Learning in Digital and Virtual Environments Vlad Glăveanu, Ingunn Ness, Constance de Saint Laurent, 2020-11-10 Originally published as a special issue of the Creativity Research Journal this volume gives a balanced and reflective account of the challenges and opportunities of technology enabled creative learning in contemporary societies Providing a current and updated account of the challenges posed by the Coronavirus to online education chapters more broadly offer conceptual reflections and empirically informed insights into the impact of technology on individual and collective creativity and learning These thoughts are explored in relation to school achievement the development of digital educational resources online collaboration and virtual working Further the book also considers how the creative use of technology poses risks to learning through the accidental or deliberate dissemination of misinformation and online manipulation of common societal values in the era of COVID 19 *Creative Learning in Digital and Virtual Environments* looks at the connection between creativity learning and school achievement and analyses the impact of virtual environments on creative expression It will appeal to postgraduate students in the fields of creativity and learning as well as to students and academics involved with broader research in areas such as the role of technology in education e Learning and distance education Vlad P Glăveanu is Associate Professor and Head of the Department of Psychology and Counselling at Webster University Geneva Switzerland as well as Associate Professor II at the University of Bergen Norway Ingunn Johanne Ness is a Senior Researcher at the Centre for the Science of Learning Technology University of Bergen Norway Constance de Saint Laurent is a Postdoctoral Researcher at the University of Bologna Italy *Cultural Psychology and Psychoanalysis* Tania Zittoun, Sergio Salvatore, 2011-12-01 This book explores how psychoanalysis can enrich and complement sociocultural psychology It presents theoretical integrations of psychoanalytical notions in the sociocultural framework analyzes the historical similarities if not intricacies of the two fields

and presents papers that have tried to apply an enriched theoretical framework in developmental and clinical empirical work. The first section presents editors' theoretical proposition for an integration of one particular stream of psychoanalysis within sociocultural psychology which emphasizes both the dialogical and the semiotic nature of psychological dynamics. The second section pursues this theoretical dialogue through a historical perspective. The third section pursues the implications of this parallel reasoning. It invites researchers that propose further syntheses between some strands of psychoanalysis and approaches within social and cultural psychology. The contributions collected in this section show how sociocultural psychology and psychoanalysis can complement each other when it comes to tracing the emergence of meaning in actual interactive settings. Showing historical common roots, epistemological similarities and theoretical complementarities, this book intends to suggest how the encounter and reciprocal contamination between cultural psychology and psychoanalysis could provide innovative theoretical and methodological syntheses. Through the various contributions, three directions of development emerge as particularly promising for psychological science. Firstly, the semiotic conceptualization of affects emerging from several of the contributors appears to be a significant step ahead in the understanding of the dynamics of sense making. A second promising direction of development concerns methodology. The reader will find several invitations to rethink the way of analyzing the phenomena of sense making. Finally, the volume highlights how the connection between theory and practice in psychology is not a mere matter of application. Rather, the psychological intervention could be needed to be a theoretical object for cultural psychology as it already is for psychoanalysis. At the same time, the intervention could be a fertile domain where a psychological practice endowed with reflexive capability generates new theoretical constructions.

Learning Outside the Academy Richard Edwards, Jim Gallacher, Susan Whittaker, 2006-11-22. This book weaves together different strands of research in the area of lifelong learning that concentrates particularly on learning in alternative settings and ways such as experiential learning and informal and community learning. Drawing upon international research, the book examines how these strands of research can contribute to each other. The contributions to this book are based on material presented at a conference at the Centre for Research in Lifelong Learning UK and they focus on research into key issues of policy and practice in lifelong learning. Establishing a wider framework for debate about the meaning and significance of lifelong learning, this timely and thought-provoking book provides practitioners in the field with a relevant and current discussion on some very important ideas about non-formal education.

