Lemert, 2015-12-22 Widely assigned and taught in senior capstone and social theory courses *Sociology After the Crisis* offers the first systematic theory of social differences built on the sociological traditions by embracing to Durkheim Weber and other familiar figures The first edition was acclaimed for its nuanced and original rereading of Durkheim in relation to the theoretical reasons he and his contemporaries neglected race and gender This new edition features two chapters of new material written in the summer of 2003 as the new social structures of the 21st century became increasingly clear The new Chapter Ten draws upon 9 11 the new world order of two Bush presidencies and globalization to show how individuals lives and sociologies must be thought about in new ways These events also highlight how American society and sociology have responded and sometimes failed in the struggle over the crisis of modernism Reviews for the First Edition This expansive reimagining of the historical roots of sociological imagination especially as it embraces voices and visions long lost to our most important national debates is balm to the fractured soul of American society Lemert s elegant and passionate volume will aid immeasurably in our nation s search for sane solutions to the crises of purpose and perspective he so skillfully explores Michael Eric Dyson author of *Making Malcolm* and *Between God and Gangsta Rap* Elegantly crafted Steven Seidman State University of New York at Albany *Environmental Sociology* Matthias Groß, Harald Heinrichs, 2010-06-17 Despite being a relatively young sub discipline European environmental sociology has changed considerably in the last decades towards more interdisciplinary collaborations and problem solving Current trends such as global environmental modernization and processes of economic political and socio cultural globalization fuelled by developments of transport environmental flows scientific uncertainty and information technologies have fostered new conceptual approaches that move beyond classical sociological mind sets toward broader attempts to connect to other disciplines [Reflections on Politically Skeptical Era \(Clt\)](#) Dennis Hume Wrong, a welcome and scholarly contribution to Political Science reference collections and reading lists The Bookwatch All of the essays included in the present volume were written between 1995 and 2001 This attests to the timeliness and relevance of Dennis H Wrong s writings He notes that the mid twentieth century disposition to believe that politics fundamentally consisted of clashes between totalistic worldviews such as communism socialism capitalism fascism nationalism internationalism and a cluster of isms may have been historically transitional But politics now appears more nuanced if no less troubled following the collapse of the Soviet bloc between 1989 and 1991 Multiculturalism and identity politics as well as communitarianism flourished in the 1990s The volume is divided into five parts Capitalism Inequalities and Alternatives Multiculturalism and Identity Politics Communitarianism Theory and Theorists and Autobiographical Reminiscences This concluding part indicates how Wrong s work includes self reflections as well as reflections an examination of how figures such as C Wright Mills and Raymond Aron Amitai Etzioni and Digby Baltzell played a role in shaping his own thought and how these changed over the course of the past

century This is the third collection of the essays and articles of Dennis H Wrong published by Transaction As was the case with his earlier volumes *Reflections on a Politically Skeptical Era* is characterized by a deep attention to the actual social history of our times and how this plays out in academic pursuits especially within sociology Whether the works were published in academic journals or more popular media they reflect a quality of literary manners that is rare among social science writings but a reflection that never sacrifices a sense of principle and probity in the process Dennis H Wrong is the author of several books including two essay collections containing articles first published in cultural intellectual political and scholarly journals in the United States Canada and Britain several of which he has served as an editor or editor in chief He has taught sociology at Princeton Rutgers Brown the University of Toronto the New School for Social Research Graduate Faculty and for most of his career at New York University He is currently retired and lives in Princeton

Class and Politics in Contemporary Social Science Dick Houtman,2017-07-12 Dick Houtman argues that neither authoritarianism nor libertarianism can be explained by class or economic background but rather by position in the cultural domain what he calls cultural capital Although he examines all of the statistics and arguments of the conventional approaches with care and concern Houtman convincingly demonstrates that the conclusions drawn from earlier studies are untenable at a more general theoretical level Despite differences among advocates of class explanations their theories are based on largely identical research findings in particular a strong negative relationship between education and authoritarianism Unobstructed by the conclusions these authors felt called upon to draw from the findings themselves Houtman configures them in a new way The hypotheses derived from this new theory allow for a systematic strict and competitive testing of original theses without ignoring the value of and earlier research After demonstrating that authoritarianism and libertarianism cannot be explained by class or economic background Houtman examines the implications of this argument for today s death of class debate in political sociology He holds it to be unfortunate that the relevance of class to politics is typically addressed by studying the relation between class and voting This conceals a complex cross pressure mechanism that causes this relationship to capture the net balance of class voting and its opposite cultural voting instead of class voting He argues that references to a decline in class voting may be basically correct but dogmatic reliance on the relation between class and voting to prove the point systematically underestimates levels of class voting and produces an exaggerated picture of the decline

