Sociological Investigations:

Sociological Investigations James Dan Cover,1993 **Sociological Research Methods** Martin Bulmer,2017-07-12 A rich source of ideas about sociological research methods to assist the researcher in determining what method will provide the most reliable and useful knowledge how to choose between different methodologies and what constitutes the most fruitful relationship between sociological theories and research methods *Essays on the History of British Sociological Research* Martin Bulmer,1985-02-07 Traces the history of British sociology and empirical social research over the past hundred years Concludes with a discussion of the applications of the research including the use of social surveys for policymaking and the success of social science in predicting the future Qualitative Research in Sociology Amir Marvasti,2004 Qualitative Research in Sociology offers a hands on guide to doing qualitative research in sociology It provides an introductory survey of the methodological and theoretical dimensions of qualitative research as practiced by those interested in the study of social life Through a detailed yet concise explanation the reader is shown how these methods work and how their outcomes may be interpreted Practically focused throughout the book also offers constructive advice for students analyzing and writing their research projects The book has a flowing narrative and student friendly structure which makes it accessible to and popular with students It will be an invaluable resource for students and researchers helping them to undertake effective qualitative research in both sociology and courses in social research across the social sciences **The Bureau of Sociological Research at the University of Nebraska** Michael Hill,2016-08-10 This volume is a provisional account of the origins and subsequent work of the Bureau of Sociological Research BOSR at the University of Nebraska Lincoln UNL This study was prepared at the request of Julia McQuillan Chair of the UNL Department of Sociology and a past BOSR Director for the 50th anniversary celebration of the Bureau in April 2014 The Bureau of Sociological Research established in 1964 was founded as a formal organization within the Department of Sociology at the University of Nebraska Lincoln It is part of a departmental heritage that is now more than a century long Directors of the Bureau have included Herman Turk Alan Booth David R Johnson Hugh P Whitt Lynn K White Helen A Moore D Wayne Osgood Laura A Sanchez Dan R Hoyt Julia Mcquillan Philip Schwadel and Jolene D Smyth Sociological Research Methods in Context Fiona Devine,Sue Heath,1999-06-11 This book seeks to introduce students to the challenges of real life social research through a detailed consideration of eight recent empirical studies Designed to complement existing introductory methods texts it emphasises the importance of context in understanding and interpreting both the practice and product of empirical research The book focuses on research from eight key sub areas of sociology making it a useful secondary text for introductory courses on contemporary British society **Methodology of Sociological Research** S. Nowak,2012-12-06 This is the first part of a textbook for students of sociology and for those students of other social sciences who wish to make use in their work of the research methods elaborated in the course of the development of empirical sociology over the last

few decades The development of empirical sociological research in our country and the growing demand both for a practical application of its results and for graduates of sociological studies in various fields of social practice testifies to a much broader trend It is evidence of a desire to base our understanding and conscious transformation of social phenomena on a sound scientific perception of social processes and the mechanisms governing them The increasing volume of studies in Poland is accompanied by a growing need for a particular type of research method namely one in which questions addressed to the sociologist would be answered in a manner as free as possible of conclusions based on impressions and defining as unambiguously as possible both the limits of the generality and the degree of validity of the inferences drawn from the results of the research These conditions are met by the so called standardized methods of investigating social phenomena which together with statistical methods of analyzing collected material constitute the principal means of conducting sociological research in the world today
