The Theory of Communicative Action Jürgen Habermas, 2015-10-07 Here for the first time in English is volume one of Jürgen Habermas's long awaited magnum opus *The Theory of Communicative Action*. This pathbreaking work is guided by three interrelated concerns: 1 to develop a concept of communicative rationality that is no longer tied to the subjective and individualistic premises of modern social and political theory; 2 to construct a two level concept of society that integrates the lifeworld and system paradigms; and 3 to sketch out a critical theory of modernity that explains its sociopathologies in a new way. Habermas approaches these tasks through a combination of conceptual analyses, systematic reflections, and critical reconstructions of such predecessors as Marx and Weber, Durkheim and Mead, Horkheimer and Adorno, Schutz and Parsons. *Reason and the Rationalization of Society* develops a sociological theory of action that stresses not its means/ends or teleological aspect but the need to coordinate action socially via communication. In the introductory chapter Habermas sets out a powerful series of arguments on such foundational issues as cultural and historical relativism, the methodology of *Verstehen*, the inseparability of interpretation from critique. In addition to clarifying the normative foundations of critical social inquiry, this sets the stage for a systematic appropriation of Weber's theory of rationalization and its Marxist reception by Lukács, Horkheimer and Adorno. This is an important book for degree students of philosophy, sociology and related subjects.

Economics as a Social Science Raimund Dietz,2024-09-30 This book explores the separation of economics from the social sciences Raimund Dietz attributes this development to the adoption of a too narrow instrumentalist perspective and demonstrates how close the mainstream is to the idea of a socialist planned economy despite all its liberal phraseology The book attempts to comprehensively reconstruct economics as catallactics explicitly including and assigning a central role to liberal forms of socialization such as exchange and money an approach that it argues is the only way to overcome the methodological deficits of the mainstream It allows monetary theory to be integrated into economic theory Further the book shows that modern societies have no choice but to organize themselves as capitalist market economies For good economic reasons money has lost its physical value over the course of time and is now merely symbolic As a result the importance of the state has also grown The author proposes that the power to create money should be consistently placed in the hands of the central bank The book offers a transformative perspective that addresses the urgent need for sustainable resource management worldwide It invites social scientists policymakers and especially economists to rethink economics and pursue a holistic approach to a more sustainable future *Challenging Conventions* Christiane Czygan,Hatice Aynur,2025-06-30 As the core theme of Early Modern Ottoman poetry love inspired a plethora of Turkish research the most enlightening of which explored questions of terminology semantics and mystic dimensions Internationally however there have been few publications on this subject This book closes this gap by investigating in different genres and contexts Whereas the terms *ubb* and *ma abbet* point to comfort and care the term denotes passionate love often laced with mystical connotations Through this lens we show that Ottoman lyrical realities transgressed the rules burgeoning beyond conventional settings and giving voice to vivid creativity Large parts of urban society indulged in poetry and thereby challenged certain norms Methods of Critical Discourse Analysis Ruth Wodak,Michael Meyer,2001 This book is designed as an introduction to Critical Discourse Analysis CDA and gives an overview of the various theories and methods associated with this sociolinguistic approach It also introduces the reader to the leading figures in CDA and the methods to which they are most closely related The text aims to provide a comprehensive description of the individual methods an understanding of the theories to which methods refer and a comparative treatment of each of these methods so that students may be able to determine which is the most appropriate to select for their particular research question Given the balance between theory and application plus the intended audience no previous knowledge of CDA is assumed *Methods of Critical Discourse Analysis* should be useful reading for both students and researchers in the fields of linguistics sociology social psychology and the social sciences in general **The Perils of the One** Stathis Gourgouris,2019-07-30 From the earliest times societies have been seduced by the temptation of unitary

thinking Recognizing the vulnerability of existence people and cultures privilege regimes that confer authority on a single entity a sovereign ruler a transcendental deity or an Event which they embrace with unquestioned devotion Such obsessions precipitate contempt for the worldliness of real bodies in real time and refusal of responsibility and agency In *The Perils of the One* Stathis Gourgouris offers a philosophical anthropology that confronts the legacy of monarchical thinking the desire to subjugate oneself to unitary principles and structures whether political moral theological or secular In wide ranging essays that are at once poetic and polemical intellectual and passionate Gourgouris reads across politics and theology literary and art criticism psychoanalysis and feminism in a critique of both political theology and the metaphysics of secularism He engages with a range of figures from the Apostle Paul and Trinitarian theologians to La Bo tie Schmitt and Freud to contemporary thinkers such as Clastres Said Castoriadis i ek Butler and Irigaray At once a broad perspective on human history and a detailed examination of our present moment *The Perils of the One* offers glimpses of what a counterpolitics of autonomy would look like from anarchic subjectivities that refuse external ideals resist the allure of command and obedience and embrace otherness
