Social Theory And The Family:

Social Theory and the Family (RLE Social Theory) D.H.J. Morgan, 2014-08-07 An experienced teacher of courses on the sociology of the family D H J Morgan frequently encounters a gulf between the family as it is often treated in sociological texts and the family as it is usually experienced In this book he provides an extremely valuable bridge between the two by presenting an encounter between some of the mainstream theoretical approaches and concerns in the sociology of the family and what he terms as critical perspectives on the family This is the first British book on a basic social institution that takes into account the literature outside the mainstream of sociological analysis that deals with the subject The first half examines the varieties of functional theorizing embedded in many texts the over concern with the question of kinship in modern society and the treatment of the family as a success story In the second half Dr Morgan presents a critical account of some of the counter theories those derived from the radical feminist movement the existential psycho analytical approach associated with Laing and the critical analyses of sex in an advanced capitalist society A final chapter suggests some themes and orientations derived from this encounter of theoretical approaches and modern perspectives which can be usefully developed

Family and the State of Theory David J. Cheal, 1991-01-01 Family studies play an increasingly important role in contemporary sociology David Cheal provides an up to date and comprehensive survey of modern sociological theories about family life While recognizing that these theories are both diverse and fragmented he argues that such divisions are a positive and integral aspect of studying contemporary family theory Cheal takes a broad comparative approach to the theories analysed using empirical examples from North America Europe and Australia and examining how old and new approaches interact with one another He argues that it is possible to make sense of a contemporary family theory by analysing its divisions as the result of different experiences of modernity These experiences lie along three axes first the opposition between social modernism and its anti modernist critics second the ideological effects of contradictions within modernity itself and third the emerging difference between modernist idealism and post modernist scepticism Another major theme of the book is the profound impact of feminism on contemporary family
