psychology social anthropology and sociology will interest anyone wanting short accessible histories of those disciplines all written by experts in the relevant field they will also make it easy for readers to make comparisons between disciplines A final chapter proposes a blueprint for a history of the social sciences as a whole Whereas most of the existing literature considers the social sciences in isolation from one other this volume shows that they have much in common for example they have responded to common problems using overlapping methods and cross disciplinary activities have been widespread The focus throughout the book is on societal pressures on knowledge production rather than just theoretical lineages This book is noteworthy because it Is the first book that puts together histories of the main social sciences since World War II each written by a discipline specialist Enables the readers to realize that what they see as specific to their own discipline is in fact common to several Contains a chapter that proposes a blueprint for a history of the social sciences as a whole *Laws And Explanation In The Social Sciences* Lee C McIntyre,2018-10-08 The first full length defense of social scientific laws to appear in the last twenty years this book upholds the prospect of the nomological explanation of human behavior against those who maintain that this approach is impossible impractical or irrelevant By pursuing an analogy with the natural sciences Mcintyre shows that the barriers to nomological inquiry within the social sciences are not generated by factors unique to social inquiry but arise from a largely common set of problems that face any scientific endeavor All of the most widely supported arguments against social scientific laws have failed largely due to adherence to a highly idealized conception of nomologicality allegedly drawn from the natural sciences themselves and the limited doctrine of descriptivism Basing his arguments upon a more realistic view of scientific theorizing that emphasizes the pivotal role of redescription in aiding the search for scientific laws Mcintyre is optimistic about attaining useful law like explanations of human behavior *Social Science and National Security Policy* Janeen M. Klinger,2019-02-07 This book examines how deterrence coercion and modernization theory has informed U S policy addressing why former Defense Secretary Robert McNamara s famous description of the Vietnam War as the social scientist s war is so accurate By tracing the evolution of ties between social scientists and the government beginning in World War I and continuing through the Second World War and the early Cold War the narrative highlights the role of institutions like the RAND Corporation the Social Science Research Council and MIT s Center for International Studies that facilitate these ties while providing a home for the development of theory The author compares and contrasts the ideas of Bernard Brodie Herman Kahn Albert Wohlstetter Thomas Schelling Gabriel Almond Lucian Pye and Walt Rostow among others and offers a cautionary tale concerning the difficulties and problems encountered when applying social science theory to national security policy *A Historiography of the Modern Social Sciences* Roger E. Backhouse,Philippe Fontaine,2014-09-22 A Historiography of the Modern Social Sciences exposes parallels and contrasts in the way the histories of the social sciences are written *Handbook on Research Assessment in the Social Sciences* Engels, Tim C.E.,Kulczycki, Emanuel,2022-04-19 This Handbook provides a comprehensive overview of current developments issues

