A Muslim Conspiracy in British India? Chandra Mallampalli,2017-06-29 As the British prepared for war in Afghanistan in 1839 rumors spread of a Muslim conspiracy based in India s Deccan region Colonial officials were convinced that itinerant preachers of jihad whom they labelled Wahhabis were collaborating with Russian and Persian armies and inspiring Muslim princes to revolt Officials detained and interrogated Muslim travelers conducted weapons inspections at princely forts surveyed mosques and ultimately annexed territories of the accused Using untapped archival materials Chandra Mallampalli describes how local intrigues often having little to do with religion manufactured belief in a global conspiracy against British rule By skillfully narrating stories of the alleged conspirators he shows how fears of the dreaded Wahhabi sometimes prompted colonial authorities to act upon thin evidence while also inspiring Muslim plots against princes not of their liking At stake were not only questions about Muslim loyalty but also the very ideals of a liberal empire

Indian Secularism Shabnum Tejani,2021-01-05 Many of the central issues in modern Indian politics have long been understood in terms of an opposition between ideologies of secularism and communalism Observers have argued that recent Hindu nationalism is the symptom of a crisis of Indian secularism and have blamed this on a resurgence of religion or communalism Shabnum Tejani unpacks prevailing assumptions about the meaning of secularism in contemporary politics focusing on India but with many points of comparison elsewhere in the world She questions the simple dichotomy between

secularism and communalism that has been used in scholarly study and political discourse Tracing the social political and intellectual genealogies of the concepts of secularism and communalism from the late nineteenth century until the ratification of the Indian constitution in 1950 she shows how secularism came to be bound up with ideas about nationalism and national identity **Medieval Indian Mindscapes** Eugenia Vanina,2012 Medieval Indian Mindscapes Space Time Society Man centres on how Indians in pre colonial times perceived their world It compares the specific features of their mental programmes with that of their counterparts in other pre modern societies While analysing the importance of space in the medieval world view the book discusses how medieval Indians comprehended their territories and the landscape as their own vis a vis the alien space the development of territorial cultural and territorial political identities and knowledge about other lands and peoples In a discussion of medieval temporality the book also studies the ways of perceiving and reckoning time attitudes to the historical past and the manifold ways of recording it A special chapter on Society deals with socio ethical values and behavioural stereotypes of major estate and caste groups like the feudal landlords priests and officials merchants and craftsmen peasants and the lower castes in villages The book also has a chapter on the medieval Indian perception of Man his appearance and peculiarities as they pertained to the a behaviour social status and the steady development of individuality Medieval Indian Mindscapes will be of interest to medievalists as well as general readers keen to know more about the dynamics of pre modern history and culture **Agrarian Development in Colonial India** Peter

Plague Image and Imagination from Medieval to Modern Times

Christos Lynteris, 2021-07-29 This edited collection brings together new research by world leading historians and anthropologists to examine the interaction between images of plague in different temporal and spatial contexts and the imagination of the disease from the Middle Ages to today The chapters in this book illuminate to what extent the image of plague has not simply reflected but also impacted the way in which the disease is experienced in different historical periods The book asks what is the contribution of the entanglement between epidemic image and imagination to the persistence of plague as a category of human suffering across so many centuries in spite of profound shifts in our medical understanding of the disease What is it that makes plague such a visually charismatic subject And why is the medical religious and lay imagination of plague so consistently determined by the visual register In answering these questions this volume takes the study of plague images beyond its usual art historical framework so as to examine them and their relation to the imagination of plague from medical historical visual anthropological and postcolonial perspectives
