H. R. Rivers, 2017-09-20 In applying psychology to the field of politics the eminent British anthropologist and psychologist W H R Rivers deals with social or collective psychology rather than with the psychology of the individual This choice presents a number of problems These include the relation between individual and collective psychology the concept of a collective or group mind and the question of how far society can be regarded as an organism The choice also presents the need to explain the fact that when a number of individuals act together the product of their combined activity is not the same as what might have emerged from the separate activity of individuals Rivers belief in the political process prompted him to deliver the lectures on psychological theory that are printed in this volume Three other addresses are also included in this volume one on socialism and human nature another on education and mental hygiene and a lecture on the aims of ethnography Rivers considered the relation between psychology and sociology putting forward the position that the formulation of an adequate science of social psychology lies in the observation of social conduct including not merely the social conduct of everyday life but still those forms of it which are subsumed under the headings of religion economics and politics as well as the social institution of language The social behavior of mankind is capable of being studied as a methodological principle independently of the psychological basis of behavior **Political Psychology** Cristian Tileagă, 2013-10-03 This book emphasises the theoretical and methodological diversity of the field of political psychology as a means for understanding political behaviour **Explorations in Political Psychology** Shanto Iyengar, William James McGuire, 1993 Mapping the territory where political science and psychology intersect Explorations in Political Psychology offers a broad overview of the the field of political psychology from its historical evolution as an area of inquiry to the rich

M. van Lange, 2014-05-29 Powerful societal leaders such as politicians and Chief Executives are frequently met with substantial distrust by the public But why are people so suspicious of their leaders One possibility is that power corrupts and therefore people are right in their reservations Indeed there are numerous examples of unethical leadership even at the highest level as the Watergate and Enron scandals clearly illustrate Another possibility is that people are unjustifiably paranoid as underscored by some of the rather far fetched conspiracy theories that are endorsed by a surprisingly large portion of citizens Are societal power holders more likely than the average citizen to display unethical behaviour How do people generally think and feel about politicians How do paranoia and conspiracy beliefs about societal power holders originate In this book prominent scholars address these intriguing questions and illuminate the many facets of the relations between power politics and paranoia *Social and Psychological Bases of Ideology and System Justification* John T.
