FM'99 - Formal Methods Jeannette M. Wing, Jim Woodcock, Jim Davies, 2003-07-31 Formal methods are coming of age Mathematical techniques and tools are now regarded as an important part of the development process in a wide range of industrial and governmental organisations A transfer of technology into the mainstream of systems development is slowly but surely taking place FM 99 the First World Congress on Formal Methods in the Development of Computing Systems is a result and a measure of this new found maturity It brings an impressive array of industrial and applications oriented papers that show how formal methods have been used to tackle real problems These proceedings are a record of the technical symposium of FM 99 also side the papers describing applications of formal methods you will find technical reports papers and abstracts detailing new advances in formal techniques from mathematical foundations to practical tools The World Congress is the successor to the four Formal Methods Europe Symposia which in turn succeeded the four VDM Europe Symposia This session reflects an increasing openness within the international community of researchers and practitioners papers were submitted covering a wide variety of formal methods and application areas The programme committee reflects the Congress's international nature with a membership of 84 leading researchers from 38 different countries The committee was divided into 19 tracks each with its own chair to oversee the reviewing process Our collective task was a difficult one there were 259 high quality submissions from 35 different countries **Formal Methods and Software Engineering** Zhiming Liu, Jifeng He, 2006-10-24 This book constitutes the refereed proceedings of the 8th International Conference on Formal Engineering Methods ICFEM 2006 held in Macao China in November 2006 The 38 revised full papers presented together with three keynote talks were carefully reviewed and selected from 108 submissions The papers address all current issues in formal methods and their applications in software engineering **Correct Models of Parallel Computing** S. Noguchi, Ota Masahiro, 1997 The 21st century will be the age of network computing Among the many key technologies in this field parallel computing and networking technology will play very important roles In this book emphasis is placed on networking and modeling parallel computing The topics cover parallel computing algorithms parallel software massively parallel computing systems and related applications Articles cover parallel computing networking and related applications to initiate discussions Since the appearance of Transputer chip T9000 C104 and standardizations of IEEE1355 Transputer systems seem to have opened a new interesting area of parallel computing networking and many practical applications **Theories And Experiences For Real-time System Development** Charles Rattray, Teodor Rus, 1995-02-14 Our understanding of real time systems is rapidly approaching a level of maturity which calls for a consolidation of our present knowledge and experience Particularly effective in influencing our understanding has been the conjoining of universal algebra with the theory and practice of real time system development This interplay between algebraic methodology and software technology AMAST for real time systems is the theme for this text Each chapter derived from papers presented at the all invitation 1st AMAST

International Workshop on Real Time Systems Iowa 1993 is written by leaders in their field The chapters form an intriguing mix of modeling specification verification and implementation of real real time systems They cover untimed and timed systems sequential concurrent and embedded real time processes integrated models using state machines temporal logic and algebraic data models real time CSP verification tools system design using temporal logic symbolic checking of discrete time models iterative symbolic approximation in timing verification and verification of audio protocols timed full LOTOS and timed LOTOS extensions LOTOS specification of telephone services and flight warning computers and performance analysis

Handbook of Finite State Based Models and Applications Jiacun Wang, 2016-04-19 Applicable to any problem that requires a finite number of solutions finite state based models also called finite state machines or finite state automata have found wide use in various areas of computer science and engineering Handbook of Finite State Based Models and Applications provides a complete collection of introductory materials on fini **IFM'99** Keijiro Araki, Andy Galloway, Kenji Taguchi, 2012-12-06 Formal methods have been established as the rigorous engineering methodology for the system development Applying formal methods to a large and complex system development often requires the modelling of different aspects of such a system For instance complex systems such as integrated avionics systems engine control software can involve functional and timing requirements that must be eventually implemented as executing code on a communicating distributed topology This book contains the papers presented at the First International Workshop on Integrated Formal Methods held at the University of York in June 1999 The conference provided a forum for the discussion of theoretical aspects of combing behavioural and state based formalisms and practical solutions to the industrial problems of this approach Algebraic Methodology and Software Technology (AMAST'93) Maurice Nivat, Charles Rattray, Teodor Rus, Giuseppe Scollo, 2012-12-06 The goal of the AMAST conferences is to foster algebraic methodology as a foundation for software technology and to show that this can lead to practical mathematical alternatives to the ad hoc approaches commonly used in software engineering and development The first two AMAST conferences held in May 1989 and May 1991 at the University of Iowa were well received and encouraged the regular organization of further AMAST conferences on a biennial schedule The third Conference on Algebraic Methodology and Software Technology was held in the campus of the University of Twente The Netherlands during the first week of Summer 1993 Nearly a hundred people from all continents attended the conference The largest interest received by the AMAST conference among the professionals extended to include the administration organizations as well AMAST 93 was opened by the Rector of the University of Twente followed by the Local Chairman Their opening addresses open this proceedings too The proceedings contains 8 invited papers and 32 selected communica tions The selection was very strict for 121 submissions were received Proceedings of the Estonian Academy of Sciences, Engineering , 1998-06 **4th Refinement Workshop** Joseph M. Morris, Roger C. Shaw, 2013-03-14 This volume contains the proceedings of the 4th Refinement Workshop which was organised by the British Computer Society

specialist group in Formal Aspects of Computing Science and held in Wolfson College Cambridge on 9 11 January 1991 The term refinement embraces the theory and practice of using formal methods for specifying and implementing hardware and software Most of the achievements to date in the field have been in developing the theoretical framework for mathematical approaches to programming and on the practical side in formally specifying software while more recently we have seen the development of practical approaches to deriving programs from their specifications The workshop gives a fair picture of the state of the art it presents new theories for reasoning about software and hardware and case studies in applying known theory to interesting small and medium scale problems We hope the book will be Of interest both to researchers in formal methods and to software engineers in industry who want to keep abreast of possible applications of formal methods in industry The programme consisted both of invited talks and refereed papers The invited speakers were Ib S0rensen Jean Raymond Abrial Donald MacKenzie Ralph Back Robert Milne Mike Read Mike Gordon and Robert Worden who gave the introductory talk This is the first refinement workshop that solicited papers for refereeing and despite a rather late call for papers the response was excellent
