Brooks,2017-05-30 A compelling study of a subtle and insidious form

of racial inequality in American law and culture Why does racial equality continue to elude African Americans even after the election of a black president Liberals blame white racism while conservatives blame black behavior Both define the race problem in socioeconomic terms mainly citing jobs education and policing Roy Brooks a distinguished legal scholar argues that the reality is more complex He defines the race problem African Americans face today as a three headed hydra involving socioeconomic judicial and cultural conditions Focusing on law and culture Brooks defines the problem largely as racial subordination the act of impeding racial progress in pursuit of nonracist interests Racial subordination is little understood and underacknowledged yet it produces devastating and even deadly racial consequences that affect both poor and socioeconomically successful African Americans Brooks addresses a serious problem in many ways more dangerous than overt racism and offers a well reasoned solution that draws upon the strongest virtues America has exhibited to the world

Language and Social Structure in Urban France David Hornsby, 2017-07-05 The coming together of linguistics and sociology in the 1960 s most notably via the work of William Labov marked a revolution in the study of language and provided a paradigm for the understanding of variation and change Labovian quantitative methods have been employed successfully in North America the UK Scandinavia and New Zealand but have had surprisingly little resonance in France a country which poses many challenges to orthodox sociolinguistic thinking Why for example does a nation with unexceptional scores on income distribution and social mobility show an exceptionally high degree of linguistic levelling that is the elimination of marked regional or local speech forms And why does French appear to abound in hyperstyle variables which show greater variation on the stylistic than on the social dimension in defiance of a well established theory that such variables should not occur This volume brings together leading variationist sociolinguists and sociologists from both sides of the Channel to ask what makes France exceptional In addressing this question variationists have been forced to reassess the accepted interdisciplinary consensus and to ask as sociolinguistics has come of age whether concepts and definitions have been transposed in a way which meaningfully preserves their original sense and crucially takes account of recent developments in sociology Sociologists for their part have focused on the largely neglected area of language variation and its implications for social theory Their findings therefore transcend the case study of a particularly enigmatic country to raise important theoretical questions for both disciplines

Distributive Institutions Shouwen Zhang, 2020-12-29 The crisis of distribution is one of the longest standing and most complicated issues facing human society

Imbued with social political historic and cultural elements it varies significantly across different countries as a result of all these factors As an emerging economy which transferred from a planned to a market economy China has experienced large distribution gaps since it implemented the Reform and Opening up Policy in the early 1980s requiring stronger economic law to mitigate and regulate the crisis of distribution In this second volume the author analyses crises of distribution from a theoretical perspective and proposes law and policy solutions Believing that such crises are a collective result of systematic limitations the author proposes a theoretical framework of system distribution development in order to resolve distribution problems and promote economic development He argues that a crisis of distribution cannot be avoided without coordinated development of economic law and relevant constitutional civil and commercial law systems In addition it is necessary to differentiate the territories industries enterprises and individuals that constitute such diverse systems The book should be of keen interest to researchers and students of law economics and political science
