Metatheory in Social Science Donald Winslow Fiske, Richard A. Shweder, 1986-03-15 What is the nature of the social sciences What kinds of knowledge can they and should they hope to create Are objective viewpoints possible and can universal laws be discovered Questions like these have been asked with increasing urgency in recent years as some philosophers and researchers have perceived a crisis in the social sciences Metatheory in Social Science offers many provocative arguments and analyses of basic conceptual frameworks for the study of human behavior These are offered primarily by practicing researchers and are related to problems in disciplines as diverse as sociology psychology psychiatry anthropology and philosophy of science While various points of view are expressed in these nineteen essays they have in common several themes including the comparison of social and natural science the role of knowledge in meeting the demands of society and its pressing problems and the nature and role of subjectivity in science Some authors hold that subjectivity cannot be studied scientifically others argue that it can and must be if progress in knowledge is to be made The essays demonstrate the philosophical pluralism they discuss and give a wide range of alternative positions on the future of the social and behavioral sciences in a postpositivist intellectual world

On Social Structure and Science Robert K. Merton, 1996-09-15 Robert K Merton is unarguably one of the most influential sociologists of his time A figure whose wide ranging theoretical and methodological contributions have become fundamental to the field Merton is best known for introducing such concepts and procedures as unanticipated consequences self fulfilling prophecies focused group interviews middle range theory opportunity structure and analytic paradigms This definitive compilation encompasses the breadth and brilliance of his works from the earliest to the most recent Merton s foundational writings on social structure and process on the sociology of science and knowledge and on the discipline and trajectory of sociology itself are all powerfully represented as are his autobiographical insights in a fascinating coda Anchored by Piotr Sztompka s contextualizing introduction Merton s vast oeuvre emerges as a dynamic and profoundly coherent system of thought a constant source of vitality and renewal for present and future sociology

How Industry Analysts Shape the Digital Future Neil Pollock, Robin Williams, 2016-01-14 Industry analysts are in the business of shaping the technological and economic future They attempt to predict what will become the next big thing to spot new emerging trends and paradigms to decide which hi tech products will win out over others and to figure out which technology vendors can deliver on their promises In just a few short years they have developed a surprising degree of authority over technological innovation Yet we know very little if anything about them This book seeks to explain how this was achieved and on what this authority rests Who are the experts who increasingly command

the attention of vendor and user communities What is the nature of this new form of technical and business knowledge How Industry Analysts Shape the Digital Future offers the first book length study into this rarely scrutinized form of business expertise Contributions to this volume show how from a small group of mainly North American players which arose in the 1970s Gartner Inc has emerged as clear leader of a 6 billion industry that involves several hundred firms worldwide Through interviews and observation of Gartner Inc and other industry analyst firms the book explores how these firms create their predictions market classifications and rankings as well as with how these outputs are assessed and consumed The book asks why many social scientists have ignored the proliferation of these new forms of management and technical expertise In some cases scholars have deflated this kind of business acumen portraying it as arbitrary knowledge whose methods and content do not deserve enquiry The valuable exception here has been the path breaking work on the performativity of economic financial or accounting knowledge Drawing upon recent performativity arguments the book argues the case for a Sociology of Business Knowledge The New Blackwell Companion to Major Social Theorists George Ritzer, Jeffrey Stepnisky, 2011-04-20 *Educational Technology* Alan Januszewski, 2008 Sponsored by the Association for Educational Communications and Technology AECT this book presents a definition of the field of study and practice known as educational technology or instructional technology It reflects the collaborative efforts of all members of the AECT Definition and Terminology Committee The volume begins with the statement of the definition itself chapter 1 followed by commentary chapters on each of the key terms and concepts contained in the definition chapters 2 9 Chapter 10 provides historical context for the current definition by reviewing salient elements of prior AECT definitions Chapter 11 discusses ethical considerations and chapter 12 concludes by discussing ramifications of the current definition for academic programs in educational technology This book is appropriate for anyone working in the field of educational technology students instructors researchers and in service providers *Robert K. Merton and Contemporary Sociology* Carlo Mongardini, 2018-04-17 This volume offers scholars of sociology and allied areas the fruits of an international conference on the contributions of the eminent Robert K Merton The assessment as good in content as well as in participants took place in Amalfi Italy with the participation of Merton himself and under the auspices of the Italian Sociology Association Carlo Mongardini aptly summarizes the unique impact of Merton on the social theory of our century His strength as a classic writer lies in his balance unveiling complexity and in his humanism which looks beyond the apparent simplicity and coherence of social reality A special treat is the final chapter by Merton reviewing Unanticipated Consequences and Kindred Sociological Ideas In it he ranges from the historical antecedents of the concept to his own evolution in the use and expansion of the idea Merton approaches the development of his thought as installments rather than simple evolution and in so doing gives us unique insight into how he built upon his originating notions in the context of social science as it existed in the United States Tensions between integrating scholarship and reaching the general public provide a special insight into Merton that might

prove new even to those who know his work well Contributors to this original volume include Volker Meja Nico Stehr Paolo Ammassari Gianni Statera Birgitta Nedelmann Harriet Zuckerman Piotr Sztompka Peter Gerlich Charles Crothers Elena Besozzi and Arnold Zongerle among others The chapters address the full range of Merlon s work with special emphasis on such areas as anomie structural analysis the relationship of theory to research patterns of latent and manifest influence and even the application of Mertonian concepts to the analysis of Merton as a scholar This unusual compendium translated from the Italian will interest social researchers across the academic spectrum

