Straume,2023-05-08 One of the most challenging questions of today concerns how human activities threaten the conditions for our very own existence With one crisis leading into the next the need for socio political change is necessary and desirable yet so hard to imagine in practice At the heart of the matter is a deeper crisis of the socio political imagination To understand how a society produces and changes itself Ingerid S Straume points to historical and contemporary institutions and the imaginaries they embody and argues that the key to social creativity is found in the reflexive potential of institutions especially politics and education Neoliberal rationality on its part has become dominant in many parts of the world precisely by occulting the socio political capacity for self reflection This occultation takes place in academic theories policy reforms technologies and in individuals self understanding In response to the planetary eco crises and the weakening of democratic ideals a new approach is needed where collectives not individuals in isolation become the mode for living well within existing natural limits Inspired by important political thinkers such as Cornelius Castoriadis and Hannah Arendt *How Does a Society Change* develops a theoretical framework to elucidate how politics and education are two interrelated domains wherein a society may openly reflect upon itself In short a society that recognizes its capacity to change itself also recognizes the transformative instituting potential of politics and education **Chinese Society - Change and Transformation** Li Peilin,2012-07-26 There is growing interest in social transformation in contemporary China with much work published on the subject This book is different from other books in that it presents an overview of the work of Chinese sociologists on how Chinese society is changing It reports on a great deal of original research by leading outstanding Chinese scholars including extensive fieldwork and large scale social change survey data and covers comprehensively the full range of aspects of the subject It assesses developments since the beginning of reform in China and provides overall a comprehensive understanding of China s social development and of the likely impact of future social changes on China **Radicals, Revolutionaries, and Society** R.
