The evidence is increasingly persuasive We are changing the way our planet s physical systems work irrevocably These changes are global and interconnected and unavoidable They are upon us already making it virtually impossible for any modern society to continue its present trajectory of growth This book provides a penetrating analysis of how we have come to this point of why science and technology will fail to solve these problems and of how we as a society must change in order to avoid ecological catastrophe The scope is broad the urgency of the message is impossible to ignore Environment and Global Modernity Gert Spaargaren,Arthur P J Mol,Frederick H Buttel,2000-06-02 This accomplished book argues that we can

only make sense of environmental issues if we consider them as part of a more encompassing process of social transformation. It asks whether there is an emerging consensus between social scientists on the central issues in the debate on environmental change and if concerns about the environment constitute a major prop to the process of globalization. The book provides a thorough discussion of the central themes in environmental sociology identifying two traditions: ecological modernization theory and risk society theory.

**Linking Science and Technology to Society's Environmental Goals** Policy Division, Policy and Global Affairs, National Research Council, 1996-12-05. This book will be of special interest to policymakers in government and industry, environmental scientists, engineers and advocates and faculty, students and researchers.
