

SOCIAL TRAP

In psychology, a social trap is a situation where individuals act in their own self-interest to the detriment of long-term interests.

TYPE

- **Group traps:** occur when decisions beneficial to individuals or groups in the short-term do damage to the entire social group in the long-run.
- **Individual traps:** occur when you do something for short-term benefit that will have a long-term negative consequence for you personally.

EXAMPLES

- Pollution as a byproduct of industry (group trap)
- Overfishing in the oceans (group trap)
- Lying with the knowledge the lie will eventually be uncovered (individual trap)
- Eating junk food knowing you'll gain weight eventually (individual trap)

Social Traps:

Social Traps and the Problem of Trust Bo Rothstein, 2005-10-06 A social trap is a situation where individuals groups or organisations are unable to cooperate owing to mutual distrust and lack of social capital even where cooperation would benefit all Examples include civil strife pervasive corruption ethnic discrimination depletion of natural resources and misuse of social insurance systems Much has been written attempting to explain the problem but rather less material is available on how to escape it In this book Bo Rothstein explores how social capital and social trust are generated and what governments can do about it He argues that it is the existence of universal and impartial political institutions together with public policies which enhance social and economic equality that creates social capital By introducing the theory of collective memory into the discussion Rothstein makes an empirical and theoretical claim for how universal institutions can be established

Social Traps and Social Trust Michael A. Cowan, 2021-01-07 The articles in this special issue of the New England Journal of Public Policy are unusual in two respects First they reflect the practical wisdom of seasoned actors rather than the theoretical knowledge of academicians The typically unexamined assumption of the academy is that good practice in the world is simply the application of sound theory from the academy It does not take long in the public arena however to discover that leaders there are not applying theory from the academy to the decisions they face Rather they base their interventions on what they have learned about people organizations conflict race and politics in the rough and tumble of living in the world Their working understandings may be valuably leavened by theory but are not guided primarily by it Second the authors were not separate individuals working on isolated issues like children engaged in parallel play but rather partners in a fluid informal collaborative social action network operating in an environment of constantly shifting challenges and possibilities for change The authors are not a collection of Is they are a we They decided pragmatically to connect their power their political and financial and social capital at critical moments to accomplish shared goals The network grew more powerful in the process becoming more than the sum of its organizational parts This volume is ours as was the collective action out of which it emerged Like a choir s songs its articles give voice to a group s experiences Each is a part of a larger whole Whenever I speak about how Hurricane Katrina changed New Orleans an audience member invariably asks Would the changes you described have occurred without a hurricane The simple answer is no but a fuller response is required to do justice to the situation Nature can create temporary vacuums but it cannot fill them The coalition led public meetings action campaigns election fights and legislative lobbying recounted here and the transformations they caused might not have happened in the wake of the great storm But they did In these pages you will meet some of those whose practical wisdom courage and integrity drove those changes

A. Diekmann, P. Mitter, 2012-12-06 In the history of science paradoxes are not only amusing puzzles and challenges to the human mind but also driving forces of scientific development The notion of paradox is intimately related to the notion of contradiction Logical paradoxes allow for the derivation of contradictory propositions e g Russell's set of all sets not being members of themselves or the ancient problem with propositions like I am lying 1 normative paradoxes deal with contradictions among equally well accepted normative postulates Arrow's impossibility theorem Sen's Impossibility of a Paretian Liberal and factual paradoxes refer to conflicts between conventional opinion based on an accepted empirical theory and contradictory empirical evidence e g the St Petersburg paradox or the Allais paradox in decision theory 2 Paradoxes either logical normative or factual also contradict our intuitions The counter intuitive property which seems to be a common feature of all paradoxes plays an important part in the empirical social sciences particularly in the old research tradition of scrutinizing the unintended consequences of purposive actions Expectations based on naive theories ignoring interdependencies between individual actions are very often in conflict with surprising empirical evidence on collective results of social behavior Examples are numerous reaching from panic situations the individual struggle for status gains resulting in collective deprivation the less than optimal supply of collective goods etc to global problems of the armament race and mismanagement of common resources *Consumer Behavior and Energy Conservation* P. Kenrick, Noah J. Goldstein, Sanford L. Braver, 2012-02-10 Over the course of the last four decades Robert Cialdini's work has helped spark an intellectual revolution in which social psychological ideas have become increasingly influential. The concepts presented in his book *Influence: The Psychology of Persuasion* have spread well beyond the geographic boundaries of North America and beyond the field of academic social psychology into the areas of business, health and politics. In this book leading authors who represent many different countries and disciplines explore new developments and the widespread impact of Cialdini's work in research areas ranging from persuasion strategy and social engineering to help seeking and decision making.

Addicted to Growth Robert Costanza, 2022-12-29 This book takes a compelling approach to describing what is needed to create the kind of future that most people on Earth really want. Our global society is hopelessly addicted to a particular vision of the world and a future that has become both unsustainable and undesirable. *Addicted to Growth* frames our current predicament as a societal addiction to a growth at all costs economic paradigm. While economic growth has produced many benefits, its side effects are now producing existential problems that are rapidly getting worse. Robert Costanza considers lessons from what works at the individual level to overcome addictions and applies them to a societal scale. Costanza recognises that the first step to recovery is recognising the addiction and that it is leading to disaster; however, simply pointing out the dire consequences of our societal addiction is only the first step and can be counterproductive by itself in motivating change. The key next step is creating a truly shared vision of the kind of world we all want, and the book explores creative ways to implement this societal therapy. The final step is using that shared vision to motivate the changes needed to achieve it, including adaptive transformations of our economic systems, property rights regimes and governance institutions. An exciting contribution from a key thinker in the field, this book will be a valuable resource to students and scholars of public policy and sustainability studies and anyone interested in understanding and overcoming our societal addiction to growth.

Creating Child Friendly Cities Brendan Gleeson, Neil Sipe, 2006-11-22 First Published in 2006. Leading planning and geography authors present this comprehensive assessment of the extent to which the physical and social make up of Western cities accommodates and nourishes the needs of children and youth. Examining the areas of planning, design, social policy, transport and housing, *Creating Child Friendly Cities* outlines strengths and deficiencies in the processes that govern urban development and change from the perspective of children and youth. Issues explored include children's view of the city and why this is unique, the obesity epidemic, is it caused by cities, the journey to school and children's transport needs, generally. With illustrations and case studies, *Creating Child Friendly Cities* presents planning professionals with a solid case for child friendly cities and an action plan to create places for children to play.