Sociocultural Theory in Second Language Education Merrill Swain, Penny Kinnear, Linda Steinman, 2015-02-12. In this accessible introduction to Vygotskian sociocultural theory, narratives illuminate key concepts of the theory. These key concepts include mediation, Zone of Proximal Development, collaborative dialogue and private speech, everyday and scientific concepts, the interrelatedness of cognition and emotion, activity theory and assessment. A final chapter provides readers with an opportunity to consider two additional narratives and apply the SCT concepts that they have become familiar with. We hear from learners, teachers and researchers.

in a variety of languages contexts ages and proficiencies Intended for graduate and undergraduate audiences this new edition of the textbook includes controversies in the field improved questions for collaborative discussion and provides updated references to important work in the literature of second language teaching learning and research **Learning Discourse** C. Kieran, Ellice Ann Forman, Anna Sfard, 2007-05-08 The authors of this volume claim that mathematics can be usefully re conceptualized as a special form of communication As a result the familiar discussion of mental schemes misconceptions and cognitive conflict is transformed into a consideration of activity patterns of interaction and communication failure By equating thinking with communicating the discursive approach also deconstructs the problematic dichotomy between individual and social research perspectives Although each author applies his or her own analyses to the discourse generated by students and teachers grappling with mathematical problems their joint aim is to put discursive research into the limelight and to spur thinking about its nature and its possible advantages and pitfalls This volume is therefore addressed both to those interested in specific questions regarding classroom communication and to those who are looking for a general conceptual lens with which to tackle the complexity of mathematical teaching and learning

Perspectives on Mathematical Practices Bart van Kerkhove, Jean Paul van Bendegem, 2007-06-01 Philosophy of mathematics today has transformed into a very complex network of diverse ideas viewpoints and theories Sometimes the emphasis is on the classical foundational work often connected with the use of formal logical methods sometimes on the sociological dimension of the mathematical research community and the products it produces then again on the education of future mathematicians and the problem of how knowledge is or should be transmitted from one generation to the next The editors of this book felt the urge first of all to bring together the widest variety of authors from these different domains and secondly to show that this diversity does not exclude a sufficient number of common elements to be present In the eyes of the editors this book will be considered a success if it can convince its readers of the following that it is warranted to dream of a realistic and full fledged theory of mathematical practices in the plural If such a theory is possible it would mean that a number of presently existing fierce oppositions between philosophers sociologists educators and other parties involved are in fact illusory *Theories in Second Language Acquisition* Bill VanPatten, Gregory D. Keating, Stefanie Wulff, 2020-02-24 This third edition of the best selling *Theories in Second Language Acquisition* surveys the major theories currently used in second language acquisition SLA research serving as an ideal introductory text for undergraduate and graduate students in SLA and language teaching Designed to provide a consistent and coherent presentation for those seeking a basic understanding of the theories that underlie contemporary SLA research each chapter focuses on a single theory Chapters are written by leading scholars in the field and incorporate a basic foundational description of the theory relevant data or research models used with this theory common misunderstandings and a sample study from the field to show the theory in practice New to this edition is a chapter addressing the relationship between theories and L2 teaching as well as refreshed coverage of all

theories throughout the book A key work in the study of second language acquisition this volume will be useful to students of linguistics language and language teaching and to researchers as a guide to theoretical work outside their respective domains

The Natural History of the Sign Chris Barnham,2022-07-18 Our understanding of CS Peirce and his semiotics is largely influenced by a twentieth century perspective that prioritizes the sign as a cultural artifact or as one that that distorts in some way our understanding of the empirical world Such a perspective will always undermine appreciation of Peirce as a philosopher who viewed signs as the very mechanisms that enable us to understand reality through concept formation The key to this repositioning of Peirce is to place his work in the broad frame of Hegelian philosophy This book evaluates in detail the parallels that exist between Peircean and Hegelian thought highlighting their convergences and also the points at which Peirce departs from Hegel s position It also considers the work of Vygotsky on concept formation showing that both are in fact working within the same Hegelian template This book therefore contributes to our broader understanding of Peircean semiotics But by drawing in Vygotsky under the same theoretical auspices it demonstrates that Peirce has much to offer contemporary educational learning theory

