Sociological Concepts A Literary Reader:

Sociological Concepts Ronald A. Hardert, Ruth M. Cullen, Linda Blalock Hardert, 1987 The Language and Literature Reader Ronald Carter, Peter Stockwell, 2020-08-19 The Language and Literature Reader is an invaluable resource for students of English literature language and linguistics Bringing together the most significant work in the field with integrated editorial material this Reader is a structured and accessible tool for the student and scholar Divided into three sections Foundations Developments and New Directions the Reader provides an overview of the discipline from the early stages in the 1960s and 70s through the new theories and practices of the 1980s and 90s to the most recent and contemporary work in the field Each article contains a brief introduction by the editors situating it in the context of developing work in the discipline and glossing it in terms of the section and of the book as a whole The final section concludes with a history and manifesto written by the editors which places developments in the area of stylistics within a brief history of the field and offers a polemical perspective on the future of a growing and influential discipline *Reading Cultures* Molly Abel Travis, 1998 Molly Abel Travis unites reader theory with an analysis of historical conditions and various cultural contexts in this discussion of the reading and reception of twentieth century literature in the United States Travis moves beyond such provisional conclusions as the text produces the reader or the reader produces the text and considers the ways twentieth century readers and texts attempt to constitute and appropriate each other at particular cultural moments and according to specific psychosocial exigencies She uses the overarching concept of the reader in and out of the text both to differentiate the reader implied by the text from the actual reader and to discuss such in and out movements that occur in the process of reading as the alternation between immersion and interactivity and between role playing and unmasking Most reader theorists fix on the product of reading and exclude the process Travis notes which means they necessarily focus on the text Even theorists who argue for the reader's resistance make the text so determinant that they conceive of text and reader as discrete entities in a closed universe with these entities exerting force and counterforce respectively Missing in these accounts are wave and field theories concerned with such dynamic and contrastive effects as changes in the art of literary reading over historical periods and differences among readers in the context of a cultural field Travis seeks to fill gaps in current reader theories by focusing on process and difference Unlike most reader theorists Travis is concerned with the agency of the reader Her conception of agency in reading is informed by performance psychoanalytic and feminist theories This agency involves compulsive reiterative performance in which readers attempt to find themselves by going outside the self engaging in literary role playing in the hope of finally and fully identifying the self through self differentiation Furthermore readers never escape a social context they are both constructed and actively constructing in that they read as part of interpretive communities and are involved in collaborative creativity or what Kendall Walton calls collective imagining
