Editor's Note

GENERALIZATIONS ABOUT the nature of geography are numerous, for the nature of the field and the varied methods employed in its cultivation command a pluralistic interpretation. Nevertheless, there is at least one generalization that students of geographic thought can offer without loss of contradiction: that the discipline has persistently exhibited national and international characteristics. This study of French geographic thought by a native of Ireland who received her graduate education in the United States, is an admirable illustration of both characteristics.

Like most contributions to the history of academic disciplines, Sister Annette's monograph also exhibits a combination of detachment and personal commitment. The former quality is evident in her desire to let French geographers speak for themselves; the latter is revealed in her attempts to capture the spirit of the French school and to set out, clearly, and appraise significant phases in its evolution. In both regards, Sister Annette has made a notable contribution—a contribution that should be revealing to French scholars as well as to her English-speaking colleagues. #184000

Society And Milieu In The French Geographic Tradition

David Ley, Marwyn Samuels

Society And Milieu In The French Geographic Tradition:

Society and Milieu in the French Geographic Tradition Anne Buttimer, 1971 **Society and Milieu in the French Geographic Tradition** Anne Buttimer, 1971 **American Anthropology, 1971-1995** Regna Darnell, 2002-01-01 American anthropology in the late twentieth century interrogated and depicted the worlds of others past and present in subtle and incisive ways while increasingly questioning its own authority to do so Marxist symbolic and structuralist thought shaped the fieldwork and conclusions of many researchers around the globe Practicing anthropology blossomed and grew rapidly as a subdiscipline in its own right There emerged a keener appreciation of both the history of the discipline and the histories of those studied Archaeologists witnessed a resurgence of interest in the concept of culture The American Anthropologist also made systematic efforts to represent the field as a whole with biological anthropology and linguistics particularly adept at crossing subdiscipline boundaries Proliferation of specialized areas within sociocultural anthropology encouraged work across the subdisciplines The thirty selections in this volume reflect the notable trends and accomplishments in American anthropology during the closing decades of the millennium An introduction by Regna Darnell offers a historical background and critical context that enable readers to better understand the changes and continuity in American anthropology during this time **The Human Experience of Space and Place** Anne Buttimer, David Seamon, 2015-06-03 Humanistic geography is one of the major emerging themes which has recently dominated geographic writing Anne Buttimer has been one of the leading figures in the rise of humanistic geography and the research students she collected round her at Clark University in the 1970s constituted something of a school of humanistic geographers This school developed a significantly new style of geographical inquiry giving special emphasis to people's experience of place space and environment and often using philosophical and subjective methodology This collection of essays first published in 1980 brings together this school and offers insight into philosophical and practical issues concerning the human experience of environments An extensive range of topics are discussed and the aim throughout is to weave analytical and critical thought into a more comprehensive understanding of lived experience This book will be of interest to students of human geography **Geography and the Human Spirit** Anne Buttimer, 2023-05-30 What does it mean to dwell Every civilization has a story to tell according to Anne Buttimer and exploring those stories brings fresh light to modern ideas about the relationship between humanity and its environment In *Geography and the Human Spirit* Buttimer ranges widely from Plato to Barry Lopez from the Upanishads to Goethe taking an interdisciplinary look at the ways in which human beings have turned to natural science theology and myth to form visions of the earth as a human habitat *Landscapes of Housing* Jeanne Haffner, 2021-09-29 In the twenty first century housing has become a site of ecological experimentation and environmental remediation From the vantage point of contemporary architecture conservation concerns and emergent building science technologies support one another with new processes and materials deployed to reduce energy usage water consumption and carbon dioxide emissions Landscapes of

Housing examines this trend in historical perspective arguing for a more considered environmental vision that includes the organic social and cultural dimensions of landscape By shifting the focus from architecture the book highlights and critiques the relationship between dwelling and landscape itself Contributors from a wide range of international perspectives propose a more integrative ecology that includes history culture society and materiality in addition to technology within contemporary ecological housing programs This book will be a resource for upper level students academics and researchers in landscape architecture interested in the social and political implications of ecological housing

Circulation in Third World

Countries R Mansell Prothero, Murray Chapman, 2012-06-25 Circulation is common in Third World countries and involves reciprocal flows of people goods and ideas The essays in this volume first published in 1985 discuss concepts associated with circulation in its various forms and they present empirical evidence based on field work from holistic ecological social and economic points of view Contributions from Latin America the Caribbean Africa Asia and the Pacific come from an international group of authors representing a variety of disciplines in the social sciences All who are concerned with social and economic development need to recognise the importance of circulation at all levels of society and polity

Place

Tim Cresswell, 2014-08-29 Thoroughly revised and updated this text introduces students of human geography and allied disciplines to the fundamental concept of place combining discussion about everyday uses of the term with the complex theoretical debates that have grown up around it A thoroughly revised and updated edition of this highly successful short introduction to place Features a new chapter on the use of place in non geographical arenas such as in ecological theory art theory and practice philosophy and social theory Combines discussion about everyday uses of the term place with the more complex theoretical debates that have grown up around it Uses familiar stories drawn from the news popular culture and everyday life as a way to explain abstract ideas and debates Traces the development of the concept from the 1950s through its subsequent appropriation by cultural geographers and the linking of place to politics

