Sociobiology And The Human Dimension:

Sociobiology and the Human Dimension Georg Breuer, 1983-01-13 This book is about animals and humans their common features and their gradual and principle differences It tells of democracy in baboons prostitution in hummingbirds bigamy in wrens baby sitting in jackals of chimpanzees at the computer console and of the super ego of dogs but it is also about the labour productivity of hunter and gatherer peoples incest avoidance in animals and humans and of the myths about matriarchy In a language accessible to any interested layman Georg Breuer gives a balanced account of the main ideas and achievements of sociobiology and the main criticisms levelled against it According to him sociobiology has given many a valuable impetus but sometimes presents a distorted or one sided view In particular it has not answered or addressed the question of why man and man only is able to identify and feel sympathy with any other human being The evolution of this most human of all traits confers on us the capability for charity and solidarity and for the happiness of true love which is unattainable by any animal

Altruism and Christian Ethics Colin Grant, 2000-11-16 Separated from its anchorage in religion ethics has followed the social sciences in seeing human beings as fundamentally characterised by self interest so that altruism is either naively idealistic or arrogantly self sufficient Colin Grant contends that as a modern secular concept altruism is a parody on the self giving love of Christianity so that its dismissal represents a social levelling that loses the depths that theology makes intelligible and religion makes possible The Christian affirmation is that God is characterised by self giving love agape then expected of Christians Lacking this theological background the focus on self interest in sociobiology and economics and on human realism in the political focus of John Rawls or the feminist sociability of Carol Gilligan finds altruism naive or a dangerous distraction from real possibilities of mutual support This book argues that to dispense with altruism is to dispense with God and with the divine transformation of human possibilities

Good and Evil Edward Farley, What does it mean to be human in a world filled with tragedy With creativity and insight Edward Farley one of today s most respected theologians here addresses this universal and haunting question of evil Farley anchors his discussion firmly in interhuman I thou dynamics as a key to unfolding the personal and social spheres of human existence It is says Farley the corruption of elemental passions and the resulting contagion of the personal and social spheres that provide a total view of human evil and its redemptive possibilities

Mimesis and the Human Animal Robert Storey, 1996-12-16 In *Mimesis and the Human Animal* Robert Storey argues that human culture derives from human biology and that literary representation therefore must have a biological basis As he ponders the question What does it mean to say that art imitates life he must consider both What is life and What is art A unique approach to the subject of mimesis Storey s book goes beyond the politicizing of literature grounded in literary theory to develop a scientific basis for the creation of literature and art

The Moral, Social, and Commercial Imperatives of Genetic Testing and Screening Michela Betta, 2007-06-24 In the past people were classified as being healthy or sick With genetic testing and screening adults might be healthy predisposed to an illness probably at risk or carriers of certain risks Genetic testing and screening hits another dramatic note when cells and embryos are tested and subsequently altered to hit targets of perfection This insightful book combines theory and social practice drawing on a range of disciplines and presenting contrasting viewpoints

Understanding Wisdom Warren, Jr. Brown, 2000-11-01 The study of wisdom is challenging and thought provoking This volume sheds light on the age old question What is wisdom and where does it come from Evidence of wisdom can be seen in both perception and performance in sacred scriptures and in brain images An eminent group of scholars from fields as diverse as theology philosophy medicine biology psychology and linguistics were brought together to bring focus to this understudied area of scientific research Editor Warren Brown presents his research on brain functioning drawn from observing individuals with damage to specific neural areas to suggest the importance of integration between hemispheres of the brain to comprehend complex situations in a way that may be termed wise Diana Van Lancker also looks at hemispheres of the brain and explores studies that show that left brain functioning is related to prayers chants and sayings often used in religious practice Wolfgang Mieder recognized as the foremost scholar in the study of proverbs explores the secular use of the biblical proverb of A house divided against itself cannot stand Matt 12 25 R E Clements also looks to the book of Proverbs and focuses on its ultimate goal virtue and wholeness

Sociobiology: Sense or Nonsense? M. Ruse, 2012-12-06 In June 1975 the distinguished Harvard entomologist Edward O Wilson published a truly huge book entitled Sociobiology The New Synthesis In this book drawing on both fact and theory Wilson tried to present a comprehensive overview of the rapidly growing subject of sociobiology the study of the biological nature and foundations of animal behaviour more precisely animal social behaviour Although as the title rather implies Wilson was more surveying and synthesising than developing new material he compensated by giving the most thorough and inclusive treatment possible beginning in the animal world with the most simple of forms and progressing via insects lower invertebrates mammals and primates right up to and including our own species Homo sapiens Initial reaction to the book was very favourable but before the year was out it came under withering attack from a group of radical scientists in the Boston area who styled themselves The Science for the People Sociobiology Study Group Criticism of course is what every academic gets and needs but for two reasons this attack was particularly unpleasant First not only were Wilson's ideas attacked but he himself was smeared by being linked with the most