Governing the Firm in the Social Interest Catherine Casey,2024-02-20 The corporate business enterprise is a core institution of capitalism It holds immense political economic and cultural power in society It mobilizes social and planetary resources to its utility in pursuit of private profit maximization and with little regard for social concerns Its influence over so much of societal life and effects on the natural environment raise critical questions about the firm and its governance in democratic society Various voices seek reforms of regulation and corporate governance practices to those shaped by the neoliberal policies persisting in the current decades But prospects for amelioration within our current horizons of thinking appear elusive This book contributes a distinctly social theoretical approach to the social problem of governing the firm Its discussions complement debates in economics politics and law Its critical social theorizations challenge conventional understandings of the firm and neoliberal legitimacies of its governance and posit alternatives The book explores the social relations and moral fabric of the firm and the creativity of human action at work It proposes a reimagined corporate governance premised on just recognition of that social vitality It invites unprecedented collaboration for a robust participatory democracy for governing the firm and market action oriented to ecological and social sustainability

Renewal Colbert Rhodes,2017-07-11 Offering a deep look into the moral uncertainty

in the contemporary social sciences and American society this book explores an in depth solution This solution as articulated by Pitirim A Sorokin in the 20th century is the theory of Integralism a perspective dating back to Plato Aristotle and Aquinas Sorokin initially applied Integralism by locating and analyzing three dominant super socio cultural systems over 2500 years of Graeco Roman and Western history Each super system was unified by a central philosophical principle based either on materialism the senses or the rational or the supersensory super rational A super system declines when it reaches the limits of its potential to achieve its true reality and value to be replaced by another super system Sorokin described a trendless rotation of the three super socio cultural systems The current dominant super socio cultural system in the West is a materialist version emphasizing science and technology with little thought given to supersensory super rational reality Sorokin asserted contemporary materialist culture was in a state of collapse due to the breakup of its moral values As a consequence he saw a struggle for power occurring between egoistic individuals and groups often resulting in revolutions wars and inter human strife In response to the one sided materialist view of reality the goal of Integralism is to unify all three forms of reality into an integral culture that harmoniously balances materialist and supersensory super rational orientations A solution to the contemporary moral confusion Sorokin argued can be found in the application of supra conscious intuition that would enable a human to know what is eternal in the ordinary and reach the transcendent an experience not accessible to the senses or the rational intellect alone The supra conscious is the source for reaching the supreme moral value creative unselfish altruism which can be shared by all cultures to produce peace and harmony in the world

Science under Siege Dick Houtman,Stef Aupers,Rudi Laermans,2021-05-12 Identifying scientism as religion s secular counterpart this collection studies contemporary contestations of the authority of science These controversies suggest that what we are witnessing today is not an increase in the authority of science at the cost of religion but a dual decline in the authorities of religion and science alike This entails an erosion of the legitimacy of universally binding truth claims be they religiously or scientifically informed Approaching the issue from a cultural sociological perspective and building on theories from the sociology of religion the volume unearths the cultural mechanisms that account for the headwind faced by contemporary science The empirical contributions highlight how the field of academic science has lost much of its former authority vis vis competing social realms how political and religious worldviews define particular research findings as favorites while dismissing others and how much of today s distrust of science is directed against scientific institutions and academic scientists rather than against science per se

Islam after Liberalism Faisal Devji, Zaheer Kazmi, 2017-12-01 Forged in the age of empire the relationship between Islam and liberalism has taken on a sense of urgency today when global conflicts are seen as pitting one against the other More than describing a civilizational fault line between the Muslim world and the West however this relationship also offers the potential for consensus and the possibility of moral and political engagement or compatibility The existence or extent of this correspondence tends to preoccupy academic as much as popular accounts of such a relationship This volume looks however to the way in which Muslim politics and society

are defined beyond and indeed after it Reappraising the first wave of Islamic liberalism during the nineteenth century the book describes the long and intertwined histories of these categories across a large geographical expanse By drawing upon the contributions of scholars from a variety of disciplines including philosophy theology sociology politics and history it explores how liberalism has been criticised and refashioned by Muslim thinkers and movements to assume a reality beyond the abstractions that define its compatibility with Islam

Connecting After Chaos Stephen F. Ostertag, 2023-07-11 A riveting portrait of how one community used the power of culture to restore their lives and social connections in the years after a devastating natural disaster Natural disasters and other such catastrophes typically attract large scale media attention and public concern in their immediate aftermath However rebuilding efforts can take years or even decades and communities are often left to repair physical and psychological damage on their own once public sympathy fades away Connecting After Chaos tells the story of how people restored their lives and society in the months and years after disaster focusing on how New Orleanians used social media to cope with trauma following Hurricane Katrina Stephen F Ostertag draws on almost a decade of research to create a vivid portrait of life in settling times a term he defines as a distinct social condition of prolonged insecurity and uncertainty after disasters He portrays this precarious state through the story of how a group of strangers began blogging in the wake of Katrina and how they used those blogs to put their lives and their city back together In the face of institutional failure weak authority figures and an abundance of chaos the people of New Orleans used social media to gain information foster camaraderie build support networks advocate for and against proposed policies and cope with trauma In the efforts of these bloggers Ostertag finds evidence of the capacity of this and other forms of cultural work to motivate guide and energize collective action aimed at weathering the constant instability of extended recovery periods Connecting After Chaos is both a compelling story of a community in crisis and a broader argument for the power of social media and cultural cooperation to create order when chaos abounds