Becoming French

Dana Kristofor Lindaman, 2016-07-01 Becoming French explores the geographical shift that occurs in French society during the first four decades of France's Third Republic government Dana Kristofor Lindaman provides the historical context that led to the explosion of geographic interest at the end of the nineteenth century exploring the ways that the work of the geographers Paul Vidal de la Blache and Elisée Reclus served as a conceptual basis for abstract notions of the nation such as la Patrie Lindaman then uses Reclus's formulation of the earth as *une organisme terrestre* terrestrial organism to read Jules Verne's *Voyage au centre de la terre* Journey to the Center of the Earth as a journey to the center of the individual self Finally he traces the geographic narrative of G. Bruno's *Tour de la France par deux enfants* in particular the way that Bruno's work incorporates the geographic thought of Vidal de la Blache to discover the organic ties that bind readers through the shared experience of reading the text

International Migration and the Social Sciences

E. Vasta, V. Vuddamalay, 2006-06-13 How have Australia France and Germany engaged with immigration and ethnic diversity Are there national stereotypes that

have blocked effective policy making and exacerbated conflicts This book looks at the role of the social sciences in national discourses of migration and how scholars can explain how migration is shaping global society **Humanistic Geography (RLE Social & Cultural Geography)** David Ley, Marwyn Samuels, 2014-01-23 Humanistic geography now has an established position in the intellectual development of contemporary geography However there has so far been little attempt to draw together the humanistic approach in one broad statement This book by the leading figures in the field provides a platform for the exposition of humanistic geography in all its aspects **The Geography of the Everyday** Rob Sullivan, 2017-12-15 Anthropologists psychologists feminists and sociologists have long studied the everyday the quotidian the taken for granted however geographers have lagged behind in engaging with this slippery aspect of reality Now Rob Sullivan makes the case for geography as a powerful conceptual framework for seeing the everyday anew and for pushing back against its givenness its capacity to so fade into the background that it controls us in dangerously unexamined ways Drawing on a number of theorists Foucault Goffman Marx Lefebvre H gerstrand and others Sullivan unpacks the concepts and perceived realities that structure everyday life while grounding them in real world cases such as Nigeria's troubled oil network the working poor in the United States China's urban villages and ultra high end housing in London and Cairo In examining the everyday from a geographical perspective Sullivan ranges widely across time space history geography Marxian reproduction the body and the geographical mind The everyday Sullivan suggests is where change occurs and where resistance to change can begin By locating the everyday through geography we can help to make change possible Whatever the issue be it struggles over race LGBT rights class inequality or global warming the transformations required to achieve social justice all begin with transformation of the everyday order **The Cultural Geography Reader** Timothy Oakes, Patricia L. Price, 2008-03-03 The Cultural Geography Reader draws together fifty two classic and contemporary abridged readings that represent the scope of the discipline and its key concepts Readings have been selected based on their originality accessibility and empirical focus allowing students to grasp the conceptual and theoretical tools of cultural geography through the grounded research of leading scholars in the field Each of the eight sections begins with an introduction that discusses the key concepts its history and relation to cultural geography and connections to other disciplines and practices Six to seven abridged book chapters and journal articles each with their own focused introductions are also included in each section The readability broad scope and coverage of both classic and contemporary pieces from the US and UK makes The Cultural Geography Reader relevant and accessible for a broad audience of undergraduate students and graduate students alike It bridges the different national traditions in the US and UK as well as introducing the span of classic and contemporary cultural geography In doing so it provides the instructor and student with a versatile yet enduring benchmark text **Key Thinkers on Space and Place** Phil Hubbard, Rob Kitchin, 2010-11-30 In this latest edition of Key Thinkers on Space and Place editors Phil Hubbard and Rob Kitchin provide us with a fully revised and updated text that

highlights the work of over 65 key thinkers on space and place Unique in its concept the book is a comprehensive guide to the life and work of some of the key thinkers particularly influential in the current spatial turn in the social sciences Providing a synoptic overview of different ideas about the role of space and place in contemporary social cultural political and economic life each portrait comprises Biographical information and theoretical context An explication of their contribution to spatial thinking An overview of key advances and controversies Guidance on further reading With 14 additional chapters including entries on Saskia Sassen Tim Ingold Cindi Katz and John Urry the book covers ideas ranging from humanism Marxism feminism and post structuralism to queer theory post colonialism globalization and deconstruction presenting a thorough look at diverse ways in which space and place has been theorized An essential text for geographers this now classic reference text is for all those interested in theories of space and place whether in geography sociology cultural studies urban studies planning anthropology or women s studies

