**Interpreting Justice in a Postmonolingual Age** Esther Monzó-Nebot, Juan Jiménez-Salcedo, 2019-01-15

Postmonolingualism as formulated by Yildiz can be understood to be a resistance to the demands of institutions that seek to enforce a monolingual standard. Complex identities, social practices and cultural products are increasingly required to conform to the expectancies of a norm that for many is no longer considered reasonable. Thus in this postmonolingual age it is essential that the approaches and initiatives used to counter these demands aim not only to understand these hyper-diverse societies but also to deminoritize underprivileged communities. Translating and Interpreting Justice in a Postmonolingual Age is an attempt to expand the limits of postmonolingualism as a framework for exploring the possibilities of translation and interpreting in mediating between the myriad of sociocultural communities that coexist today. Challenging assumptions about the role of translation and interpreting, the contributions gathered in this volume focus on intercultural and intergroup understanding as a process and as a requisite for social justice and ethical progress. From different but complementary approaches, practical experiences and existing legal and policy frameworks are scrutinized to highlight the need for translation and interpreting policies in legal and institutional contexts in multicultural societies. Researchers and policymakers in the fields of translation and interpreting studies, multiculturalism and education and language and diversity policies will find inspiring perspectives on how legal and institutional translation and interpreting can help pursue the goals of democratic societies.

This volume will have wide appeal to several academic audiences within the humanities both in Finland and abroad and will especially be of interest to scholars of folklore, language and cultural expression.

*Revolution, a Sociological Interpretation* Michael S. Kimmel, 1990 Examines why the study of revolution has attained such importance and provides a systematic historical analysis of key ideas and theories. The book surveys the classical perspectives on revolution offered by nineteenth century and early twentieth century theorists such as Marx, Weber, Durkheim, Tocqueville and Freud. Kimmel argues that their perspectives on revolution were affected by the reality of living through the revolutions of 1848, 1917, a reality that raised crucial issues of class, state, bureaucracy and motivation. back cover
