Social Polarization In Postindustrial Metropolises:

Social Polarization in Post-Industrial Metropolises John O'Loughlin, Jürgen Friedrichs, 2015-08-17 No detailed description available for Social Polarization in Post Industrial Metropolises The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding Henri Lefebvre and the Theory of the Production of Space Christian Schmid, 2022-11-29 Henri Lefebvre s was the major theorist of space and of the urban This is the definitive book on Lefebvre Shortlisted for the Deutscher Memorial Prize 2023 This book presents an encompassing detailed and thorough overview and reconstruction of Lefebvre s theory of space and of the urban Henri Lefebvre belongs to the generation of the great French intellectuals and philosophers together with his contemporaries Michel Foucault and Jean Paul Sartre His theory has experienced a remarkable revival over the last two decades and is discussed and applied today in many disciplines in humanities and social sciences particularly in urban studies geography urban sociology urban anthropology architecture and planning Lefebvre together with David Harvey is one of the leading and most read theoreticians in these fields This book explains in an accessible way the theoretical and epistemological context of this work in French philosophy and in the German dialectic Hegel Marx and Nietzsche and reconstructs in detail the historical development of its different elements It also gives an overview on the receptions of Lefebvre and discusses a wide range of applications of this theory in many research fields such as urban and regional development urbanization urbanity social space and everyday life **Readings in Urban Theory** Susan S. Fainstein, Scott Campbell, 2011-03-07 Updated with a majority of new readings the Third Edition of Readings in Urban Theory expands its focus to present the most recent developments in urban and regional theories and policies in a globalized world Around 75% of the readings included are new for the third edition Unifies readings by an orientation toward political economy and normative themes of social justice

Expands the focus on international planning including globalization and theories of development Addresses the full range of core urban theory so as to remain the primary text in courses *Greening Post-Industrial Cities* Corina

McKendry, 2017-09-22 City greening has been heralded for contributing to environmental governance and critiqued for exacerbating displacement and inequality Bringing these two disparate analyses into conversation this book offers a comparative understanding of how tensions between growth environmental protection and social equity are playing out in practice Examining Chicago USA Birmingham UK and Vancouver Canada McKendry argues that city greening efforts were closely connected to processes of post industrial branding in the neoliberal economy While this brought some benefits concerns about the unequal distribution of these benefits and greening s limited environmental impact challenged its legitimacy In response city leaders have moved toward initiatives that strive to better address environmental effectiveness and social equity while still spurring growth Through an analysis that highlights how different varieties of liberal environmentalism are manifested in each case this book illustrates that cities though constrained by inconsistent political will and broader political and economic contexts are making contributions to more effective socially just environmental governance Both critical and hopeful McKendry s work will interest scholars of city greening environmental governance and comparative urban politics **Introducing Human Geographies, Second Edition** Paul Cloke, Philip Crang, Mark

Goodwin, 2013-01-11 Introducing Human Geographies is a comprehensive stimulating and innovative introduction to human geography This second edition has been thoroughly revised and updated to build upon the success of the acclaimed first edition Now in full colour and with sixteen new chapters discussion points and glossary definitions in the margin it is even more accessible Part one discusses the principal ideas through which human geographers understand and shape their subject Part two examines each of the main sub fields cultural geography development geography economic geography environmental geography historical geography political geography rural geography social geography urban geography Part three demonstrates how different thematic interests are combined in cutting edge human geographical debates Introducing Human Geographies continues to be the essential textbook for first year undergraduate geography students taking introductory courses in human geography **Social Polarization in Post-industrial Metropolises** John Vianney

