**Social Science in Government** Richard P. Nathan, 2014-07-01 A new substantially updated and expanded version of a classic work on how to evaluate public policy published over a decade ago     Social Science Research and Government

Martin Bulmer, 1987-02-26 This collection of twenty original essays considers the relationship between social science research and government during the last 30 years in Britain and the United States especially the economic and social policies of Reagan and Thatcher governments These essays will be useful to social science staff graduate students and to policy makers working inside government     *Social Science and Government* A. B. Cherns, W. I. Jenkins, R. Sinclair, 2013-10-11

Tavistock Press was established as a co operative venture between the Tavistock Institute and Routledge Kegan Paul RKP in the 1950s to produce a series of major contributions across the social sciences This volume is part of a 2001 reissue of a selection of those important works which have since gone out of print or are difficult to locate Published by Routledge 112 volumes in total are being brought together under the name The International Behavioural and Social Sciences Library Classics from the Tavistock Press Reproduced here in facsimile this volume was originally published in 1972 and is available individually The collection is also available in a number of themed mini sets of between 5 and 13 volumes or as a complete collection     The Public Value of the Social Sciences John D. Brewer, 2013-05-23 John Brewer explores the essential nature of the social sciences and the ways in which notions of impact and value could be reframed to generate a more productive debate around their contribution to the good of society     **The Social Sciences in Canada** Donald Fisher, 2006-01-01 The Social Sciences in Canada is about the background and history of the Social Science Federation of Canada in honour of its fifty years of national activity There can be little doubt that during the last fifty years the federation and its predecessors have had a substantial impact on the development of the social sciences in Canada The history of this organization is probably the best barometer that we have for recording the changes that have occurred in the relation between social scientists and Canadian society     Principles of Research Design in the Social Sciences Frank Bechhofer, Lindsay Paterson, 2012-12-06 This practical introduction for first time researchers provides a bridge between how to conduct research and the philosophy of social science allowing students to relate what they are doing to why It does not provide a set of rigid recipes for social scientists as many methodology books do rather it stimulates students to think about the issues involved when deciding upon their research design By discussing standard approaches to research design and method in various social science disciplines the authors illustrate why particular designs have traditionally predominated in certain areas of study But whilst they acknowledge the strengths of these standard approaches their emphasis is on helping researchers find the most effective solution to their problem by encouraging them through this familiarity with the principles of various approaches to innovate where appropriate This text will prove indispensable for social science students of all levels embarking upon a research project and for experienced researchers looking for a fresh perspective on their object of study

**Resources in Education** ,2001      *The Politics of Social Science Research* P. Ratcliffe,2001-06-18 This book addresses some of the key questions facing contemporary social scientists What is the point of our research Who undertakes it Does it have any impact on the social world it attempts to characterize if so what It does so by focusing on international research on identity and inequality grounded in race and ethnic difference The contributors to the volume ask searching questions about the politics of research funding the empowerment of minorities and the prospects for meaningful change      **Hearings, Reports and Prints of the House Committee on Science and Astronautics** United States. Congress. House. Committee on Science and Astronautics,1974      *Research Methods in the Social Sciences* Bridget Somekh,Cathy Lewin,2005 In this book the contributors introduce all the key qualitative and quantitative research methodologies and methods and draw readers into a community of researchers engaged in reflection on the research process      *Research Methodology in Social Science* Arvind Kumar,2002 Yet Research May Be Regarded As A Useful Form Of Activity Research In The Sense Of Development Elaboration And Refinement Of Principles Together With The Collection And Use Of Empirical Materials To Help In These Processes Is One Of Die Highest Activities Of A University And One In Which All Its Professors Should Be Engaged Research Need Not Be Thought Of As A Special Prerogative Of Young Men And Women Preparing Themselves For A Higher Degree Nobody Needs The Permission Of A University To Do Research And Many Of The Great Scholars Did Not Any Research In The Ordinary Sense Of The Term Yet They Succeeded In Contributing Significantly To The Existing Realms Of Knowledge Research Is A Matter Of Realising A Question And Then Trying To Find An Answer In Other Words Research Means A Sort Of Investigation Describing The Fact That Some Problem Is Being Investigated To Shed For Generalization Therefore Research Is The Activity Of Solving Problem Which Adds New Knowledge And Developing Of Theory As Well As Gathering Of Evidence To Test Generalization In View Of This The Present Attempt Is Made To Describe The Different Aspects Of Research Generally Being Conducted By The Social Scientists And It Is Hoped That It Will Be Of Great Use For All Those Concerned With Social Research      Research in Education ,1974      *Knowledge Mobilisation and Social Sciences* Jon Bannister,Irene Hardill,2016-03-17 The essays presented in this volume examine knowledge mobilisation and its relation to research impact and engagement The social sciences matter because they can help us to understand and address the complex challenges confronting society This is particularly true in an era of significant downward pressure on public expenditure a consequence of the global fiscal crisis when there is a striking need to ensure that policies are demonstrably effective and efficient The impact agenda in the UK reflected in parallel global debates actively encourages the social sciences to make and demonstrate a difference to justify and protect social science funding This volume shows how knowledge mobilisation can be thought of systematically as a process encompassing engagement leading to the co production and channelling of knowledge to make a difference in the economy and society This book was originally published as a special issue of Contemporary Social Science      **Social Sciences and National Development** Shou-sheng

Hsueh,1977      *Sociology and Social Research (RLE Social Theory)* Geoff Payne,Robert Dingwall,Judy Payne,Mick Carter,2014-08-21 A social science which has become so remote from the society which pays for its upkeep is ultimately doomed threatened less by repression than by intellectual contempt and financial neglect This is the message of the authors of this book in this reassessment of the evolution and present state of British sociology Their investigation analyses the discipline as a social institution whose product is inexorably shaped by the everyday circumstances of its producers it is the concrete outcome of people s work rather than a body of abstract ideas Drawing upon their varied experience as teachers and researchers they identify three major trends in contemporary sociology First that the discipline s rapid expansion has led to a retreat from rigorous research into Utopian and introspective theorising Second that the concept of sociological research is being taught in a totally false way because of this and encourages research within a wholly academic environment Third that the current unpopularity of sociology with academics prospective students and politicians is no coincidence but a reflection of the conditions under which sociology is now produced and practised In *Sociology and Social Research* the authors suggest substantial changes in sociological research the way in which it is carried out and the conditions under which it is undertaken Their book is a timely warning to fellow sociologists when the profession is under attack as a result of public expenditure cuts      *Greening Society* P.J. Driessen,P. Glasbergen,2013-04-17 This book can be regarded as a monograph on the debates and developments in Dutch environmental policy It has been written with a specific perspective in mind First and foremost the line of approach we have taken was from a multidisciplinary social science point of view The trend in environmental policy is looked at from the angle of sociology policy studies and political science Secondly all analyses depart from the paradigm shift concept This particular paradigm shift is based on the fact that a radical change has taken shape over the years in the way environmental issues are handled Previously environmental policy had always been characterised by is top down approach in which government determined the actual objectives of policy and assumed that it could win over business non governmental organisations and citizens to act in line with those objectives There was also a great deal of faith in the technical solutions to environmental issues Today s environmental policy is based on a totally different philosophy Environmental objectives are now reached in association with business non governmental organisations and citizens These actors are also involved in bringing environmental policy into practice In other words the implementation of policy has a more interactive nature New relationships emerge between government the market and civil society and policy discourses also become integrated The environmental interest is more often weighed against the economic interests the spatial development and against social justice      **Full Opportunity Act** United States.