Society in Action Piotr Sztompka,1991-08-27 In Society in Action Piotr Sztompka sets forth a highly topical contribution to central theoretical debates of contemporary sociology Taking the idea and practice of collective mobilization as his theme Sztompka argues that modern institutions particularly of late are characterized by an increasing awareness of collective empowerment The most obvious concrete expression of this phenomenon as Sztompka makes clear is the rise of a diversity of active social movements such as those which dramatically transformed Europe in the 1980s from the birth of Solidarity in 1980 to the 1989 Autumn of Nations Sztompka connects the interpretations of such collective activity to a wider grasp of the nature of social action The result is a comprehensive and original theory of social change which focuses on the self transforming influence on society of its members striving for freedom autonomy and self fulfillment He develops his theory by means of a general concept of social becoming the roots of which he traces to the early romantic and humanist work of Karl Marx and his followers and to two influential sociological schools of today the theory of agency and historical sociology Sztompka situates his theory midway between the rigid determinism of social totalities and the unbridled voluntarism of free individuals Social change he demonstrates can be understood neither as the outcome of individual actions taken alone nor as structurally determined actions Instead he confers upon social organizations and movements a self transcending quality they express human agency yet by virtue of their active character are quite often able to achieve unpredictable outcomes Throughout his analysis of social movements and revolutions in history Sztompka emphasizes the dynamics of spontaneous social change generated from below a theoretical testimony to the rapid and fundamental social change in Eastern Europe in recent history Against the fashions of postmodernist malaise boredom and disenchantment his theory of social becoming expresses the possibility of emancipation of change leading to positive gains His work registers a belief in progress not inevitably gained but its attainment fully dependent upon the creativity and optimism of an active citizenry

In addition, numerous real-world examples and exercises are included throughout the book to give readers the opportunity for reflection and practice. This timely reference incorporates a strengths perspective, providing an inside look at the grant writing and evaluation processes with insights from experienced grant writers, agency administrators, foundation program managers, and grant reviewers. Specific examples of successful grant proposals and evaluation plans and instruments serve as models for learning and practice. Field-tested individual and group exercises facilitate the development of grant writing and evaluation skills. Discussion of electronic technology in grant writing and evaluation, including writing and submitting grant proposals online and identifying funding sources. This grant writing and program evaluation guide follows a needs-driven, evidence-based, result-oriented, and client-centered perspective. Its authoritative discussion equips human service professionals to effectively develop grants with a strong emphasis on measuring program outcomes.

Reintroducing

Robert K. Merton Charles Crothers, 2020-12-30 This book reintroduces the work of Robert K. Merton as a bridge between classical sociology and modern sociology. Founded in the sociological classics but developing a modern approach to the advancement of theory and research methodology, Merton's thought helped to construct modern sociology in its coverage of many of the social institutional areas of contemporary society. Recovering and analysing the system of structural analysis which Merton progressively developed, a system largely overlooked due to the tendency among commentators to stereotype him as a functionalist, the author considers the applications of this approach to various substantive fields, particularly science and criminal justice, and examines the effect of Merton's later sociological semantics on his overall schema. A clear and accessible presentation of the array of concepts introduced by Merton to sociology. *Reintroducing Robert K. Merton* will appeal to scholars and students with interests in sociological theory, social research, the history of sociology, and the various substantive areas covered in the work of Merton: deviance, science, and communications.

Research Methods For Nurses

And The Caring Professions Pamela Abbott, Roger Sapsford, 1998-05-16 Praise for the first edition of *Research into Practice and Research Methods for Nurses and the Caring Professions*. These books provide a good introduction for the uninitiated to reading and doing research. Abbott and Sapsford provide a clearly written and accessible introduction to social research. One of their aims is to demystify research, and in this they succeed admirably. After reading the text and the articles in the reader and working through the various research exercises, readers should have a clear appreciation of how to

evaluate other people's research and how to begin their own David Field Journal of Palliative Medicine This book now substantially revised in its second edition is about the appreciation evaluation and conduct of social research Aimed at nurses social workers community workers and others in the caring professions the book is particularly focused on research which evaluates and contributes to professional practice The authors have provided many short practical exercises in the text and the examples are drawn mostly from projects carried out by one or two people rather than large research teams The clear accessible style will make this the ideal introductory text for those undertaking or studying research for the first time The book may be used in conjunction with Research into Practice Open University Press a reader of useful examples selected by the same authors