The French Historical Revolution Peter Burke, 2015-01-20 This book provides a critical history of the movement associated with the journal *Annales* from its foundation in 1929 to the present This movement has been the single most important force in the development of what is sometimes called the new history Renowned cultural historian Peter Burke distinguishes between four main generations in the development of the *Annales* School The first generation included Lucien Febvre and Marc Bloch who fought against the old historical establishment and founded the journal *Annales* to encourage interdisciplinary collaboration The second generation was dominated by Fernand Braudel whose magnificent work on the Mediterranean has become a modern classic The third generation deeply associated with the cultural turn in historical scholarship includes recently well known historians such as Emmanuel Le Roy Ladurie Jacques Le Goff and Georges Duby This new edition brings us right up to the present and contemplates the work of a fourth generation including practitioners such as Roger Chartier Serge Gruzinski and Jacques Revel This new generation continued much of the cultural focus of the previous *Annales* historians while diversifying further and becoming increasingly reflexive a move that owes much to the sociocultural theories of Michel Foucault Michel de Certeau and Pierre Bourdieu Wide ranging yet concise this new edition of a classic work of analysis of one of the most important historical movements of the twentieth century will be welcomed by students of history and other social sciences and by the interested general reader

Exploring Social Geography (Routledge Revivals) Peter A. Jackson, Susan J. Smith, 2014-06-17 *Exploring Social Geography* first published in 1984 offers a challenging yet comprehensive introduction to the wealth of empirical research and theoretical debate that has developed in response to the advent of a social approach to the subject The argument emphasises the essentially spatial structure of social interaction and includes a succinct discussion of geographical research on segregation and interaction which has combined numerical analyses and qualitative ethnographic field research A distinctive view of social geography is adopted inspired by the Chicago school of North American pragmatism but also incorporating the formal sociological theories of Simmel and Weber *Exploring Social*

Geography will be of value to students of urban geography in particular. However, it will also indicate a wide ranging and distinctive perspective for all students of the social sciences with a special interest in debates concerning urban ethnic racial anthropological and theoretical issues.

Geographers T. W. Freeman, 2015-12-14 *Geographers* is an annual collection of studies on individuals who have made major contributions to the development of geography and geographical thought. Subjects are drawn from all periods and from all parts of the world and include famous names as well as those less well known including explorers, independent thinkers and scholars. Each paper describes the geographer's education, life and work and discusses their influence and spread of academic ideas. Each study includes a select bibliography and a brief chronology. The work includes a general index and a cumulative index of geographers listed in volumes published to date. Published under the auspices of the International Geographical Union.

To Take Place Jonathan Z. Smith, 1987. In this broad ranging inquiry into ritual and its relation to place, Jonathan Z. Smith prepares the way for a new approach to the comparative study of religion. Smith stresses the importance of place in particular constructed ritual environments to a proper understanding of the ways in which empty actions become rituals. He structures his argument around the territories of the Tjilpa aborigines in Australia and two sites in Jerusalem: the temple envisioned by Ezekiel and the Church of the Holy Sepulchre. The first of these locales, the focus of one of the more important contemporary theories of religious ritual, allows Smith to raise questions concerning the enterprise of comparison. His close examination of Eliade's influential interpretation of the Tjilpa tradition leads to a powerful critique of the approach to religion, myth and ritual that begins with cosmology and the category of The Sacred. In substance and in method, *To Take Place* represents a significant advance toward a theory of ritual. It is of great value not only to historians of religion and students of ritual but to all whether social scientists or humanists who are concerned with the nature of place. This book is extraordinarily stimulating in prompting one to think about the ways in which space or place is perceived, marked and utilized religiously. A provocative example of the application of humanistic geography to our understanding of what takes place in religion.

Dale Goldsmith Interpretation

A Companion to Environmental Geography Noel Castree, David Demeritt, Diana Liverman, Bruce Rhoads, 2016-10-03. *A Companion to Environmental Geography* is the first book to comprehensively and systematically map the research frontier of human environment geography in an accessible and comprehensive way. Cross cuts several areas of a discipline which has traditionally been seen as divided, presenting work by human and physical geographers in the same volume. Presents both the current state of the art research and charts future possibilities for the discipline. Extends the term environmental geography beyond its traditional meanings to include new work on nature and environment by human and physical geographers, not just hazards, resources and conservation geographers. Contains essays from an outstanding group of international contributors from among established scholars and rising stars in geography.

Reanimating Places Tom Mels, 2016-12-05. Time space relationships are central to human geography. This book seeks to reanimate time space by considering the links between lived experience

various temporalities and particular places in terms of compounded and contested rhythms Time space rhythms emphasize the practical symbolic everyday and embodied qualities in the experience and making of our geographical environment Bringing together a team of renowned geographers who have been exploring such ideas over the past decades this book provides a unique and varied set of geographical approximations to the reanimation of place nature and landscape revealing a complex disputed world of politics sensory experiences and representations of space time Including case studies from Europe and North America the book addresses some important issues ranging from the symbolic orchestrations of landscape to deeply personal memories of particular natural rhythms
