Language in Society Suzanne Romaine, 2000-10-05 Why have 1500 separate languages developed in the Pacific region Why do Danes understand Norwegians better than Norwegians understand Danish Is Ebonics a language or a dialect Linguistics tends to ignore the relationship between languages and the societies in which they are spoken while sociology generally overlooks the role of language in the constitution of society In this book Suzanne Romaine provides a clear lively and accessible introduction to the field of sociolinguistics and emphasizes the constant interaction between society and language discussing both traditional and recent issues including language and social class language and gender language and education and pidgins and creoles The text shows how our linguistic choices are motivated by social factors and how certain ways of speaking come to be vested with symbolic value and includes examples drawing on studies of cultures and languages all over the world This new edition incorporates new material on current issues in the study of gender as well as other topics such as the linguistic dimension to the ethnic conflict in the Balkans and the controversy over Ebonics in the United States

death in modern times As individuals adopt new ways of speaking many languages are disappearing others are spoken in mixed ways combining words from different languages and even very stable languages are coming to take on distinctive new shapes as young speakers create novel expressions and make use of innovative pronunciations Carefully explaining the many reasons for language variation and change which relate to the structure of society and the expression of group and personal identity Language and Society presents a detailed but highly accessible examination of the social importance of language in our everyday lives and how our knowledge of language can either act as a facilitating gateway or inhibit access to education advances in employment and the development of social status The volume also includes chapters focused specifically on the global growth of knowledge of English multilingualism differences in the way that gender and gendered practices interact with language and the ways that language may potentially influence the ways speakers perceive the world *The Oxford Handbook of Language and Society* Ofelia Garcia, Nelson Flores, Massimiliano Spotti, 2016-11-01 This Oxford Handbook challenges basic concepts that have informed the study of sociolinguistics since its inception in the 1960s In 27 chapters the book challenges the modernist positivist perspective of the field that has treated languages and speech communities as bounded and the idealized native speaker as the ultimate authority Instead it offers a critical poststructuralist perspective that examines the socio historical context that led to the emergence of dominant sociolinguistic concepts and develops new theoretical and methodological tools that challenge these dominant concepts The contributors to this volume take this critical poststructuralist perspective as a starting point for engaging in explorations of a range of sociolinguistic topics including language variation language ideologies bi multilingualism language policy linguistic landscapes and multimodality Each of the contributors provides a critical overview of the limits of modernist positivist perspectives on their topic and offer ways of theorizing and researching their topic in ways that are aligned with a critical poststructuralist perspective The book also provides a global perspective on these issues with contributors focused on North and South America Europe Australia and Africa Together the interdisciplinary and global contributions reveal the limits of conventional approaches to sociolinguistics and offer a glimpse into directions for the future of the field

An Introduction to Sociolinguistics Sharon K. Deckert, Caroline H. Vickers, 2011-05-19 This unique work analyzes the crisis in modern society building on the ideas of the Frankfurt School thinkers Emphasizing social evolution and learning processes it argues that crisis is mediated by social class conflicts and collective learning the results of which are embodied in constitutional and public law First the work outlines a new categorical framework of critical theory in which it is conceived as a theory of crisis It shows that the Marxist focus on economy and on class struggle is too narrow to deal with the range of social conflicts within modern society and posits that a crisis of legitimization is at the core of all crises It then discusses the dialectic of revolutionary and evolutionary developmental processes of modern society and its legal system This volume in the Critical Theory and Contemporary Society by a leading scholar in the field provides a new approach to critical theory that will appeal to anyone studying political
