

SOCIAL EXCHANGE THEORY

Social exchange theory postulates that people form a relationship through cost-benefit analysis.

COMPONENTS

According to social exchange theory, every relationship has the following components:

1. **Costs** – the elements of a relationship which have a negative value to a person.
2. **Rewards** – the elements of a relationship which have a positive value to a person.

EXAMPLES

1. Highest Reward

Costs being equal, an individual will choose the alternative from which they expect to receive the highest reward.

2. Lowest Cost

Rewards being equal, an individual will choose the alternative from which they expect the lowest cost.

Social Exchange Theory Its Structure And Influence In Social Psychology:

Social Exchange Theory John K. Chadwick-Jones,1976 The Social Psychology of Groups John W. Thibaut,2017-09-29

This landmark theory of interpersonal relations and group functioning argues that the starting point for understanding social behavior is the analysis of dyadic interdependence. Such an analysis portrays the ways in which the separate and joint actions of two persons affect the quality of their lives and the survival of their relationship. The authors focus on patterns of interdependence and on the assumption that these patterns play an important causal role in the processes, roles and norms of relationships. This powerful theory has many applications in all the social sciences including the study of social and moral norms, close pair relationships, conflicts of interest and cognitive disputes, social orientations, the social evolution of economic prosperity and leadership in groups and personal relationships.

Social Exchange in Developing Relationships Robert L. Burgess, Ted L. Huston, 2013-09-11

Social Exchange in Developing Relationships is a collection of papers that deals with the systematic study of the development of relationships. The papers discuss several theoretical perspectives such as evolutionary theory, personality theory, cognitive developmental theory, equity theory, role theory and attribution theory. One paper discusses romantic relationships, the evolution of first acquaintance to close or intimate commitment. Another paper presents the hypothesis that the factors causing a relationship to begin will also probably steer intermediate cognitive processes eventually influencing the nature of the relationship. Commitment requires specific concepts such as input levels contributed to the relationship, duration of these inputs and their consistency of occurrence. The equity theory suggests that equity principles determine the selection of one's mate and how they the partners will get along in the future. One paper analyzes the dynamic theories of social relationships and the resulting research strategies that the conceptualization of a parameter of a social relationship can affect the choice of data collection techniques and other matters. Sociologists, psychologists, historians, students and academicians doing sociological research can benefit greatly from this collection.

Social Exchange Kenneth Gergen, 2012-12-06

INTRODUCTION In developing scientific theory there is perhaps nothing more propitious than a compelling metaphor. If the metaphor is rich in imagery, complexly differentiated, emotionally evocative and vitally wedded to the cultural lore, the theory to which it gives rise may enjoy a long and vigorous life. If the metaphor is sufficiently powerful, the theory may even be sustained in independence of systematic empirical support. Role theory is likely to remain prosperous so long as there is a thriving theater. Decision theory experienced a dramatic rejuvenation with the development of the electronic computer and in spite of its archaic construction, Jungian theory will prevail so long as ancient myths and symbols continue to haunt us. (Smith 1978)

From this standpoint, the development of social exchange theory is hardly surprising. Experience with the marketplace is extensive in society; its images are both complex and richly evocative; its challenges are often exciting and its lessons sometimes painful. It is thus both intellectually and emotionally invigorating to consider the social arena in all its diversity as an extended market in which each individual

seeks to maximize profits The economic metaphor is hardly new to the social sciences The recent intellectual roots of contemporary exchange theory can be traced to the works of Claude Levi Strauss Marcel Mauss Karl Marx and B

Herbert Mead Peter Hamilton,1992 **Handbook of Clinical Health Psychology** C. Green,R. Meagher,T.

Millon,2012-12-06 We seek to throw down the gauntlet with this handbook challenging the hegemony of the behavioral medicine approach to the psychological study and treatment of the physically ill This volume is not another in that growing surfeit of texts that pledge allegiance to the doctrinaire purity of behavioristic thinking or conceptualize their subject in accord with the sterility of medical models Diseases are not our focus nor is the narrow band of behavioral assessment and therapy methodologies Rather we have sought to redefine this amorphous yet burgeoning field so as to place it squarely within the province of a broadly based psychology specifically the emerging substantive discipline of health psychology and the well established professionalism and diverse technologies of clinical psychology The handbook's title Clinical Health Psychology reflects this reorientation explicitly and Chapter 1 addresses its themes and provides its justifications more fully In the process of developing a relevant and comprehensive health assessment tool the editors were struck by the failure of clinical psychologists to avail themselves of the rich vein of materials that comprise the psychosocial world of the physically ill Perhaps more dismaying was the observation that this field was being mined less than optimally by physicians and nonclinical psychologists **Technological and Industrial Applications Associated With Industry 4.0** Alberto

