Public Opinion Polling in Mid-Century British Literature Megan Faragher,2021-08-19 Whereas modernist writers lauded the consecrated realm of subjective interiority mid century writers were engrossed by the materialization of the collective mind An obsession with group thinking was fuelled by the establishment of academic sociology and the ubiquitous infiltration of public opinion research into a bevy of cultural and governmental institutions As authors witnessed the materialization of the once opaque realm of public consciousness for the first time their writings imagined the potentialities of such technologies for the body politic Polling opened new horizons for mass politics Public Opinion Polling in Mid Century British Literature traces this most crucial period of group psychology s evolution the mid century when psychography a term originating in Victorian spiritualism transformed into a scientific praxis The imbrication of British writers within a growing institutionalized public opinion infrastructure bolstered an aesthetic turn towards collectivity and an interest in the political ramifications of meta psychological discourse Examining works by H G Wells Evelyn Waugh Val Gielgud Olaf Stapledon Virginia Woolf Naomi Mitchison Celia Fremlin Cecil Day Lewis and Elizabeth Bowen this book utilizes extensive archival research to trace the embeddedness of writers within public opinion institutions providing a fresh explanation for the new material turn so often associated with interwar writing

social identity research in a variety of real life social contexts Attracted to Conflict: Dynamic Foundations of Destructive Social Relations Robin R. Vallacher, Peter T. Coleman, Andrzej Nowak, Lan Bui-Wrzosinska, Larry Liebovitch, Katharina Kugler, Andrea Bartoli, 2014-07-08 Conflict is inherent in virtually every aspect of human relations from sport to parliamentary democracy from fashion in the arts to paradigmatic challenges in the sciences and from economic activity to intimate relationships Yet it can become among the most serious social problems humans face when it loses its constructive features and becomes protracted over time with no obvious means of resolution This book addresses the subject of intractable social conflict from a new vantage point Here these types of conflict represent self organizing phenomena emerging quite naturally from the ongoing dynamics in human interaction at any scale from the interpersonal to the international Using the universal language and computational framework of nonlinear dynamical systems theory in combination with recent insights from social psychology intractable conflict is understood as a system locked in special attractor states that constrain the thoughts and actions of the parties to the conflict The emergence and maintenance of attractors for conflict can be described by means of formal models that incorporate the results of computer simulations experiments field research and archival analyses Multi disciplinary research reflecting these approaches provides encouraging support for the dynamical systems perspective Importantly this text presents new views on conflict resolution In contrast to traditional approaches that tend to focus on basic short lived cause effect relations the dynamical perspective emphasizes the temporal patterns and potential for emergence in destructive relations Attractor deconstruction entails restoring complexity to a conflict scenario by isolating elements or changing the feedback loops among them The creation of a latent attractor trades on the tendency toward multi stability in dynamical systems and entails the consolidation of incongruent positive elements into a coherent structure In the bifurcation scenario factors are identified that can change the number and types of attractors in a conflict scenario The implementation of these strategies may hold the key to unlocking intractable conflict creating the potential for constructive social relations *Statistics of Land-grant Colleges and Universities* United States. Office of Education, 1962 *Evil in the Modern World* Laura Dryjanska, Giorgio Pacifici, 2022-03-10 This interesting volume focuses on a set of phenomena which increasingly alarm the political world and public opinion from the more obvious ones like torture disease human trafficking abuse genocide displacement to more subtle forms found in sports technology and law It looks at how and why these phenomena are universally condemned and could be considered to threaten the very foundations of modern democracy yet continue to be tolerated The volume therefore goes beyond what Hannah Arendt has called the banality of evil and discusses the presence of condemned and heinous practices in society as fluid and chaotic but as non trivial capable of great transmutations through various epochs Practices and actions considered as evil manifest in situations where individuals or groups hold power or seize power and the contributions in this volume explore the close relation between power and evil The volume draws upon sociology psychology

cultural studies political science as well as philosophy theology anthropology and neurology of the individual and of the group to provide a comprehensive understanding of the multiple facets of evil in the contemporary world *Cooperation in Modern Society* Anders Biel, Mark Snyder, Tom R. Tyler, Mark Van Vugt, 2012-12-06 Why do so many people volunteer to help others in need in society today What makes people give up the convenience of driving their car to benefit a better environment And why are citizens in general quite prepared to pay taxes to ensure adequate health care and support for the elderly and unemployed These are examples of a more fundamental question addressed in this book why do people cooperate for the welfare of their community state or organization *Cooperation in Modern Society* is a unique collection of contributions from internationally reputed scholars across the social sciences **The Oxford Handbook of Personality and Social Psychology** Kay Deaux, Mark Snyder, 2018-10-30 The second edition of *The Oxford Handbook of Personality and Social Psychology* uniquely integrates personality and social psychology perspectives together in one volume Contributors explore historical conceptual methodological and empirical foundations that link the two fields together Further this new edition offers readers comprehensive coverage of new and emerging areas of theory research and application and assesses the fields growth and development since the publication of the first edition *The Study of Society (RLE Social Theory)* F.C. Bartlett, 2014-08-21 There is today widespread recognition of the fact that the future of human civilization depends to a high degree upon Man s capacity to understand the forces and factors which control his own behaviour Such understanding must be achieved not only as regards individual conduct but equally as regards the mass phenomena resulting from group contacts which are becoming increasingly intimate and influential Until this present volume nowhere have the three sciences of sociology psychology and social anthropology been properly mobilized to deal with the social problems which yearly grow more pressing The essays in this book aim to address this *Social Isolation in Modern Society* Roelof Hortulanus, Anja Machielse, Ludwien Meeuwesen, 2006-06-28 Social isolation has serious repercussions for people and communities across the globe yet knowledge about this phenomenon has remained rather limited until now The first multidisciplinary study to explore this issue *Social Isolation in Modern Society* integrates relevant research traditions in the social sciences and brings together sociological theories of social networks and psychological theories of feelings of loneliness Both traditions are embedded in research with the results of a large scale international study being used to describe the extent nature and divergent manifestations of social isolation With a new approach to social inequality this empirically based study includes concrete policy recommendations and presents a clear insight into personal social and socio economic causes and the consequences of social isolation
