Sociology helps people answer a lot of questions about the specifics of their interactions and the development of their community. Religion reflects the people's visions typical for this or that social group. From this point, religion becomes the object of the sociologists' study in order to explain the characteristics of the people's interactions in relation to their religious beliefs and attitudes to the sacred.

That is why, religion should be discussed as the social phenomenon which is typical for the definite religious group because religious groups differ in their visions and beliefs, and this fact influences the development of society significantly.

Thus, the sociology of religion studies religion in its connection with the society and the people's dependence on the definite religious beliefs and attitudes to form and develop their community. From this perspective, the sociology of religion is the specific sphere of knowledge in relation to which sociologists examine people's religious beliefs, their sacred practices and attitudes in their connection with the social development.

Sociology of religion is studied with the help of the methodological framework used in sociology that is why researchers are interested in the empirical information associated with the religious issues, people's religious visions and practices.

Thus, Johnstone determines the characteristic feature of this field of knowledge which is in the fact that "the sociology of religion is conducted according to the scientific method" (Johnstone 6). The next important feature of sociology of religion is the discussion of religion as the social phenomenon in spite of the fact people are inclined to discuss the religious beliefs as the part of their personal life (Putnam and Campbell).

It is necessary to pay attention to the fact that both visions are relevant because according to Johnstone, "religion is a response to both individual and group needs" (Johnstone 38). Religion can be discussed as the reflection of the individual's attitudes to the sacred, but the subject matter of studying sociology of religion as the sphere of knowledge is religion within the society.

Moreover, religion cannot exist without its connection with society because it emerges as the result of the people's interactions with each other. The subject of the

Seeing Religion Roman Williams, 2015-05-13 The potential of visual research methods in the sociology of religion is vast but largely untapped This comes as a surprise however given the visual symbolic and material nature of religion and spirituality Evidence of religious faith and practice is materially present in everything from clothing and jewelry to artifacts found in people's homes and workplaces Not only is religion's symbolic and material presence palpable throughout society it also informs attitudes beliefs and behaviors of countless people worldwide Words and numbers approaches to social research however sometimes miss important dimensions of religion and spirituality in the contemporary world Seeing Religion is an invitation to a visual sociology of religion Contributors draw from their current research to discuss the application of visual methods to the study of religion and spirituality Each chapter stimulates the sociological imagination through examples of research techniques analytical approaches and methodological concerns

The Study of Religion in an Age of Global Dialogue Leonard J. Swidler, Paul Mojzes, 2000 Religion is the most fundamental comprehensive of all human activities it tries to make sense out of not simply one or another aspect of human life but of all aspects of human experience At the core of every civilization lies its religion which both reflects and shapes it Thus if we wish to understand human life in general and our specific culture and

history we need to understand religion What is religion Religion is an explanation of the ultimate meaning of life and how to live accordingly based on a notion of the Transcendent Normally it contains the four C s Creed Code Cult Community structure CREED refers To The cognitive aspect of a religion it is everything that goes into the explanation of the ultimate meaning of life CODE OF BEHAVIOR or ethics includes all the rules and customs of action that somehow follow from one aspect or another of the Creed CULT means all the ritual activities that relate the follower to one aspect or another of the Transcendent either directly or indirectly prayer being an example of the former and certain formal behavior toward representatives of the Transcendent such as priests of the latter COMMUNITY STRUCTURE refers To The relationships among the followers this can vary widely from a very egalitarian relationship As among Quakers through a republican structure as Presbyterians have To a monarchical one As with some Hasidic Jews have with their Rebbe THE TRANSCENDENT As the roots of the word indicate means that which goes beyond the everyday The ordinary The surface experience of reality it can mean spirits gods a Personal God An Impersonal God Emptiness etc This volume looks at the ways we humans have developed to study religion However a new age in human consciousness is now dawning The Age of Global Dialogue a radically new consciousness which fundamentally shifts the ways we understand everything in life including religion This global dialogical way of understanding life does not lead to one global religion but it does lead toward a consciously acknowledged common set of ethical principles a Global Ethic The book looks at these two movements the Age of Global Dialogue and inchoative Global Ethic in order to help readers understand what is going on around them So they might make informed intelligent decisions about the meaning of life and how to live it Author note Leonard Swidler is Professor of Religion at Temple University Paul Mojzesis Academic Dean and Professor of Religious Studies at Rosemount College

Sociological Theory and the Question of Religion Dr Andrew McKinnon, Dr Marta Trzebiatowska, 2014-12-28 This book offers a variety of theoretical perspectives on the study of religion that bridge the gap between mainstream concerns of sociologists and the sociology of religion Following an assessment of the current state of the field the authors develop an emerging critical perspective within the sociology of religion with particular focus on the importance of historical background Re assessing the themes of aesthetics listening and different degrees of spiritual self discipline the authors draw on ethnographic studies of religious involvement in Norway and the UK Approaches to the Study of Religion Peter Connolly, 1999-10-01 It has been argued that religious studies is a polymethodic discipline and that the student of religion should be familiar with the approaches of the major disciplines concerned with understanding the nature of religion not least because the approach adopted has profound influence on the phenomena chose for investigation and the conclusions reached This book is the first textbook specifically designed for undergraduate students that provides the essential background on methods of the major relevant disciplines Presenting each of the significant approaches to religion in an informed manner the book brings together experienced researchers from feminism anthropology sociology phenomenology psychology philosophy

and theology It presents a consistent approach throughout with each chapter dealing with the same themes the historical development of the approach the characteristics of the approach and the surrounding issues and debates *Studying Lived Religion* Nancy Tatom Ammerman, 2021-12-07 Offers an overarching definition and framework for the study of religion as it manifests itself in everyday life Look around you as you walk down the street somewhere usually hidden in plain sight there will be traces of religion Perhaps it is the person who walks past with a Christian tattoo or a Muslim hijab Perhaps it is the poster announcing a charity auction at the local synagogue Or perhaps you open your Instagram feed to see what inspiring images and meditations have been posted by spiritual guides to help start the day Studying Lived Religion examines religious practices wherever they happen both within religious spaces and in everyday life Although the study of lived religion has been around for over two decades there has not been an agreed upon definition of what it encompasses and we have lacked a sociological theory to frame the way it is studied This book offers a definition that expands lived religion's geographic scope and a framework of seven dimensions around which we can analyze lived religious practice Examples from multiple traditions and disciplines show the range of methods available for such studies offering practical tips for how to begin The volume opens up how we understand the category of lived religion erasing the artificial divide between what happens in congregations and other religious institutions and what happens in other settings Nancy Tatom Ammerman draws on examples ranging from Singapore to Accra to Chicago to show how deeply religion permeates everyday lives In revealing the often overlooked ways that religion shapes human experience she invites us all into new ways of seeing the world around us
