Social and Behavioural Macroeconomics Christopher Tsoukis, Frédéric Tournemaine, Edward John Driffill, 2025-03-28

Despite significant theoretical advances in social and behavioural macroeconomics little has been done to synthesise the disparate developments in these fields and point the way forward to future research directions and policy implications This book reviews unifies and extends diverse strands of thinking and shows how these theories can be used to improve macroeconomic modelling for policy development in a range of spheres The book explores how the most empirically relevant socio behavioural traits can widen the scope of macroeconomics to fruitfully address new issues and challenges such as rising inequality the change in the functional distribution of income labour and capital shares and a further understanding of the government spending multiplier Chapters also address more traditional topics such as macroeconomic policy effectiveness growth saving and labour supply Other more open ended themes of the book include whether the concept of individual rationality should be complemented by collective rationality whether socio behavioural traits underlie socially inefficient outcomes such as tragedies of the commons rat races financial crises and global warming and whether such traits can provide new foundations for New Keynesian macroeconomics This book will be essential reading for advanced researchers and students working in macroeconomics and other social sciences including psychology and politics as well as those working on the theoretical end of public policy

Political Economy In Macro Economics Allan Drazen, 2004

Political Economy in Macroeconomics is the first full length work on the issues of new political economy This is a multi disciplinary subject to which increasing numbers of economists are dedicating their time It analyses the influence of political forces on economic policy by using the analytical tools of economics However while emphasising the use of economic models Drazen has also included related issues such as politics and political philosophy in this volume and therefore the book contains much conceptual discussion as well as empirical data At the moment there is no text that covers political economy in macroeconomics at the postgraduate and advanced undergraduate level This book will fill that gap It is a survey textbook and critique all in one Dani Rodrik Harvard University and has established the benchmark for years to come in terms of coverage and depth of critical assessment Leonardo Bartolini *Journal of International Economics*
