Sociology and Development Ray Kiely, 1995 First published in 1995 Routledge is an imprint of Taylor Francis an informal company

The Sociology Of Development Ray Kiely, 2014-04-04 First published in 1995 Since its establishment as a separate discipline within the social sciences in the post war world development sociology has undergone a number of theoretical transformations each of which attempted to overcome the inadequacies of the previous paradigm and a matter of academic debate but many writers agree that the discipline has reached something of an impasse This book is concerned with explaining the reasons for the impasse and suggesting ways of moving beyond it Its focus is on Marxist and related theories of development and underdevelopment since these have dominated the field for the past 20 or so years

Beyond the Impasse Frans J Schuurman, 1993 Development theory in the past decade has met with increasingly heavy criticism Dependency theories as well as modes of production and world system approaches have come to be considered as internally inconsistent and inadequate for explaining the increasing diversity and unevenness of the Third World This book confronts the theoretical impasse which many feel has been reached Development scholars from various disciplines review recent changes in research priorities procedures and orientations and detect the emergence of new and diverse lines of theoretical development in the field In particular they deal with the important meta theoretical political cultural and ethical questions that have come to the fore

Industrialization and Development Ray Kiely, 2023-05-09 An introductory development studies text which puts industrialization into theoretical context examines the forms it has taken and considers economically efficient and socially responsible alternatives

Beyond the Impasse Frans J Schuurman, 1994 Development theory in the past decade has met with increasingly heavy criticism Dependency theories as well as modes of production and world system approaches have come to be considered as internally inconsistent and inadequate for explaining the increasing diversity and unevenness of the Third World This book confronts the theoretical impasse which many feel has been reached Development scholars from various disciplines review recent changes in research priorities procedures and orientations and detect the emergence of new and diverse lines of theoretical development in the field In particular they deal with the important meta theoretical political cultural and ethical questions that have come to the fore

The Politics of Destination in the 2030 Sustainable Development Goals Clive Gabay, Suzan Ilcan, 2018-08-13 This book represents an unusual intervention in debates about the nature of contemporary international development where the majority of scholarship tends to concern itself with measuring or collating goal performance Through a series of analyses of the United Nations Sustainable Development Goals this book explores development as a political construct and is concerned with the kinds of epistemological hegemonic or politico economic assumptions built into contemporary development policy and the ensuing effectiveness the SDGs will have in terms of addressing or perpetuating the historical impoverishment of large groups of people living in poverty The contributors to the book take issue with many of the assumptions upon which SDGs rest while also broadening the conversation to pay attention to knowledge production modernity colonialism exclusion citizenship and other conceptual insights In this context the book raises questions about the discourses and practices of the SDGs especially in relation to how they can define the limits of what can be said and what can be done shape development logics through notions of division and forms of exclusion construct political problems as technical problems create certain spaces of imagination as a field of activity and endorse particular ideas and forms of knowledge in models for sustainable development This book was originally published as a special issue of *Globalizations*

The Global Development Crisis Benjamin Selwyn, 2014-02-07 The central paradox of the contemporary world is the simultaneous presence of wealth on an unprecedented scale and mass poverty Liberal theory explains the relationship between capitalism and poverty as one based around the dichotomy of inclusion into capitalism vs exclusion from capitalism Within this discourse the global capitalist system is portrayed as a sphere of economic dynamism and as a source of developmental opportunities for less developed countries and their populations Development policy should therefore seek to integrate the poor into the global capitalist system The Global Development Crisis challenges this way of thinking Through an interrogation of some of the most important political economists of the last two centuries Friedrich List Karl Marx Leon Trotsky Joseph Schumpeter Alexander Gerschenkron Karl Polanyi and Amarta Sen Selwyn argues that class relations are the central cause of poverty and inequality within and between countries In contrast to much development thinking which portrays the poor as reliant upon benign assistance this book advocates the concept of labour centred development Here the poor are the global labouring classes and their own collective actions and struggles constitute the basis of an alternative

The Future of Liberation Theology Ivan Petrella,2017-03-02

The Future of Liberation Theology envisions a radical new direction for Latin American liberation theology One of a new generation of Latin American theologians Ivan Petrella shows that despite the current dominance of end of history ideology liberation theologians need not abandon their belief that the theological rereading of Christianity must be linked to the development of historical projects models of political and economic organization that would replace an unjust status quo In the absence of historical projects liberation theology currently finds itself unable to move beyond merely talking about liberation toward actually enacting it in society Providing a bold new interpretation of the current state and potential future of liberation theology Ivan Petrella brings together original research on the movement with developments in political theory critical legal theory and political economy to reconstruct liberation theology s understanding of theology democracy and capitalism The result is the recovery of historical projects thus allowing liberation theologians to once again place the reality of liberation and not just the promise at the forefront of their task
