Trading Environments Gordon M. Winder,Andreas Dix,2015-12-07 This volume examines dynamic interactions between the calculative and speculative practices of commerce and the fruitfulness variability materiality liveliness and risks of nature It does so in diverse environments caught up in new trading relationships forged on and through frontiers for agriculture forestry mining and fishing Historical resource frontiers are understood in terms of

commercial knowledge systems organized as projects to transform landscapes and environments The book asks how were environments traded and with what environmental and landscape consequences How have environments been engineered standardized and transformed within past trading systems What have been the successes and failures of economic knowledge in dealing with resource production in complex environments It considers cases from northern Europe North and South America Central Africa and New Zealand in the period between 1750 and 1990 and the contributors reflect on the effects of transnational commodity chains competing economic knowledge systems environmental ignorance and learning and resource exploitation In each case they identify tensions blind spots and environmental learning that plagued commercial projects on frontiers

The Politics of the Artificial Victor Margolin, 2018-01-11 Emerging from the world of commercial art and product styling design has now become completely integrated into human life Its marks are all around us from the chairs we sit on to the Web sites on our computer screens One of the pioneers of design studies and still one of its most distinguished practitioners Victor Margolin here offers a timely meditation on design and its study at the turn of the millennium and charts new directions for the future development of both fields Divided into sections on the practice and study of design the essays in *The Politics of the Artificial* cover such topics as design history design research design as a political tool sustainable design and the problems of design's relation to advanced technologies Margolin also examines the work of key practitioners such as the matrix designer Ken Isaacs Throughout the book Margolin demonstrates the underlying connections between the many ways of reflecting on and practicing design He argues for the creation of an international interdisciplinary field of design research and proposes a new ethical agenda for designers and researchers that encompasses the responsibility to users the problems of sustainability and the complicated questions of how to set boundaries for applying advanced technology to solve the problems of human life Opinionated and erudite Victor Margolin's *The Politics of the Artificial* breaks fresh ground in its call for a new approach to design research and practice Designers engineers architects anthropologists sociologists and historians will all benefit from its insights

Dwelling in Resistance Chelsea Schelly, 2017-08-02 Most Americans take for granted much of what is materially involved in the daily rituals of dwelling In *Dwelling in Resistance* Chelsea Schelly examines four alternative U S communities The Farm Twin Oaks Dancing Rabbit and Earthships where electricity water heat waste food and transportation practices differ markedly from those of the vast majority of Americans Schelly portrays a wide range of residential living alternatives utilizing renewable small scale decentralized technologies These technologies considerably change how individuals and communities interact with the material world their natural environment and one another Using in depth interviews and compelling ethnographic observations the book offers an insightful look at different communities practices and principles and their successful endeavors in sustainability and self sufficiency

Crossing Boundaries, Building Bridges Annie Canel, Ruth Oldenziel, 2005-08-08 Women engineers have been in the public limelight for decades yet we have surprisingly little historically grounded understanding of women in this field This book considers the

mechanisms of exclusion and inclusion of them **Artificial Parts, Practical Lives** Katherine Ott, David Serlin, Stephen Mihm, 2002 From the wooden teeth of George Washington to the Bly prosthesis popular in the 1860s and boasting easy uniform motions of the limb to today's lifelike approximations prosthetic devices reveal the extent to which the evolution and design of technologies of the body are intertwined with both the practical and subjective needs of human beings The peculiar history of prosthetic devices sheds light on the relationship between technological change and the civilizing process of modernity and analyzes the concrete materials of prosthetics which carry with them ideologies of body ideals body politics and culture Simultaneously critiquing historicizing and theorizing prosthetics *Artificial Parts Practical Lives* lays out a balanced and complex picture of its subject neither vilifying nor celebrating the merger of flesh and machine A *Companion to the Philosophy of Technology* Jan Kyrre Berg Olsen, Stig Andur Pedersen, Vincent F. Hendricks, 2012-10-01 Drawing on essays from leading international and multi disciplinary scholars *A Companion to the Philosophy of Technology* is the first comprehensive and authoritative reference source to cover the key issues of technology's impact on society and our lives Presents the first complete authoritative reference work in the field Organized thematically for use both as a full introduction to the field or an encyclopedic reference Draws on original essays from leading interdisciplinary scholars Features the most up to date and cutting edge research in the interdisciplinary fields of philosophy technology and their broader intellectual environments **The Making of Home** Judith Flanders, 2014-10-01 The idea that home is a special place a separate place a place where we can be our true selves is so obvious to us today that we barely pause to think about it But as Judith Flanders shows in this revealing book home is a relatively new concept When in 1900 Dorothy assured the citizens of Oz that There is no place like home she was expressing a view that was a culmination of 300 years of economic physical and emotional change In *The Making of Home* Flanders traces the evolution of the house across northern Europe and America from the 16th to the early 20th century and paints a striking picture of how the homes we know today differ from homes through history The transformation of houses into homes she argues was not a private matter but an essential ingredient in the rise of capitalism and the birth of the Industrial Revolution Without home the modern world as we know it would not exist and as Flanders charts the development of ordinary household objects from cutlery chairs and curtains to fitted kitchens plumbing and windows she also peels back the myths that surround some of our most basic assumptions including our entire notion of what it is that makes a family As full of fascinating detail as her previous bestsellers *The Making of Home* is also a book teeming with original and provocative ideas
