Societies In Space American University Studies Series Xi Anthropology:

Societies in Space Alvin Rudoff,1996 The major purpose of *Societies in Space* is to encourage the involvement of the Social Sciences in the construction of the High Frontier Such an enterprise involves elements like the social construction of space settlements orbiting communities and the search for extraterrestrial intelligence This incipient subject matter should offer a challenging and exotic environment for direct Social Science participation *Historical Studies in the Societal Impact of Spaceflight* Steven J. Dick,2015 *The Cambridge Handbook of Social Problems: Volume 1* A. Javier Treviño,2018-03-22 The introduction of the Affordable Care Act in the United States the increasing use of prescription drugs and the alleged abuse of racial profiling by police are just some of the factors contributing to twenty first century social problems The Cambridge Handbook of Social Problems offers a wide ranging roster of the social problems currently pressing for attention and amelioration Unlike other works in this area it also gives great consideration to theoretical and methodological discussions This Handbook will benefit both undergraduate and graduate students eager to understand the sociology of social problems It is suitable for classes in social problems current events and social theory Featuring the most current research the Handbook provides an especially useful resource for sociologists and graduate students conducting research **Mars Exploration** Giuseppe Pezzella,Antonio Viviani,2020-09-09 More than 50 years after the Mariner 4 flyby on 15 July 1965 Mars still represents the next frontier of space explorations Of particular focus nowadays is crewed missions to the red planet Over three sections this book explores missions to Mars in situ operations and human rated missions Chapters address elements of design and possible psychological effects related to human rated missions The information contained herein will allow for the development of safe and efficient exploration missions to Mars **Space Technology and Applications International Forum - STAIF 2008** Mohamed S. El-Genk,2008-01-31 As the British French and Spanish Atlantic empires were torn apart in the Age of Revolution Portugal steadily pursued reforms to tie its American African and European territories more closely together Eventually after a period of revival and prosperity the Luso Brazilian world also succumbed to revolution which ultimately resulted in Brazil s independence from Portugal The first of its kind in the English language to examine the Portuguese Atlantic World in the period from 1750 to 1850 this book reveals that despite formal separation the links and relationships that survived the demise of empire entwined the historical trajectories of Portugal and Brazil even more deeply From constitutionalism to economic policy to the problem of slavery Portuguese and Brazilian statesmen and political writers laboured under the long shadow of empire as they sought to begin anew and forge stable post imperial orders on both sides of the Atlantic **Historical Studies in the Societal Impact of Spaceflight** Steven J. Dick,2015 **Space, Propulsion & Energy Sciences International Forum** Glen A. Robertson,2009-04-03 Huntsville Alabama 24 26 February 2009 *The Cambridge Handbook of Social Problems:* A. Fish, Paul R. Fish, M. Elisa Villalpando, 2018-07-02 The intriguing hilltop archaeological sites known as cerros de trincheras span almost three millennia from 1250 BC to AD 1450 Archaeologists have long viewed them as a unitary phenomenon because they all have masonry architecture and occur mostly on low volcanic peaks Scattered across the southwestern United States and northwestern Mexico these sites received little comprehensive research until the 1980s This first volume in the Amerind Studies in Archaeology series from the Amerind Foundation documents considerable variability among trincheras sites with respect to age geographic location and cultural

affiliation This multi author volume integrates a remarkable body of new data representing a textbook like array of current research issues and methodologies in the archaeology of the region Scholars from the United States and Mexico offer original research on trincheras sites in Chihuahua Sonora Arizona and New Mexico Scales of focus range from intensive intrasite sampling to the largest contiguous survey in the region Authors incorporate spatial analyses artifact studies environmental and subsistence data ethnographic analogs ethnohistorical records cross cultural comparisons archaeology and archival resources The volume s discussions contribute innovative approaches to worldwide interpretations of landscapes marked by hilltop sites Contributors present meticulous research arguing that many trincheras sites were primarily used for habitation and ceremonial rites in addition to previously predominant views of them as defensive refuges Because trincheras occupations date from the late preceramic era to shortly before Spanish contact authors relate them to early forms of agriculture the emergence of village life the appearance of differentiated settlement systems and tendencies toward political and ritual centralization Detailed maps and figures illustrate the text and close up aerial photographs capture the visual essence of the sites highlighted by a section that includes color photographs and an essay by renowned photographer Adriel Heisey Contributors Christian E Downum Paul R Fish Suzanne K Fish Robert J Hard Adriel Heisey Stephen A Kowalewski Randall H McGuire Ben A Nelson John R Roney Judith Taylor M Elisa Villalpando Joseph Vogel Henry Wallace David R Wilcox J Scott Wood

