

SOCIOLOGICAL PARADIGMS

Sociological paradigms are the broad schools of thought in sociology. The three key sociological paradigms are functionalism, conflict theory, and symbolic interactionism.

1. FUNCTIONALISM

Argues that social stability is a prerequisite for a healthy and strong society. Social institutions contribute towards social stability. Abrupt social change imperils social order.

2. CONFLICT THEORY

Argues that society is built upon enduring inequality on the basis of social class, gender, race etc. Structural social change is required to create an egalitarian society.

3. SYMBOLIC INTERACTIONISM

Argues that we construct society through a range of symbols (e.g., words, gestures) and social interactions. People make up their roles as they interact.

False Moves in Philosophy and Social Theory Patrick Murray, Jeanne Schuler, 2023-09-12 This book considers diverse philosophical topics unified by the identification of false moves commonly found in modern philosophy mainstream Anglo American philosophy and social theory The authors expose the sources of fundamental problems that recur in philosophy basic problems with what the authors call factoring philosophy Factoring philosophy fails to attend to the phenomenological task of determining when what is distinguishable is separable and when not Consequently factoring philosophy makes phenomenological mistakes false moves when it treats as separable what is only distinguishable Analytic philosophy is prone to false moves when it fails to recognize that phenomenology is the necessary complement to analysis There is nothing wrong with analysis we might as well give up thinking as give up analysis and nothing is wrong with the values prized by analytic philosophy As Hegel observed philosophizing requires above all that each thought should be grasped in its full precision and that nothing should remain vague and indeterminate Ultimately this book contends that false moves prevail in philosophical analysis and social theory when they neglect their phenomenological foundations
