

SOCIAL SERVICE WORKER

Social work is an academic discipline and practice-based profession concerned with meeting the basic needs of individuals, families, groups, communities, and society as a whole. It enhances their individual and collective well-being. Social work practice draws from areas such as psychology, sociology, health, political science, community development, law, and economics. Social workers engage with systems and policies, conduct assessments, develop interventions, and promote social functioning and responsibility. Social work practice is often divided into three levels: Micro-work involves working directly with individuals and families such as providing individual counseling, therapy, or assisting a family in accessing services. Mezzo work involves working with groups and communities such as conducting group therapy, organizing support groups, and community development. Macro work involves promoting change on a large scale such as policy, social policy, research, development, non-profit and public service administration, or working with government agencies. Starting in the 1980s, a few universities began offering management programmes for social workers for the management of social service organizations, in a field known as social work education.

The social work profession developed in the 19th century, with some of its roots in philanthropy and in grassroots organizing.[6] However, responses to social needs had existed long before then, primarily from public almshouses, private charities, and religious institutions. The effects of the Industrial Revolution and of the Great Depression of the 1930s created pressure on social workers to become a more defined discipline as social workers responded to the child welfare concerns created by widespread poverty and the presence of child labour in industrial settings.

Social work is a broad profession that intersects with several disciplines. Social work organiza-

tions offer the following definitions: Social work is a practice-based profession and an academic discipline that promotes social change and development, social cohesion, and the empowerment and liberation of people. Principles of social justice, human rights, collective responsibility, and respect for diversities are central to social work. Underpinned by theories of social change, social sciences, humanities, and indigenous knowledge, social work engages people and communities to address life challenges and en-

hance their well-being. The profession is concerned with helping individuals, families, groups, and communities to enhance their individual and collective well-being. Social workers help people develop their skills and use their resources to solve problems. Social workers work with individual and families, groups, and communities to address social issues such as unemployment, and domestic violence. The core aspects of the professional practice of social workers include principles, and techniques of social work. The following ends: helping people access essential services, counselling and supporting individuals, families, and groups, and providing support and health services, and participating in legislative processes. The practice of social work requires knowledge of human development and behavior, of social and economic systems, and of cultural, structural, and the interaction of all these factors.

Social workers help individuals and families to address issues in their lives. This may be to protect vulnerable people from harm, or to support people to live independently. Social workers support people, act as advocates, and direct people to the services they may require. Social workers often work in multi-disciplinary teams alongside

Social Service and the Art of Healing Dr Richard C Cabot,2020-09-07 Dr Richard Cabot describes how successful treatment of patients in the modern world requires teamwork between doctor social workers and educators Writing in 1909 much of what the author describes is a forerunner to treatments and medical services seen in the modern day the connection between medical conditions and outpatient care in

the community is well established Ideas regarding physical rehabilitation and reintegration into the community are vital for the health of the society Notions of public health whereby preventative medicine and care in the community is promoted and delivered were at a far simpler stage when Dr Cabot published his assessments For medical practitioners and social workers in the modern day this book acts as both a historical record and as an impression of how injury and disease were handled in the period At the time social work was associated more with charities than with government agencies funded for the public good The past ravages of fearful illnesses such as typhoid and tuberculosis are clear it is certain that containment and treatment of these ailments is a matter of educating the population As such Cabot s writings are a prospectus of care a list of ideas and concepts that could contribute to a healthier happier populace

The Social Transformation of American Medicine Paul Starr, 1982 Winner of the 1983 Pulitzer Prize and the Bancroft Prize in American History this is a landmark history of how the entire American health care system of doctors hospitals health plans and government programs has evolved over the last two centuries The definitive social history of the medical profession in America A monumental achievement H Jack Geiger M D New York Times Book Review

Social Service and the Art of Healing Richard C. Cabot, 2016-11-30 From the Introduction THIS book is written to exemplify three forms of team work which are now tending to ennoble medicine

- 1 Social service the modern type of what used to be called philanthropy is drawing nearer and nearer to medicine Public health and the extermination of disease that most fruitful cause of poverty of misery and of crime are the ideals for which doctors and social workers are joining hands to day When the doctor looks for the root cause of most of the sickness that he is called upon to help he finds social conditions such as vice ignorance overcrowding sweatshops and poverty When the social worker analyzes the reason why a family is in need why a bread winner is slack or shiftless why girls go wrong and boys are caught stealing he finds physical conditions medical conditions poor nutrition bad air alcoholism tuberculosis injuries in factories staring him in the face Therefore team work of doctor and social worker is called for and the two professions are beginning to hear this call to feel this kinship and somewhat bashfully to work together
- 2 But moral and spiritual problems also branch out of medical problems Behind much physical suffering is the mental torment the doubt fear worry or remorse that the stress of life has created in most of the sick and in many who call themselves well Without recognizing and treating these ills of the mind it is impossible to control the bodily sufferings for which people consult the doctor The doctor must be a psychologist an educator a physician to the whole man body and soul alike But can he Again team work is the need The doctor must work with the educator the psychologist and the minister as well as with the philanthropist Only in this way can he become himself an educator a teacher putting the truth into his patients minds and letting it do its own work there
- 3 The problem of truth speaking vs deception and concealment in medical practice springs naturally out of the newer educational and preventive work which is being recognized to day as the core of medical helpfulness to the public as a whole To fool a patient is tyranny not guidance He must understand what is being done for him
