Zenilman, Mark R. Katlic, 2013-06-29 More than two decades ago in response to the special healthcare needs of the aging American population interest in the field of geriatric medicine began to grow and blossom in the United States In 1984 and 1985 under the editorial leadership of Christine K Cassel and William R Hazzard respectively two major textbooks devoted to the medical care of aged patients were published These scholarly comprehensive texts provided insight into the principles of aging and guidance in the care of the geriatric patient Three editions later the need to understand the special issues involved in the medical care of the elderly is widely accepted by internists primary care providers and medical specialists For the editors of this book the special issues involved in the surgical care of the elderly have been apparent for nearly as long Although there have been a few scholarly texts on the subject including one in 1990 by Mark R Katlic general acceptance of the concept of geriatric surgery by our surgical and medical colleagues has however lagged This is not the result of a

proportionately smaller number of older patients with surgical disease because cancer cardiovascular disease and orthopedic problems are diseases of the aged It is rather the result of uncertainty about the value of surgery in the elderly and concerns about the risks of operations In the past such concerns prevented primary care givers from referring patients for surgical care and prevented surgeons from agreeing to operate **The Woman in the Surgeon's Body** Joan Cassell,2009-07-01

Surgery is the most martial and masculine of medical specialties What then if the surgeon is a woman An anthropologist enters this closely guarded arena to explore the work and lives of women practicing their craft in what is largely a man's world Cassell observed 33 surgeons in five North American cities over the course of three years **Health Psychology**

Whitaker,2016-12-05 This reader looks at both the biological and cultural aspects of health and healing within a comparative framework Health and Healing in Comparative Perspective provides both fascinating comparative ethnographic detail and a theoretical framework for organizing and interpreting information about health While there are many health related fields represented in this book its core discipline is medical anthropology and its main focus is the comparative approach Cross cultural comparison gives anthropological analysis breadth while the evolutionary time scale gives it depth These two features have always been fundamental to anthropology and continue to distinguish it among the social sciences A third feature is the in depth knowledge of culture produced by anthropological methods such as participant observation involving long term presence in and research among a study population For medical anthropology medical sociology public health nursing courses *Health Care Financing Review* ,1999 **Trends in Hospital Utilization** Brenda S.

**INTERNATIONAL(TEXTBOOK OF)** □□□,2011-03-10 *Laparoscopic Surgery* R.M. Olson,Ronald C. Merrell,2012-12-06 In May 1997 the Faculty of Surgery from the University of Athens and elsewhere gathered with colleagues in Athens for the third time in 6 years to continue our discussions on the progress problems realization and future of laproscopic surgery The topics were rather inclusive with regard to the issues that defined the field and the assembled investigators educators and clinicians brought a rich experience and clear vision of the field in the coming years The decision had been made months before to collect our thoughts and experience as a colloquium of the state of laproscopic surgery in the tenth year following the report of Mouret on laparoscopic cholecystectomy not as the proceedings of the specific meeting At the end of a decade of mercurial advance heated debate professional turmoil and very little science it was clear that general surgery would never be the same Laproscopic surgery is now fully established and requires accommodation in the curriculum practice and

research of surgery for the foreseeable future This book is called a colloquium on laparoscopy because it collects the thoughts of many workers in the form of consensus presentations It is offered to any surgeon who is ready to survey this field with clear eyes absent of emotion or hyperbole in our evolution of a better standard of care for surgical patients     **The Art and Science of Reminiscing** Barbara K. Anaesthesia, Pain, Intensive Care and Emergency Medicine — A.P.I.C.E. Antonio Gullo, 1995-11 This critical care medicine book substantially differs from others due to the range of peculiarities that characterize it Since it deals with acute patients in critical conditions this is as it were a borderline book in the sense that it is intended for those who in their activity need a continuous and in depth interdisciplinary approach to optimize the quality of the treatments offered to critically ill patients This book helps to have a better understanding of the current limits of human intervention and aims at supplying updated guidelines in particular it is intended for those who although having to guarantee continuity and top quality therapies must decide when and why the collaboration with and intervention by experts is necessary
