**Society Pays the High Costs of Minimal Brain Damage in America** Camilla May Anderson,1972-01-01 *An Alternative History of Hyperactivity* Matthew Smith,2011-07-01 In 1973 San Francisco allergist Ben Feingold created an uproar by claiming that synthetic food additives triggered hyperactivity then the most commonly diagnosed childhood disorder in the United States He contended that the epidemic should not be treated with drugs such as Ritalin but instead with a food additive free diet Parents and the media considered his treatment the Feingold diet a compelling alternative Physicians however were skeptical and designed dozens of trials to challenge the idea The resulting medical opinion was that the diet did not work and it was rejected Matthew Smith asserts that those scientific conclusions were in fact flawed *An Alternative History of Hyperactivity* explores the origins of the Feingold diet revealing why it became so popular and the ways in which physicians parents and the public made decisions about whether it was a valid treatment for hyperactivity Arguing that the fate of Feingold s therapy depended more on cultural economic and political factors than on the scientific protocols designed to test it Smith suggests the lessons learned can help resolve medical controversies more effectively

**A Reader's Guide for Parents of Children with Mental, Physical, Or Emotional Disabilities** Cory Moore,Kathryn Gorham Morton,Joni B. Mills,1977 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1971 **Handbook of Family Violence** Alan S. Bellack,Michel Hersen,R.L. Morrison,Vincent B. Van Hasselt,2013-06-29 In the last decade there has been heightened clinical and investigative activity in the area of family violence This of course is partly attributable to recent surveys showing a high incidence of family violence in the United States For example there are indications that nearly 30% of married women in this country are victims of physical abuse by spouses at some point in their marriage Further FBI statistics show that approximately 13% of all homicides are husband wife killings Moreover it has been projected that such figures are likely to increase over the next several years Consistent with these trends funding of family violence research by both federal and private agencies has increased Indeed federal agencies such as the National Institute of Mental Health and the National Institute of Law Enforcement and Criminal Justice

have provided considerable support for work in this area. In addition, family violence, particularly wife-battering, child abuse, and sexual abuse of children has been the focus of media attention at the national level and has generated intensive interest in both lay and professional publications. Moreover, there have been several recent governmental hearings and investigations regarding the prevalence of these problems.

**Hyperactive** Matthew Smith, 2013-02-15. Each year doctors diagnose an average of nine percent of children between the ages of five and seventeen with attention deficit hyperactivity disorder or ADHD. One of the most common childhood disorders, it is also one of the most controversial since first identified in the late 1950s. Everyone from medical professionals to politicians has debated its causes, its treatment, and its implications for children. Today, physicians believe it is an inherited neurological disorder best treated with stimulants. *Hyperactive* provides the first history of ADHD, addressing why children were first diagnosed with the disorder, why biological explanations became predominant, how powerful drugs became the preferred treatment, and why alternative explanations have failed to achieve any legitimacy. Contending that hyperactive children are also a product of their social, cultural, and educational environment, Matthew Smith demonstrates how knowledge about the history of ADHD can lead to better choices about its diagnosis and treatment. A revealing and accessible study of this controversial subject, *Hyperactive* is an essential book for psychologists, teachers, policymakers, and parents.

**Hearing, Speech, and Communication Disorders** Information Center for Hearing Speech and Disorders, 2012-12-06. Information analysis centers were developed to help the scientist and practitioner cope with the ever-increasing mass of published and unpublished information in a specific field. Their establishment resulted from a further extension of those pressures that had brought about the formation of the specialized primary journal and the abstracting services at the turn of the century. The information analysis center concept was greatly advanced by the 1963 report of the President's Science Advisory Committee Panel on Science Information. This report stated that scientific interpreters who can collect relevant data, review a field, and distill information in a manner that goes to the heart of a technical situation are more helpful to the overburdened specialist than is a mere pile of relevant documents. Such specialized information centers are operated in closest possible contact with working scientists in the field. These centers not only furnish information about ongoing research and disseminate and retrieve information but also create new information and develop new methods of information analysis, synthesis, and dissemination. The continually expanding biomedical literature produced by scientists from the world's laboratories, research centers, and medical centers led the National Institute of Neurological Diseases and Stroke in 1964 to initiate a National Neurological Information Network of specialized centers for neurological information. The Centers are designed to bring under control and to promote ready access to important segments of the literature.