The Routledge Handbook of Applied Linguistics James Simpson,2011-03-15 The Routledge Handbook of Applied Linguistics serves as an introduction and reference point to key areas in the field of applied linguistics The five sections of the volume encompass a wide range of topics from a variety of perspectives applied linguistics in action language learning language education language culture and identity perspectives on language in use descriptions of language for applied linguistics The forty seven chapters connect knowledge about language to decision making in the real world The volume as a whole highlights the role of applied linguistics which is to make insights drawn from language study relevant to such decision making The chapters are written by specialists from around the world Each one provides an overview of the history of the topic the main current issues and possible future trajectory Where appropriate authors discuss the impact and use of new technology in the area Suggestions for further reading are provided with every chapter The Routledge Handbook of Applied Linguistics is an essential purchase for postgraduate students of applied linguistics Editorial board Ronald Carter Guy Cook Diane Larsen Freeman and Amy Tsui

Worlds of ScienceCraft Sal Restivo,Sabrina M. Weiss,Alexander Stingl,2016-02-11 A response to complex problems spanning disciplinary boundaries Worlds of ScienceCraft offers bold new ways of conceptualizing ideas of science sociology and philosophy Beginning with the historical foundations of civilization and progress assumptions about the categories we use to talk about minds identities and bodies are challenged through case studies from mathematics social cognition and medical ethics Offering innovative approaches to these issues such as an integrated social brain mind body model and a critique of divisions between the natural and technological this book provides novel conceptions of self society and an emerging cyborg generation From the micro level of brains and expanding all the way out to biopolitical civics disciplinary boundaries are made permeable emphasizing the increased need for interdisciplinary scholarship By rejecting outdated and

restrictive categories and classifications new horizons in studies of science technology and medicine can be explored through the incorporation of feminist international and postmodern perspectives A truly interdisciplinary examination of science and technology as cultural phenomena *Worlds of ScienceCraft* will appeal to scholars and students of science and technology studies as well as philosophers historians and sociologists of science technology and medicine

Theology, Psychology and the Plural Self Léon Turner, 2016-02-17 Is the human self singular and unified or essentially plural This book explores the seemingly disparate ways that Christian theology and the secular human sciences have approached this complex question The latter have largely embraced the idea of the plural self as an inescapable even adaptive feature of psychological life Contemporary Christian theology by contrast has largely neglected recent psychological accounts of the naturalness of self plurality and has sought to reaffirm the self's unity in opposition to those postmodern theorists who would dismantle it Through an original analysis of recent theological and secular accounts of self and personhood this book examines the extent of the intertheoretical disparity and its broader implications for theology's dialogue with the human sciences in general and psychology in particular It explains why theologians ought to take questions about the plurality of self very seriously and how they overlap with many of the central concerns of contemporary theological anthropology including the notions of relationality particularity and human sinfulness Introducing a novel psychological framework to distinguish various understandings of self disunity the author argues that contemporary theology's blanket condemnation of self multiplicity is misconceived and identifies a possible means of reconciling theological and human scientific accounts

Pragmatism and Education, 2005-01-01 The papers in this book have emerged from a conference which was organized in Zurich in 2003 by the Pestalozzianum Research Institute for the History of Education and the Educational Institute of the University of Zurich The conference was organized in light of the increasing internationalization of educational discussion within the last ten to twenty years and the topic was the relation between pragmatism and educational theory The contributions appear in a kind of chronological order First James A Good examines the repeatedly asserted Hegelian roots of Dewey's philosophy while Hans Peter Krüger Meike Sophia Baader and Roswitha Lehmann Rommel address specific aspects of pragmatism such as public communication religion and aesthetics with the main emphasis of the analysis on William James and John Dewey Jane Addams and George Herbert Mead's education stands at the center of interest in the contributions by Daniel Tröhler Birgit Althans Gert Biesta and Jürgen Oelkers while Philipp Gonon and Stefan Bittner turn to the question of why pragmatism had such a hard time of gaining a foothold in Germany The final contribution Philip W Jackson's systematic analysis of Dewey's thought breaks with the chronological perspective of the volume shifting the focus to other central and fruitful issues

