Group Dynamics and Emotional Expression Ursula Hess, Pierre Philippot, 2007-01-29 The study of emotional expressions has a long tradition in psychology Although research in this domain has extensively studied the social context factors that influence the expresser's facial display the perceiver was considered passive This 2007 book focuses on more recent developments that show that the perceiver is also subject to the same social rules and norms that guide the expresser's

behavior and that knowledge of relevant emotion norms can influence how emotional expressions shown by members of different groups are perceived and interpreted Factors such as ethnic group membership gender and relative status all influence not only emotional expressions but also the interpretation of emotional expressions shown by members of different groups Specifically the research presented asks the question of whether and why the same expressions shown by men or women members of different ethnic groups or individuals high and low in status are interpreted differently Human Behavior in Military Contexts National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Opportunities in Basic Research in the Behavioral and Social Sciences for the U.S. Military, 2008-01-03 Human behavior forms the nucleus of military effectiveness Humans operating in the complex military system must possess the knowledge skills abilities aptitudes and temperament to perform their roles effectively in a reliable and predictable manner and effective military management requires understanding of how these qualities can be best provided and assessed Scientific research in this area is critical to understanding leadership training and other personnel issues social interactions and organizational structures within the military The U S Army Research Institute for the Behavioral and Social Sciences ARI asked the National Research Council to provide an agenda for basic behavioral and social research focused on applications in both the short and long term The committee responded by recommending six areas of research on the basis of their relevance potential impact and timeliness for military needs intercultural competence teams in complex environments technology based training nonverbal behavior emotion and behavioral neurophysiology The committee suggests doubling the current budget for basic research for the behavioral and social sciences across U S military research agencies The additional funds can support approximately 40 new projects per year across the committee s recommended research areas Human Behavior in Military Contexts includes committee reports and papers that demonstrate areas of stimulating ongoing research in the behavioral and social sciences that can enrich the military s ability to recruit train and enhance the performance of its personnel both organizationally and in its many roles in other cultures *Online Communication* Andrew F. Wood, Matthew J. Handbook of Psychiatric Disorders in Adults in the Primary Care Setting Robert Hudak, Jessica M. Gannon, 2022-05-27 Since psychiatric training in medical school is brief in duration often 4-8 weeks only and minimal to nonexistent in many residency programs most primary care physicians are not adequately equipped to treat psychiatric disorders despite the fact that this role promises a significant portion of the average physician's practice This book provides non psychiatric physicians especially primary care physicians with the tools to successfully diagnose and treat psychiatric disorders in their practices Primary care physicians are the largest prescribers of psychiatric medications in the US where they also provide the bulk of psychiatric diagnoses and treatment especially in traditionally underserved areas Every chapter is devoted to each of the major psychiatric disorders that a primary care physician is likely to encounter in clinical practice They are formatted in a nearly identical way to make the text both easy to read and quickly peruse as a reference Each chapter also includes a clinical description of the disorder the proper method including questions to ask or screening tools etc to make an accurate diagnosis and differential diagnoses to consider Additionally appropriate treatments for the diagnoses are indicated in a stepwise fashion Chapters also contain information on medical tests that may be appropriate to order to rule out medical conditions as well as details on proper routine health screening for individuals on specific medications and or mental health diagnoses To optimize accessibility of medication prescribing information several tables of the medications that are commonly prescribed for each disorder will be indicated This may lead to some redundancy of information as there is

considerable overlap in medication and dosing strategies for different illnesses ex antipsychotics for bipolar disorder and schizophrenia and antidepressants for Major Depressive Disorder and Anxiety Disorders However duplication of information assists in readability and user friendliness as doctors will not have to flip through different parts of a book or refer to an appendix every time they wish to look up specific medication related information Written by experts in the field Handbook of Psychiatric Disorders in Adults in the Primary Care Setting is a valuable resource to aid in the proper assessment and treatment of psychiatric disorders by the physicians who are most likely to see and treat these patients Most psychiatric textbooks are probably not appropriate for most primary care physicians as they contain far too much specialized information that they do not need to know and do not often contain clinical steps and guidelines for treatment This text fulfills a pressing clinical need
