Southeast Asia Aris Ananta, Richard R. Globalization and Democratization in Asia Kristina Jonsson, Catarina Kinnvall, 2003-09-02 Globalization is a defining feature of our times covering everything from economic and political issues to the spread of American culture Its status is controversial however with some viewing it as leading to greater development for all while others see it as a threat to national cultures and democratic political life This book shows how simplified such binary views are and examines how various globalizing forces have affected Asian societies It discusses the relationship between globalization identity and democratic developments in Asia both theoretically and empirically and aims to understand how economic political and social forces interact and are mutually reinforced in Asian societies **Asia-Pacific Financial Deregulation** Gordon De Brouwer, Wisarn Pupphavesa, 2002-03-11 Recent events in East Asia have highlighted the risks of volatility and contagion in a

financially integrated world Countries in the region had been at the forefront of the movement towards increased integration but the crisis that struck Thailand in July 1997 and the rapidity with which it spread to other East Asian nations suggested that all was not well Weaknesses in domestic financial intermediation poor corporate governance and deficient government responses to large capital inflows all played a role in the build up of vulnerability Asia Pacific Financial Deregulation provides an insight into financial liberalisation and structural reform in the region generally and as illustrated by a number of countries

Tongzon, 2005 Institutional Change in Southeast Asia examines the institutional changes taking place in and challenges facing the region since 1997 The book focuses on determinants to the adjustments and on implementations of the reforms It also describes various differences in the reform process between countries in the region Southeast Asia's economic development over the last decades has been impressive Most of the region achieved consistently high growth rates accompanied by significant structural transformation and industrialization poverty alleviation and improvements in their overall standard of living as indicated by such social indicators as greater longevity more widespread delivery of basic education and lower infant mortality rates However the crisis that struck Southeast Asia in 1997 had severe economic social and political consequences in the region It also threw into doubt the future economic prosperity of the countries in Southeast Asia and raised intriguing questions about the quality of their institutions and their approach to economic development Sjöholm and Tongzon argue that the economies of Southeast Asia need to reform their institutions if the previous rapid development is to continue The institutional weaknesses have been addressed to different degrees and with different success in the affected countries Against the backdrop of Southeast Asia's importance in the world economy it is hardly possible to overestimate the need to understand this process of change
