## **Society In Conflict An Introduction To Social Science:**

**Society in Conflict** Gilbert Abcarian, Monte Palmer, 1974

**Contemporary Society** John Perry, Erna Perry, 2016-04-14

This best selling text emphasizes why social and cultural changes are the pervasive realities of our time. A key theme of *Contemporary Society* is that the transition from an industrial to a post industrial order in today's world is fraught with difficulties as was the transition from an agricultural to an industrial order in an earlier era. Within this framework we can observe the increasing fragmentation of the social order today which tends to lead people away from community and a common purpose more often bringing conflict and disunity. Still countervailing social forces are also at work providing some stability some shelter in a sea of change. Ever more societies are faced with the rapid and transformative power of information technology which helps propel separate groups of people into a global entity. This introduction to the social sciences shows what the authors have learned from such disciplines as anthropology geography history sociology psychology political science and economics and how to apply social science approaches to an ever faster tempo of change. The authors cover family life interaction with others racial and ethnic diversity education religion population environment and many other topics analyzed in a student friendly approach. New to this Edition: The integration and flow of the text has been improved for better student comprehension. Expanded selection of Web Links to many more sites for student research many relevant to their interests and entertainment choices. Enriched focus on applying social science knowledge to current events transcending a complete reliance on assumptions from the media. New expanded coverage on topics throughout the book including New findings from global warming research and its implications for social life and policy. New developments in race relations in an integrated approach throughout many chapters. Deepening inequality and the implications that threaten family education and student futures nationally and globally. Gender including new developments in legal gay marriage and transgender. Expanded coverage of genetics and the medical potential of human genome sequencing. New developments in astrophysics and their potential implications for society. Updated Statistics throughout.