Early State Economics Henri Claessen, Pieter van de Velde, 2017-09-08 The central theme of this volume is the political economy of early state societies the ways in which the income of the central government of such systems was collected and spent The work contains descriptive as well as narrative and commemorative essays Contributions present data on early states as diverse as the Interlacustrine states of East Africa the Sudanic states of West Africa prehistoric Cahokia in the Mississippi Valley Aztec Mexico the Classical Maya eighteenth century Nepal and Polynesian Tahitian and Mayan case studies At the theoretical end of the spectrum the book offers a general discussion of the concept of political economy modes of production in antiquity and the editors themselves offer an overview of early state organizational forms With the data of the contributions to this volume such theoretical viewpoints are evaluated The conclusion is that inherited approaches fall far short of explaining the political economies of early states The editors of this volume maintain that much thinking on this issue of the early state is off base because it is confined to the study of redistribution They hold that a prestige goods system is probably as important while in some cases the key factor to look at is tribute or taxation Likewise the system of gift giving often viewed as ancillary should be considered central to the performance of the ancient states In short political economy is rooted in the stages of social growth Nearly all contributors agree that simple evolutionary generalizations can no longer be applied to specific cases without considerable modification and in this undertaking formalist and Marxist canons alike need to be invoked for a deeper understanding of the actual operations of the state in earlier societies

The Fragmentary City Andrew M. Gardner, 2024-05-15 As Andrew M Gardner

explains in *The Fragmentary City* in Qatar and elsewhere on the Arabian Peninsula nearly nine out of every ten residents are foreign noncitizens. Many of these foreigners reside in the cities that have arisen in Qatar and neighboring states. The book provides an overview of the Gulf migration system with its diverse migrant experiences. Gardner focuses on the ways that demography and global mobility have shaped the city of Doha and the urban characteristics of the Arabian Peninsula in general. Building on those migrant experiences, the book turns to the spatial politics of the modern Arabian city, exploring who is placed where in the city and how this social landscape came into historical existence. The author reflects on what we might learn from these cities and the societies that inhabit them. In *The Fragmentary City*, Andrew M. Gardner frames the contemporary cities of the Arabian Peninsula not as poor imitations of Western urban modernity but instead as cities on the frontiers of a global neoliberal and increasingly urban future.

The contributors are classical and prehistoric archaeologists, anthropologists, and architects who, from their different backgrounds, are able to provide some important and original insights into this relationship.

Science Information News, 1961 **Scientific Information Notes**, 1962 **Confronting the Past** Seymour (Sy) Gitin, J. Edward Wright, J. P. Dessel, 2006-06-30 William G. Dever is recognized as the doyen of North American archaeologist-historians who work in the field of the ancient Levant. He is best known as the director of excavations at the site of Gezer but has worked at numerous other sites, and his many students have led dozens of other expeditions. Reader in Urban Sociology Others, 1991 *The Routledge Handbook of Social Studies of Outer Space* Juan Francisco Salazar, Alice Gorman, 2023-07-10 *The Routledge Handbook of Social Studies of Outer Space* offers a state-of-the-art overview of contemporary social and cultural research on outer space. In scope, the thirty-eight contributions by over fifty leading researchers and artists across a variety of disciplines and fields of knowledge present a range of debates and pose key questions about the crafting of futures in relation to outer space. The Handbook is a call to attend more carefully to engagements with outer space empirically, affectively, and theoretically while characterizing current research practices and outlining future research agendas. This recalibration opens profound questions of intersectional politics, race, equity, and environmental justice around the contested topics of space exploration and life off Earth. Among the many themes included in the volume are the various infrastructures, networks, and systems that enable and sustain space exploration, space heritage, the ethics of outer space, social and environmental justice, fundamental debates about life in outer space, as it

pertains to both astrobiology and SETI the study of scientific communities the human body and consciousness Indigenous astronomical systems of Knowledge contemporary space art and ongoing critical interventions to overcome the legacies of colonialism and dismantle hegemonic narratives of outer space
