Sleep, Death, and Rebirth Zvi Ish-Shalom, 2021-08-17 In the sixteenth century the famous kabbalist Isaac Luria transmitted a secret trove of highly complex mystical practices to a select group of students These meditations were designed to capitalize on sleep and death states in order to effectively split one's soul into multiple parts and which when properly performed permitted the adept to free oneself from the cycle of rebirth Through an in depth analysis of these contemplative practices within the broader context of Lurianic literature Zvi Ish Shalom guides us on a penetrating scholarly journey into a realm of mystical teachings and practices never before available in English illuminating a radically monistic vision of reality at the heart of Kabbalistic metaphysics and practice

Exploring Shakespeare S. Viswanathan, 2005 The book is a compilation of different erudite articles already published by the author in various scholarly journals and other edited volumes The essays are a study and an enquiry into a variety of dramaturgical methods and processes that contribute to the theatrical dynamics of the Shakespeare plays All the articles are concerned with the art of playmaking with an examination of the tools and devices used by Shakespeare which contribute to the dramatic life of the

play but also articulate the moral and sociocultural ideas of the time There has not been much critical work in this area before and the book is one of the first of its kind The book unravels the function and effect of many poetic rhetorical topological visual and theatrical devices which Shakespeare exploits in his plays for a dramatic effect Together the essays present an idea of the multidimensional totality of theatre language and communication which Shakespeare achieves through a masterful orchestration of dramatic resources The book will be of immense value to students scholars and researchers in the fields of theatre techniques and art literature in general and drama in particular Sleep Works Sebastian P.

Klinger,2025-01-07 An exploration of sleep at the intersection of literature science and pharmacology in the early twentieth century At the turn of the twentieth century sleep began to be seen not merely as a passive state but as an active dynamic process crucial to our understanding of consciousness and identity In Sleep Works cultural historian and literary scholar Sebastian P Klinger explores the intriguing connections between scientific inquiry and literary expression during an era when sleep was both a scientific mystery and a cultural fascination Scientists physicians and pharmaceutical companies were at the forefront of this newfound fascination with sleep some researchers distinguished sleep from related states such as fatigue and hypnosis while others investigated sleep disorders and developed treatments for insomnia Meanwhile literary giants like Franz Kafka and Marcel Proust grappled with their own sleep disturbances and channeled these experiences into their writing Through the lens of their discoveries Klinger reveals the broader implications of sleep for concepts of selfhood and agency Tracing the emergence of interdisciplinary sleep science and the cultural production of sleep through literature Sleep Works weaves together literary analysis historical context and research in the archives of the pharmaceutical industry to provide a comprehensive and compelling account of how sleep has been understood represented and experienced in the modern era **An Inquiry Into the Nature of Sleep and Death** ,2020-01-24 **A Study of Death** Henry Mills
