**The Social Work Psychoanalyst's Casebook** Joyce Edward, Elaine Rose, 2013-05-13 The Social Work Psychoanalyst's Casebook begins with an interview with Dr Sanville who reflects on her evolution as a social work analyst theoretician writer teacher and leader These reminiscences are followed by accounts of nine analytic treatments each of which offers an unusual window into what actually transpired between analyst and analysand during the treatment hours These case studies concern particularly troubled often traumatized patients the very hard to reach or difficult to treat clients with whom social workers have long been familiar They include a reanalysis by the same analyst of a patient whose first therapy ended in a stalemate an account of transference and countertransference phenomena during termination a report on the analysis of a young woman who experienced both chronic and stress related trauma and an account of the special issues involved in the treatment of an aging woman Most of the case studies reflect the influence of Dr Sanville whose work has long evinced the therapeutic imagination and disciplined creativity to which all the contributors aspire The contributors to this volume offer the salutary reminder that analytic work is built on a relationship of respect and empathy and that treatment success follows from the therapist's willingness to accommodate the unique needs of individual patients In honoring Jean Sanville The Social Work Psychoanalyst's Casebook speaks to the robustness of a multidisciplinary approach to psychopathology that transcends the bounds of any single profession an approach in which contemporary psychoanalysis is enlarged by the insights and emphases of social work just as social work is enriched by the clinical wisdom of psychoanalysis

**Structure and Spontaneity in Clinical Prose** Suzi Naiburg, 2015-04-10 Structure and Spontaneity in Clinical Prose will teach you to read gifted writers for inspiration and practical lessons in the craft of writing apply the principles and techniques of the paradigmatic narrative lyric narrative evocative and enactive modes of clinical prose and put what you learn immediately into practice in eighty four writing exercises Each of the five modes uses different means to construct worlds out of language The paradigmatic abstracts ideas from experience to build concepts and theories The narrative mode organizes experience through time creating meaningful relationships between causes and effects Lyric narratives present events unfolding in an uncertain present The evocative mode works by invitation and suggestion and the enactive mode creates an experience to be lived as well as thought Structure and Spontaneity is fundamentally a book about reading and writing in new and different ways It is an invaluable resource for new and experienced psychoanalysts and psychotherapists and for students teachers editors and writers in the humanities and social sciences

**The Sibling Relationship** Joyce Edward, 2012-01-19 This book focuses on the role that siblings play in each other's development on the ways in which they may enrich or cast a shadow over each other's lives and on how their internalized influence can be recognized and dealt with in the clinical setting Drawing from observational research and clinical experience Joyce Edward considers how brothers and sisters as important attachment figures may contribute to each other's development of a sound sense of self and to their capacities for establishing satisfying social relationships Edward also examines how excessive sibling envy jealousy and rivalry or physical sexual or emotional abuse at the hands of a sibling can impede an individual's development and contribute to pathology Detailed treatment examples demonstrate how essential it is to give siblings a place in the therapeutic situation to recognize them not only as displacement figures for parents but also as persons who hold an important place in the minds of patients exerting influence on the way they relate to their mates their children their friends and their therapists

**Illusions of a Future** Kate Schechter, 2014-08-20 A pioneering ethnography of psychoanalysis Illusions of a Future explores the political economy of private therapeutic labor within industrialized medicine Focusing on psychoanalysis in Chicago a historically important location in the development and institutionalization of psychoanalysis in the United States Kate Schechter examines the nexus of theory practice and institutional form in the original instituting of psychoanalysis its normalization and now its crisis She describes how contemporary analysts struggle to maintain conceptions of themselves as capable of deciding what psychoanalysis is and how to regulate it in order to prevail over market demands for the efficiency and standardization of mental health treatments In the process Schechter shows how deeply imbricated the analyst patient relationship is in this effort Since the mid twentieth century the real relationship between analyst and patient is no longer the unremarked background of analysis but its very site Psychoanalysts seek to validate the centrality of this relationship with theory and through codified standards to claim it as a privileged technique It has become the means by which psychoanalysts in seeking

to protect their disciplinary autonomy have unwittingly bound themselves to a neoliberal discourse of regulation

*Reflections on Long-Term Relational Psychotherapy and Psychoanalysis* Susan A. Lord, 2019-03-15 *Reflections on Long Term Relational Psychotherapy and Psychoanalysis* explores how relational analysts think about and pursue long term therapeutic relationships in their practices Many therapists work intensively with their clients over many years and don't necessarily talk about their work More exploration is needed into what is taking place inside of these long term relationships The chapters cover a range of topics that focus on aspects of the therapeutic relationship that are unique to long term psychoanalytic work They include work with various issues such as trauma death and dying cross cultural issues suffering mourning neuropsychanalysis unique endings attachment intimacy and the many ways in which therapists change along with their clients as they go through life stages together *Reflections on Long Term Relational Psychotherapy and Psychoanalysis* will be of great interest to psychoanalysts psychodynamic psychotherapists psychologists social workers workers in other mental health fields graduate students and anyone who is interested in change processes *Understanding Adoption* Kathleen Hushion, Susan B. Sherman, Diana Siskind, 2006 *Adoption* is a transformational process bringing parenthood to those who long for but cannot bear children and giving stranded children home family and their place in the world But every adoption is preceded and followed by its story and when these stories are told in the offices of psychotherapists we begin to understand the impact of adoption in all its complexity We learn from parents how their quest to have and raise a child has played out in real life and what shadows might have fallen between the dream and the reality And we learn from the children the many ways that being adopted shaped their development their sense of identity what went wrong along the way and how we may help Clinical work with parents and children as well as with adults who were adopted is the focus of *Understanding Adoption* Because adoption has become widely practiced accepted and accessible and because it has greatly changed the composition of families it is a timely subject for study The authors of this book undertake exploration of this important terrain of loss and connection and of the fragility and resilience of human bonds

**Termination in Psychotherapy** Anthony S. Joyce, 2007 A successful termination phase is a critically important component of psychotherapy of any orientation The authors synthesize and evaluate the clinical theoretical and empirical literature on termination They then offer their own Termination Phase Model designed to help psychotherapists understand and address the full range of both patient and therapist responses that must be considered as therapy winds down and the patient prepares for life without treatment **The British National Bibliography** Arthur James Wells, 2000 **Subject Guide to Books in Print**, 1991 **Bibliographie internationale annuelle des mélanges**, 2000 **Forthcoming Books** Rose Arny, 2000