and good practices regarding assessment in social science research It pays particular attention to the challenges in evaluation policies in the social sciences as well as to the specificities of publishing in the area **The Evaluation of Research in Social Sciences and Humanities** Andrea Bonaccorsi,2018-01-04 This book examines very important issues in research evaluation in the Social Sciences and Humanities It is based on recent experiences carried out in Italy 2011 2015 in the fields of research assessment peer review journal classification and construction of indicators and presents a systematic review of theoretical issues influencing the evaluation of Social Sciences and Humanities Several chapters analyse original data made available through research assessment exercises Other chapters are the result of dedicated and independent research carried out in 2014 2015 aimed at addressing some of the debated and open issues for example in the evaluation of books the use of Library Catalog Analysis or Google Scholar the definition of research quality criteria on internationalization as well as opening the way to innovative indicators The book is therefore a timely and important contribution to the international debate *Changing Social Science* Daniel R. Sabia,Jerald Wallulis,1983-01-01 Changing Social Science is both a description of and prescription for the current unease in the social sciences It brings together articles by philosophers sociologists and political scientists who advocate changing the way social science is conceived and practiced Focusing on the thought of past and present critics and proponents of critical inquiry especially on the critical theory of J rgen Habermas and on the disciplines of political science and sociology collaborators on this volume support a critical form of social and political inquiry outline its main characteristics and examine its foundations options and unresolved problems The book is divided into section on reflexivity methodology and explanation and criticism and advocacy From an introductory overview of the collection of articles and an account of the central issues in critical inquiry discussions ensue on the methodological inadequacies and political implications of naturalist approaches to social and political inquiry the nature and foundations of interpretive approaches to social science the role nature and limits of causal explanations and causal theories of human action the role of values in research and theory and defenses and criticisms of the normative aspirations of both Habermas s critical theory and of critical social science in general **Social Science Research and Government** Martin Bulmer,1987-02-26 This collection of twenty original essays considers the relationship between social science research and government during the last 30 years in Britain and the United States especially the economic and social policies of Reagan and Thatcher governments These essays will be useful to social science staff graduate students and to policy makers working inside government **Methodology and Epistemology for Social Sciences** Donald T. Campbell,1988-10-27 Selections from the work of an influential contributor to the methodology of the social sciences He treats measurement experimental design epistemology and sociology of science each section introduced by the editor Samuel Overman Annotation copyright Book News Inc Portland Or American Journal of Islamic Social Sciences 7:2 A. Huili,2022-09-30 In reviewing and reconsidering the intellectual history of scientism and antiscientism the authors assess the process of reasoning and prejudices of these contrasting viewpoints while discussing the repercussions of scientific hegemony and its contemporary criticism As the second volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this title focuses on ideological trends centering around scientism and anti scientism since the 19th century The six chapters look into the emergence of scientism instrumental reason scientific optimism scientific pessimism scientific crisis and irrationalism and finally the deconstruction of scientism The authors provide insight into the connections and biases of these disparate views and critiques explore the influences of the hegemony of science and contemporary critique of science and evaluate the value of postmodernism and deconstructivism The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture *Social Science and Institutional Change* Robert R. Mayer, *Shaping Human Science Disciplines* Christian Fleck,Matthias Duller,Victor Karády,2018-09-01 This book presents an analysis of the institutional development of selected social science and humanities SSH disciplines in Argentina France Germany Hungary Italy the Netherlands Sweden and the United Kingdom Where most narratives of a scholarly past are presented as a succession of ideas research results and theories this collection highlights the structural shifts in the systems of higher education as well as institutions of research and innovation beyond the universities within which these disciplines have developed This institutional perspective will facilitate systematic comparisons between developments in various disciplines and countries

Across eight country studies the book reveals remarkably different dynamics of disciplinary growth between countries as well as important interdisciplinary differences within countries In addition instances of institutional contractions and downturns and veritable breaks of continuity under authoritarian political regimes can be observed which are almost totally absent from narratives of individual disciplinary histories This important work will provide a valuable resource to scholars of disciplinary history the history of ideas the sociology of education and of scientific knowledge **Perspectives on the Social Sciences in Canada** Tom N. Guinsberg,Grant L. Reuber,1974-12-15 The papers included in this volume were originally presented at a conference to commemorate the opening of the Social Science Centre at the University of Western Ontario in 1973 Participants were asked to take stock of the development of their disciplines in Canada to assay the contours of current endeavours and to comment upon avenues of future research Their efforts mark what is believed to be the first collective

assessment of the social sciences in Canada. The contributors include Nathan Keyfitz on sociology C B Macpherson on political science H G Johnson on economics Ramsay Cook on history and M Rokeach on the place of values in Canadian social science. Commentaries on the papers are also included. Each author has addressed himself to one or more of the following matters: the degree to which the disciplines as practised in Canada are linked to or differentiated from their practice elsewhere; the benefits and drawbacks of a nationalistic approach to scholarship in the social sciences; the contributions of Canadian scholarship to the study of society in general and Canadian society in particular; the interaction among the social sciences in Canada and the need for interdisciplinary studies; and the unfulfilled agenda of Canadian social science. The assessments thus delineate the peculiar problems of the social sciences in Canada as well as some of the overall problems within and among the disciplines themselves.

The SAGE Handbook of Social Science Methodology William Outhwaite, Stephen Turner, 2007-10-18. An excellent guidebook through different approaches to social science measurement including the all important route maps that show us how to get there. Roger Jowell City University.