O'Loughlin, Jürgen Friedrichs, 1996 **Remaking Post-Industrial Cities** Donald K. Carter, 2016-03-02 Remaking Post Industrial Cities Lessons from North America and Europe examines the transformation of post industrial cities after the precipitous collapse of big industry in the 1980s on both sides of the Atlantic presenting a holistic approach to restoring post industrial cities Developed from the influential 2013 Remaking Cities Congress conference chair Donald K Carter brings together ten in depth case studies of cities across North America and Europe documenting their recovery from 1985 to 2015 Each chapter discusses the history of the city its transformation and prospects for the future The cases cross cut these themes with issues crucial to the resilience of post industrial cities including sustainability doing more with less public

engagement and equity social economic and environmental the most important issue cities face today and for the foreseeable future This book provides essential lessons learned from the mistakes and successes of these cities and is an invaluable resource for practitioners and students of planning urban design urban redevelopment economic development and public and social policy International Handbook of Globalization and World Cities Ben Derudder,2012-02-01 This Handbook offers an unrivalled overview of current research into how globalization is affecting the external relations and internal structures of major cities in the world By treating cities at a global scale it focuses on the stretching of urban functions beyond specific place locations without losing sight of the multiple divisions in contemporary world cities The book firmly bases city networks in their historical context critically discusses contemporary concepts and key empirical measures and analyses major issues relating to world city infrastructures economies governance and divisions The variety of urban outcomes in contemporary globalization is explored through detailed case studies Edited by leading scholars of the Globalization and World Cities GaWC Research Network and written by over 60 experts in the field the Handbook is a unique resource for students researchers and academics in urban and globalization studies as well as for city professionals in planning and policy **Urban Sores** Hans Skifter Andersen,2019-01-15 This title was first published in 2003 Most European cities have experienced problems in certain neighbourhoods that are termed deprived or excluded Traditionally these were found in the oldest urban areas with lowest quality housing but since the 1980s such areas have emerged in housing estates built around the cities edges These neighbourhoods are marked by visible physical and social problems that disfigure the otherwise pleasant urban landscape and can be seen as urban sores This engaging and thought provoking book provides a deeper understanding of why urban decay and deprived neighbourhoods appear in certain parts of cities as well as how they affect residents and cities in general Drawing on in depth empirical research from Denmark it compares this with other studies from Europe and the United States The author combines theories and methodologies from the fields of geography on segregation economics on processes of urban decay and social research on social exclusion and deprived neighbourhoods to provide original illuminating and invaluable insights **Urban Geography** Michael Pacione,2001 This text is an introduction to the study of towns and cities The book synthesizes a wealth of material to provide a comprehensive introduction for students of urban geography drawing on a rich blend of theoretical and empirical information to advance their knowledge of the city For the first time in the history of humankind urban dwellers outnumber rural residents and this trend is destined to continue Urban places towns and cities are of fundamental importance for the distribution of population within countries in the organization of economic production distribution and exchange in the structuring of social reproduction and cultural life and in the allocation and exercise of power Even those living beyond the administrative or functional boundaries of a town or city will have their lifestyle influenced to some degree by a nearby or distant city *How to Build a Global City* Michele Acuto,2022-01-15 In *How to Build a Global City* Michele Acuto considers the rise of a new generation of so called global cities Singapore Sydney

and Dubai and the power that this concept had in their ascent in order to analyze the general relationship between global city theory and its urban public policy practice The global city is often invoked in theory and practice as an ideal model of development and a logic of internationalization for cities the world over But the global city also creates deep social polarization and challenges how much local planning can achieve in a world economy Presenting a unique elite ethnography in Singapore Sydney and Dubai Acuto discusses the global urban discourses aspirations and strategies vital to the planning and management of such metropolitan growth The global city he shows is not one single idea but a complex of ways to imagine a place to be global and aspirations to make it so often deeply steeped in politics His resulting book is a call to reconcile proponents and critics of the global city toward a more explicit engagement with the politics of this global urban imagination

