### **Law of Three Stages**

The Law of three stages is the corner stone of Auguste Comte's approach. Comte's ideas relating to the law of three stages reveal that man is becoming more and more rational and scientific in his approach by gradually giving up speculations, imagination etc. He has shown that there is a close association between intellectual evolution and social progress. The law of three stages is the three stages of mental and social development. It is the co-ordination of feeling, thought and action in individuals and society. There are three important aspects of our nature. Such as our feelings, our thought and our actions.

**Our feelings:** The emotions and impulses which prompt us.

**Our thought:** Which are undertaken in the service of our feelings but also helps to govern them.

**Our actions:** Which are undertaken in the service of our feelings and thought. For the continuity and existence of society there must be some order of institutions, values, beliefs and knowledge which can successfully co-relate the feelings, thought and activity of its members. In the history of mankind—during which the social order bringing these elements into relation with each other has been worked out—three types of solution, three stages of development can be distinguished.

**According to Comte, each of our leading conceptions—each branch of our knowledge passes successively through different theoretical conditions:**

1. The Theological or fictitious,
2. The Metaphysical or abstract,
3. The Scientific or positive.

Comte considered his law of Three stages based upon belief in social evolution to be the most important. There has been an evolution in the human thinking, so that each succeeding stage is superior to and more evolved than the preceding stage. It can hardly be questioned that Comte's law of three stages has a strong mentalist or idealistic bias. He co-related each mental age of mankind with its characteristic accompanying social organisation and type of political dominance. This law appeared in, the year 1822 in his book Positive Philosophy.

#### **The Theological or Fictitious stage:**

The theological stage is the first and it characterised the world prior to 1300. Here all theoretical conceptions, whether general or special bear a supernatural impress. At this level of thinking there is a marked lack of logical and orderly thinking. Overall the theological thinking implies belief in super natural power.

This type of thinking is found among the primitive races. In theological stage, all natural phenomena and social events were explained in terms of super natural forces and deities, which ultimately explaining everything as the product of God's will. This stage is dominated by priests and ruled by military men.

Human mind is dominated by sentiments, feelings and emotions. Every phenomenon was believed to be the result of immediate actions of super-natural beings. Explanations take the form of myths concerning spirits and super natural beings.

Man seeks the essential nature of all beings, first and final causes, origins and purposes of all effects and the overriding belief that all things are caused by super natural beings. Theology means discourse in religion. Religion dominates in this state of development. This state is characterised by conquest. The theological—

Sociological Thought M. Francis Abraham, John Henry Morgan, 1989      **Masters of Sociological Thought** Lewis A. Coser, 1977 For today's readers to understand the history of sociological theories more is required than a knowledge of formal propositions and theoretical structures In this impressive and enduring text Coser elucidates his examination of the ideas of fifteen influential sociological thinkers with a discussion of the social and intellectual circumstances that surrounded them Each of the first fourteen chapters follows a parallel organization The first section is a capsule summary of the scholar's work his main orientations ideas and contributions Next is a short sketch of his life his struggles and successes the influences of his family peers and superiors and his involvement in community affairs The third section locates him and his work in the texture of a particular moment in intellectual history The concluding section addresses sociological questions such as What were the social origins of the theorist Did crucial events e.g. war depression revolution help fashion his orientations in ways similar to those of others in his generation The final chapter presents a less detailed discussion of major American theorists whose theories emerged between the 1940s and 1960s      **Main Currents in Sociological Thought** Raymond Aron, 1974

Main Currents in Sociological Thought Raymond Aron, 2017 In this second volume of *Main Currents of Sociological Thought* Raymond Aron continues the analysis begun in the first volume of the great doctrines of historical sociology Aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century Emile Durkheim the great French theorist of consensus who continued Auguste Comte's quest for a science of society and a scientific validation of morality Vilfredo Pareto the Italian neo-Machiavellian who mocked traditional morality and humanitarian pretensions and emphasized the oligarchic or elitist character of all societies and the German sociologist Max Weber who reflected continuously on the relationship between science and action filled with deep foreboding about the prospects for human freedom in an age marked by bureaucratization and rationalization Aron presents rich portraits of these three thinkers drawing from them what remains of enduring worth even as he distances himself from Durkheim's project for a science of society Pareto's exaggerated critique of humanitarianism and Weber's tragic pessimism Aron's book is essential for clarifying his profound indebtedness to and crucial divergences from the thought of Max Weber the sociologist par excellence in Aron's view Together with volume 1 which treats the work of Montesquieu Comte Marx and Tocqueville it forms the definitive survey of the great social thinkers to date Yet as Daniel J. Mahoney and Brian C. Anderson explain in their introduction *Main Currents* is more than a survey it is above all a challenge to contemporary social science to retain the ambition of an older philosophically informed sociology to present an interpretation of modern society and to reflect on the meaning of universal history Provided by publisher      **Main Currents in Sociological Thought** Raymond Aron, 1989      **Histoire Russe**, 1996

*Rough Dialectics* Palmer Talbutt Jr., 2022-07-11 This is an exploration in depth of the social theory of the Russian-born thinker Pitirim A. Sorokin who played a large role in American thought Sorokin's contributions to theories of culture social

change modernity and dialectics are evaluated in this wide ranging study The book emphasizes the place of values in the comparative study of civilizations This volume includes a translation by Lawrence T Nichols of Sorokin's essay in Russian on Tolstoy as philosopher as well as a chapter by Nichols on Tolstoy and Sorokin In this book Palmer Talbutt Jr examines his former teacher Sorokin within intellectual educational and cultural contexts The work will be of especial interest to scholars in social philosophy the philosophy of the social sciences philosophy of culture and comparative cultural studies

**Main Currents in Sociological Thought: Volume One** Raymond Aron, 2025-05-06 The first volume of the landmark study tracing the emergence and formation of sociological thought from the French liberal school to the Marxists *Main Currents in Sociological Thought* remains a foundational synthesis in the field In this first part of his magisterial two volume survey Raymond Aron embraces an expansive definition of sociology that merges empirical inquiry with historical and social analysis At its core Aron's work is an engagement with the very question of modernity How did the intellectual currents that emerged in the eighteenth century shape the modern political and philosophical order With scrupulous fairness Aron examines the thoughts and arguments of the discipline's major social thinkers to discern how they answered this question Volume 1 explores three traditions the French liberal school of political sociology represented by Montesquieu and Tocqueville the Comtean tradition anticipating Durkheim in its elevation of social unity and consensus and the Marxists who posited the struggle between classes and placed their faith in historical necessity Written with his customary lucid elegance of thought and style Aron's work is essential reading for students across the social sciences

**Stalinism and the Politics of Mobilization** David Priestland, 2007-02-01 *Stalinism and the Politics of Mobilization* offers a new interpretation of Bolshevik ideology examines its relationship with Soviet politics between 1917 and 1939 and sheds new light on the origins of the political violence of the late 1930s While it challenges older views that the Stalinist system and the Terror were the product of a coherent Marxist Leninist blueprint imposed by a group of committed ideologues it argues that ideas mattered in Bolshevik politics and that there are strong continuities between the politics of the revolutionary period and those of the 1930s By exploring divisions within the party over several issues including class the relations between elites and masses and economic policy David Priestland shows how a number of ideological trends emerged within Bolshevik politics and how they were related to political and economic interests and strategies He also argues that central to the launching of the Terror was the leadership's commitment to a strategy of mobilization and to a view of politics that ultimately derived from the left Bolshevism of the revolutionary period
