, Shannon Tushingham, 2015-06-30 Hunter gatherer research has played a historically central role in the development of anthropological and evolutionary theory Today research in this traditional and enduringly vital field blurs lines of distinction between archaeology and ethnology and seeks instead to develop perspectives and theories broadly applicable to anthropology and its many sub disciplines In the groundbreaking first edition of Hunter Gatherers Archaeological and Evolutionary Theory 1991 Robert Bettinger presented an integrative perspective on hunter gatherer research and advanced a theoretical approach compatible with both traditional anthropological and contemporary

evolutionary theories Hunter Gatherers remains a well respected and much cited text now over 20 years since initial publication Yet as in other vibrant fields of study the last two decades have seen important empirical and theoretical advances In this second edition of Hunter Gatherers co authors Robert Bettinger Raven Garvey and Shannon Tushingham offer a revised and expanded version of the classic text which includes a succinct and provocative critical synthesis of hunter gatherer and evolutionary theory from the Enlightenment to the present New and expanded sections relate and react to recent developments some of them the authors own particularly in the realms of optimal foraging and cultural transmission theories An exceptionally informative and ambitious volume on cultural evolutionary theory Hunter Gatherers second edition is an essential addition to the libraries of anthropologists archaeologists and human ecologists alike **The Radical**