Cities of Europe Yuri Kazepov, 2011-07-15 *Cities of Europe* is a unique combination of book and CD ROM examining the effects of recent socio economic transformations on western European cities A unique combination of book and CD ROM examining the effects of recent socio economic transformations on western European cities Focuses on the interplay between segregation social exclusion and governance issues in these cities Takes a comparative approach by highlighting the specifics of European cities vis vis other urban contexts and analysing the intra European differences The CD ROM features a series of 2 000 photographs from seventeen cities Amsterdam Antwerp Barcelona Berlin Birmingham Brussels Bucharest Helsinki London Milan Naples New York Paris Rotterdam Tirana Turin and Utrecht Also features 126 thematic maps interviews with established scholars and literature reviews The book and the CD ROM are linked through an extensive cross referencing system

Migrants to the Metropolis Marie Price, Lisa Benton-Short, 2008-06-27 Immigration today touches the lives and economies of more people and places than ever before Yet the places that are disproportionately affected by immigrant flows are not countries but cities This remarkable collection examines contemporary global immigration trends and their profound effect on specific host cities The book focuses not only on cities with long established diverse populations such as New York Toronto and Sydney but also on less known gateway cities such as Birmingham UK Marseille and the emerging gateways of Johannesburg Washington D C and Dublin The essays gathered here provide a global portrait of accelerating worldwide immigration driven by income differentials social networks and various state policies that recruit skilled and unskilled laborers Gateway cities vary in form and function but many are hyperdiverse globally linked through transnational networks and often increasingly segregated spaces Offering penetrating analysis by the leading scholars in the field *Migrants to the Metropolis* redirects the global narrative surrounding migration away from states and borders and into cities where the vast majority of economic migrants settle

Amsterdam Human Capital Sako Musterd, Willem Salet, 2025-10-01 The familiar shape of western cities is changing dramatically For long times the urban core was taken for granted as the focal point for international contacts and day to day activities in the region Currently the urban scope is transforming into multi centred forms at metropolitan scale The transition is not just a matter of spatial form it is

reflecting social economic and cultural processes The question is what new identities may develop in such changing historical conditions of space and place This book is a first attempt to analyse the process of urban transformation in an integral way The focus is on the region of Amsterdam All contributions are written by senior researchers of the Amsterdam studycentre for the Metropolitan Environment AME AME is the interdisciplinary urban research institute of the Universiteit van Amsterdam As the urban research institute at the Universiteit van Amsterdam the Amsterdam studycentre for the Metropolitan Environment AME analyses the economic social and cultural aspects of this spatial transformation usually in international comparative research All contributions to this book are written by senior researchers of AME in an attempt to analyse in an integral way the present and future dilemmas out of the historical growth paths of this dynamic city

Healthy Cities Namir Khan, Willem H. Vanderburg, 2001 Modern cities can be designed to constitute a more supportive environment for a great many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches Healthy Cities focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes Sustainable Energy and Sustainable Production is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable **Residential**

Segregation in Comparative Perspective Kuniko Fujita, 2016-04-08 We know very little about variations in urban class and ethnic segregation among nations and even less about differences among cities in different regions of the world Spatial organization places and neighbourhoods matters significantly in some cities in reproducing class relations and ethno racial hierarchies but may be much less important in others The degree and the impact of segregation depend upon contextual diversity By emphasizing the importance of contextual diversity in the study of urban residential segregation the book questions currently popular urban theories such as global city neoliberal urbanism and gentrification These theories tend to dissociate cities from their national and regional context and thus ignore their history culture politics and institutions The aim of this book is to introduce the significantly different urban experiences in social and spatial segregation patterns and rationales which exist among the world's regions and to demonstrate that urban theory needs to draw systematically upon this wide range of experiences The cities selected Athens Beijing Budapest Copenhagen Hong Kong Madrid Paris S o Paulo Taipei and Tokyo were chosen in order to achieve geographical spread to maximise the diversity of types of socioeconomic regulation This volume is thus able to avoid the interpretative limitations and misconstructions resulting from universalizing the Anglo American experience International Encyclopedia of Human Geography , 2009-07-16 The International

Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of