Ochoa-Zezzatti,Diego Oliva,Aboul Ella Hassanien,2021-07-01 This book includes chapters related to the analysis of cultural differences as a tool to enrich tacit knowledge and make processes more efficient the factors that influence job satisfaction and the value of social capital as a competitive strategy to achieve productivity and competitiveness of organizations in addition to research of the utmost importance to discover the facets of the diamond with respect to the symbolic capital of the organizations where Generation Z will work and how it will discover the best time to establish an innovation ecosystem that will influence its work trajectory Industry 4.0 requires a major paradigm shift since human capital is a source of competitive advantage Being competitive enables to a company a region a society or a country the power to advance in different areas contributing to the benefit of a social group therefore and organizations need to make efforts that lead to adding value and generate a competitive advantage Industrial applications based on artificial intelligence can change our lives in just one generation The chapters in this book show progress and challenges related to real world applications as well as the need to strengthen human capital to achieve systemic and comprehensive competitiveness required in the XXI century

A Social Exchange Theory Approach to Web-based Data Collection as a Part of CRM Effort Harshavardhan

Gangadharbatla,2002 **Criminology Theory** Frank Williams III,Marilyn McShane,2015-03-02 This highly acclaimed

criminology text presents an up to date review of rational choice theories including deterrence shaming and routine activities
 It also incorporates current examples of deterrence research regarding domestic violence drunk driving and capital
 punishment and features thought provoking discussion of the relativity of crime The authors explore the crime problem its
 context and causes of crime The organization of the text reflects the fact that the etiology of crime must be at the heart of
 criminology It examines contemporary efforts to redefine crime by focusing on family violence hate crimes white collar
 misconduct with violent consequences and other forms of human behavior often neglected by criminologists Extensive
 discussion of evolving laws is included and while the prevalence of the scientific method in the field of criminology is
 highlighted the impact of ideology on explanations of crime is the cornerstone of the book The Divine-Human
Relationship in Romans 1-8 in the Light of Interdependence Theory Yoonjong Kim,2020-11-12 Yoonjong Kim analyses the
 divine human relationship in Paul s theology focusing on Paul s portrayal of the relationship in Romans 1 8 Kim stresses that
 previous studies of this relationship have not paid sufficient attention to the fact that it is not static but rather exhibits
 progression and development towards a goal To address the significance of the human agent s role in the relationship Kim
 employs a social psychological theory interdependence theory offering a consistent analytic framework for diagnosing the
 interactions in a dyadic relationship in terms of the dependency created by each partner s expectations of outcomes Kim
 explores several key stages of the divine human relationship and the direction in which the relationship develops throughout
 Romans 1 8 in order to highlight the significance of the human partners in the course of the development He focuses in
 particular on betrayal 1 18 3 20 restoration 3 21 26 5 1 11 the oppressive relationship with Sin 5 12 8 11 and the investment
 for the future 8 12 39 and concludes that although the foundation of the relationship rests on God s initiative the divine
 outworking guides the relationship so that it facilitates mutual participation of the human partners in the restoration and
 development of the relationship toward the ultimate goal **Relating in Psychotherapy** John Birtchnell,2013-05-13 In John
 Birtchnell s last book *How Humans Relate* he proposed a new theory as the basis for a science of relating Relating in
 Psychotherapy explains how the relevance of this theory relates to the practice of psychotherapy The theory cuts across all
 schools of therapy and is a way of describing each school in terms of relating in both the client and the therapist The theory
 is constructed around two major axes a horizontal one concerning the degree to which we need to become involved with or
 separated from others and a vertical one concerning the degree to which we choose to exercise power over others or permit
 others to exercise their power over us With numerous clinical examples John Birtchnell explains how we need to be competet
 in all four relating positions close distant upper and lower and argues that people who seek therapy usually lack competence
 in one or more of them but through the course of therapy their relating capabilities can be improved Relating in
 Psychotherapy can have applications in psychotherapy and in couple and family therapy and will be an invaluable resource
 for therapists counsellors and other mental health professionals *Political Exchange and Public Policy* Prakash

Sarangi,1990 Social Influence Network Theory Noah E. Friedkin,Eugene C. Johnsen,2011-04-18 Social influence network theory presents a mathematical formalization of the social process of attitude changes that unfolds in a social network of interpersonal influences This book brings the theory to bear on lines of research in the domain of small group dynamics concerned with changes of group members positions on an issue including the formation of consensus and of settled disagreement via endogenous interpersonal influences in which group members are responding to the displayed positions of the members of the group Social influence network theory advances a dynamic social cognition mechanism in which individuals are weighing and combining their own and others positions on an issue in the revision of their own positions The influence network construct of the theory is the social structure of the endogenous interpersonal influences that are involved in this mechanism With this theory the authors seek to lay the foundation for a better formal integration of classical and current lines of work on small groups in psychological and sociological social psychology
