Wynn,2011-07-05 Everyone wants to visit New York at least once The Big Apple is a global tourist destination with a dizzying array of attractions throughout the five boroughs The only problem is figuring out where to start and that s where the city s tour guides come in These guides are a vital part of New York s raucous sidewalk culture and as

The Tour Guide reveals the tours they offer are as fascinatingly diverse and eccentric as the city itself. Visitors can take tours that cover Manhattan before the arrival of European settlers, the nineteenth century Irish gangs of Five Points, the culinary traditions of Queens, the culture of Harlem, or even the surveillance cameras of Chelsea. In short, there are tours to satisfy anyone's curiosity about the city's past or present. And the guides are as intriguing as the subjects we learn about. Jonathan R. Wynn explores the lives of the people behind the tours, introducing us to office workers looking for a diversion from their desk jobs, unemployed actors honing their vocal skills, and struggling retirees searching for a second calling. Matching years of research with his own experiences as a guide, Wynn also lays bare the grueling process of acquiring an official license and offers a how-to guide to designing and leading a tour. Touching on the long history of tour giving across the globe as well as the ups and downs of New York's tour guide industry in the wake of 9/11, *The Tour Guide* is as informative and insightful as the chatty, charming, and colorful characters at its heart.

The Comprehensive Autism Planning System (CAPS) Shawn Henry, Brenda Smith Myles, 2024-08-06 *The Comprehensive Autism Planning System for Individuals* CAPS is a reflection of its creator. In his role as a state and national leader, Shawn Henry serves as an advocate for autistic individuals. Shawn and co-author Brenda Smith Myles clearly describe each element of the CAPS model in a well-organized text. Throughout the book, the authors and expert contributors highlight a variety of evidence-based strategies that correspond to each area of the CAPS. The CAPS model illustrates their ability to create meaningful change through realistic and practical means. It's a simple yet powerful system. This innovative approach helps teachers and educational teams plan and implement a student's education across the school, including the Individualized Education Program (IEP) and the curriculum relevant to the student. It takes the team through the process of planning out the goals, objectives to be targeted in each activity of the day, the modifications and accommodations that should be provided to support the student in each activity, the sensory supports needed to help the student stay engaged, and the communication and social supports for successful learning. It shows the type of data to collect for each area and helps to note what reinforcers have been shown to be successful. While this system was developed for use with individuals on the autism spectrum, it can also be an essential tool for any student, regardless of the types of supports and needs they have. There are also vocational and transitional formats that are available for students making the transition to work. The CAPS has been updated to address current trends in special education instruction and research. In this edition, emphasis is placed on Inclusion. Successful practices that support learning for autistic students. Updated evidence-based practices and case studies that apply the CAPS system to post-secondary education and employment. Through the CAPS, autistic individuals have access to meaningful instruction that will allow them to reach their potential.