Dialogical Approaches to Trust in Communication Per Linell, Ivana Markova, 2013-10-01 Trust has a constituent role in human societies It has been treated as a scientific topic in many disciplines Yet despite the fact that trust and distrust come to life primarily in human communication and through language it has seldom been analyzed from a communicative or

linguistic perspective This is the theme of this path breaking volume This volume contains 12 chapters plus introduction and epilogue by the editors They have been authored by leading specialists on trust in language and communication coming from many disciplines and from different cultures and countries Most of the authors share a conceptual basis in dialogical theories This book is a follow up volume to two previous volumes on trust within cultural psychology Trust and Distrust Markov Gillespie 2008 and Trust and Conflict Markov Gillespie 2012 It will be of interest to anyone seriously interested in trust in societies and in trust and distrust as displayed in communication and language

Blending Spaces Arnd Witte, 2014-10-09 This book comprehensively analyzes the development of interculturally blended third spaces by the second language learner beginning with the linguistic and sociocultural imprints of the first language and culture on the mind and culminating in the proposal of a phase model of the development of intercultural competence The foundational analysis of L1 mediated constructs is followed by an analysis of forms interaction concepts of identity and constructs of culture interculture thus shifting the object of analysis from the subjective to the intersubjective levels of construction and interaction The focus of the book is on the gradual development of interculturally blended third spaces in the mind of the learner as genuinely new bases for construction This book takes an interdisciplinary approach drawing on research in cultural psychology linguistic anthropology critical theory language acquisition and second language learning and shows how culture and interculture need to be emphasized as an integral part of second language learning

Sustainable Futures for Higher Education Jaan Valsiner, Anastasiia Lutsenko, Alexandra Antoniouk, 2018-09-26 This volume addresses the current situation in higher education and what creative action needs to be taken for the future development of the various systems of higher education Higher education in the 21st centuries is under immense pressure from various sides First there is dramatic limitation of funding from public sources and limited and selective funding support from private sources that is re constructing the landscape of higher education in most societies around the World Secondly there is the continuous stream of administrative re organization efforts of political origins e g the Bologna process that guide the advancement of higher education in our present time Increasing privatization of all forms of higher education from bachelor to doctoral levels and its corresponding focus on the advancement of the kind of knowledge that has immediate applicability in various spheres of societies leads to the question what kind of creativity is expected from the new cohorts of students future makers of knowledge once the current social re organization of higher education systems becomes fully established To address these questions the international interdisciplinary cast of authors in this volume provides a multitude of possible scenarios for future development of the systems of higher education This book on Sustainable Futures of Higher Education captures the current trends and perspectives of the Knowledge Makers from

various nations of the world on meeting and greeting the challenges of globalization and the pressures of the knowledge economy. It makes a strong case for universities of tomorrow sustaining their autonomous thinking and yet nurturing an environment of collaborative partnership with society, corporate and industry to fuel innovations in plenty and continuous supply of new science and technologies. Higher Education has been and shall remain a powerful vehicle of national and global transformation. I see a great value of the publication in impacting the minds of the leaders in higher education around the globe for revitalizing the universities. Professor P B Sharma, President of Association of Indian Universities (AIU). How should the higher education system be in the globalization era? In this book, Jaan Valsiner and his colleagues analyze, criticize the existing and propose a new higher education system. When we say higher education, three different layers are supposed to be there: the lower, the middle and the higher. The latter has the function of production of new knowledges. Without new knowledge, our societies are never improving. Authors warn commercialized systems such as the Bologna system overestimate the homogeneity of education. Universities without Borders would guarantee both diversity and innovation in the higher education systems. Professor Tatsuya Sato, Dean of Research, Ritsumeikan University.
