Reconfiguring Identities and Building Territories in India and South Africa Philippe Gervais-Lambony, Frédéric Landy, Sophie Oldfield, 2005 Published in association with Centre de Sciences Humaines New Delhi Questions of territory space and identity are critically important in the international geopolitical context as well as central to contemporary research in the social sciences Processes connected with globalization have reconfigured identities and territories at multiple scales connecting and disconnecting places in complex ways and re enforcing old while producing new forms of segregation and polarisation Global processes meet the complex and locally specific South African and Indian geographies of inequality expressed at national regional and local scale In the South African case a political imperative to transform the legacies of racial inequality from colonial and apartheid rule underscores the centrality of racial identities However racial discourse and differentiation embodies and at times masks a complex mix of place based gender class and cultural identities expressed in a multi scalar politics of territory Over 50 years into independent rule Indian identity politics continues to build to a large

extent on caste and the intricate ways in which caste affiliation merges with religious socio economic political and place based identities In both contexts the politics of identity and territory simultaneously unify and divide The spaces territories and identities re produced in the complex contexts in which the global national regional and local meet lie at the heart of the research from which the papers in this book have been generated The research investigated the reconfiguration of Indian and South African identities and territories through dialogue primarily between geographers but also other social scientists from India South Africa and France

web differential equations are of fundamental importance in the applications of mathematics to the physical and biological sciences this text provides an elementary but cohesive development of the topic the primary goal of the book is to teach students how to use differential equations in applied areas to this end the book includes more than 400 elementary differential equations enhanced etext 11th edition - May 01 2023

web the authors have sought to combine a sound and accurate but not abstract exposition of the elementary theory of differential equations with considerable material on methods of solution analysis and approximation that have proved useful **elementary differential equations by earl d rainville goodreads** - May 21 2022

web earl d rainville 4 35 571 ratings43 reviews a clear concise book that emphasizes finding solutions to differential equations where applications play an important role each chapter includes many illustrative examples to assist the reader the book emphasizes methods for finding solutions to differential equations

elementary differential equations trinity university - Sep 05 2023

web learn the basic concepts and methods of elementary differential equations from a free textbook by william trench a professor of mathematics at trinity university the book covers topics such as first order equations linear equations nonlinear equations laplace transforms numerical methods and more the book also includes exercises solutions
