Social Support Networks James K. Whittaker, James Garbarino, This book offers for the first time a clear conception of what social support networks are why they are important how they are identified and sustained where they fit in an overall framework of human services and their limits and potential in selected fields of practice Individual chapters explore child adolescent and family services daycare and early childhood development divorced and stepfamilies schools delinquency prevention and treatment mental health service to the elderly development disabilities healthcare and health promotion and drug treatment The use of social support networks extended family friends neighbors and other informal helpers is an idea whose time has come in the human services field At a time when spiraling costs and popular sentiment weigh against any major expansion of services it is apparent that a service strategy based primarily on the notion of professional helping delivered on a case by case basis usually in a one to one relationship has serious limitations Professional response to this major work has been uniformly positive The editors have assembled a book of considerable importance brilliant in both scholarship and construction will appeal to a broad readership Gerald Euster University of South Carolina offers a much needed balance to the focus on individual and internal dynamics which has characterized social work education for several decades Eleanor Reardon Tolson University of Chicago Social Support Networks is a valuable contribution a unique original and authoritative book an exciting timely and definitely practice oriented book with a strong theoretical and research base Anthony N Maluccio University of Connecticut James K Whittaker is professor of social work at the University of Washington A former childcare worker therapist and administrator in residential childcare he has been a consultant to governmental and voluntary children s agencies throughout the United States James Garbarino is Elizabeth Lee Vincent Professor of Human Development in the College of Human Ecology at Cornell University He was president of the Erikson Institute for Advanced Study in Child Development Chicago Illinois from 1985 to 1994 He is the co author of Troubled Youth Troubled Families also available from AldineTransaction      *Social Networks, Social Support, and Mental Health in Cross-national Comparative Perspective* Ning Hsieh, 2014      Children's Social Networks and Social Supports Deborah Belle, 1989-03-30 This new work

Health through Social Support Jonathan Leach, 2014-12-21 The social support someone receives or has access to plays a vital role in their mental health and wellbeing. This accessible book examines the nature of social support and how it can be enhanced, focusing on relationships between service users and supporters. This is an important book for mental health professionals, social workers, and students. **Genes, Behavior, and the Social Environment** Institute of Medicine, Board

on Health Sciences Policy, Committee on Assessing Interactions Among Social, Behavioral, and Genetic Factors in Health, 2006-12-07 Over the past century we have made great strides in reducing rates of disease and enhancing people's general health. Public health measures such as sanitation, improved hygiene, and vaccines reduced hazards in the workplace; new drugs and clinical procedures; and more recently, a growing understanding of the human genome have each played a role in extending the duration and raising the quality of human life. But research conducted over the past few decades shows us that this progress, much of which was based on investigating one causative factor at a time, often through a single discipline or by a narrow range of practitioners, can only go so far. **Genes, Behavior, and the Social Environment** examines a number of well-described gene-environment interactions, reviews the state of the science in researching such interactions, and recommends priorities not only for research itself but also for its workforce, resource, and infrastructural needs. Social

Psychology of Health Peter Salovey, Alexander J. Rothman, 2003 The volume also contains an introductory chapter by the editors providing a history of personality and social psychology's interest in health and illness. Together with overviews for each section, discussion questions, and suggestions for further reading, the volume is an ideal text for advanced undergraduate and graduate courses on health psychology. **BOOK JACKET** *Social Networks and Health Inequalities* Andreas

*Social Work Treatment* Francis J. Turner, 2017-03-23 First published in 1974 *Social Work Treatment* remains the most popular and trusted compendium of theories available to social work students and practitioners It explores the full range of theoretical approaches that drive social work treatment and knowledge development from psychoanalysis to crisis intervention A treasure trove of practice knowledge the text equips professionals with a broad array of theoretical approaches each of which shine a spotlight on a different aspect of the human condition Emphasizing the importance of a broad based theoretical approach to practice it helps readers avoid the pitfalls of becoming overly identified with a narrow focus that limits their understanding of clients and their contexts This sweeping overview of the field untangles the increasingly complex problems ideologies and value sets that define contemporary social work practice The result is an essential A to Z reference that charts the full range of theoretical approaches available to social workers regardless of their setting or specialty

**The Social Networks of Older People** Howard Litwin,1996-10-30 This edited volume examines the social networks of older people in nine countries from a range of perspectives in order to determine the potential of informal support structures to deliver the bulk of care in today s society Researchers from the United States Canada England and Wales France Spain the Netherlands Sweden Finland and Israel present up to date analyses of support networks in each of their countries The social policy implications of the comparative data are critically reviewed The findings clearly suggest that social network availability is diminishing for a significant minority of elderly people However current practice in most countries reveals little purposive interweaving of formal services and informal networks in order to strengthen the function of the latter and to prolong their presumed benefits

*Handbook of Social Support and the Family* Gregory R. Pierce,I.G. Sarason,2013-06-29 While insights sometimes are slow in coming they often seem obvious when they finally arrive This handbook is an outcome of the insight that the topics of social support and the family are very closely linked Obvious as this might seem the fact remains that the literatures dealing with social support and the family have been deceptively separate and distinct For example work on social support began in the 1970s with the accumulation of evidence that social ties and social integration play important roles in health and personal adjustment Even though family members are often the key social supporters of individuals relatively little re search of social support was targeted on family interactions as a path to specifying supporter processes It is now recognized that one of the most important features of the family is its role in providing the individual with a source of support and acceptance Fortunately in recen t years the distinctness and separateness of the fields of social support and the family have blurred This handbook provides the first collation and integration of social support and family research This integration calls for specifying processes such as the cognitions associated with poor support availability and unrewarding faillily constellations and factors such as cultural differences in family life and support provision that are pertinent to integration

*Support Networks in a Caring Community* J.A. Yoder,J.M.L. Jonker,R.A.B. Leaper,2012-12-06 The historic Binnenhof seat of the Dutch government in The Hague provided the setting January 1985 for a conference in which participants from eleven countries met to consider the theme Support networks in a caring community research and policy fact and fiction At the outset conference leadership provided by Professors J M L Jonker The Netherlands and R A B Leaper United Kingdom urged the conferees not to allow their enthusiasm for informal support networks to combine with the pervasive awareness of the failures of welfare states into a simplistic stance of advocacy with a consequent appeal to politicians to direct state funds accordingly Legitimate criticisms of the responses of welfare states to the needs of citizens were to be seen as the context for discussion not the substance of conference deliberations More specifically if it is now apparent to many people that governmental assistance of individuals with social needs can lead to an undesirable

dependency on the part of increasingly passive citizens that awareness does not lend logical support to an ideological position that governmental expenditures are pernicious per se to be replaced as rapidly as possible by a return to reliance on self family friends and associations that are developed voluntarily and financed by those who are sufficiently interested
