History of Transparency in Politics and Society Jens Ivo Engels, Frédéric Monier, 2020-08-10 Today the demand for transparency is omnipresent In particular transparency is considered a prerequisite for good governance for political participation and democracy On closer inspection however transparency proves to be ambivalent For complete transparency has not yet been achieved anywhere Moreover measures to increase transparency can have the opposite effect and stir up mistrust Historians are just beginning to discover this topic The volume assembles contributions covering European history since the 19th century The contributors focus on political and cultural history but include also economic and media history as well as the history of ideas They analyse publicly debated demands and efforts for transparency conceived as the access to information or its disclosure

Corruption in Urban Politics and Society, Britain 1780-1950 John Smith, 2017-05-15 Despite much recent interest in the area of urban governance little work has been done on the changing ethical standards of urban leaderships governing institutions or the policing of public life Yet the issue of ethical standards in public life has become a central concern in contemporary public discourse with issues of public probity moral order and personal standards re emerging as central features of political debate This volume places these debates into their historical perspective by examining the linkages between processes of modernisation urbanisation and the ethical standards of governance and public life It considers how ethical debates arise as a result of differential access to positions of authority and from competition for public resources The contributions are drawn from a wide range of scholarly and disciplinary backgrounds and provide a broad analysis of the phenomenon of corruption assessing how debates about

corruption arose the narratives used to criticise established modes of public conduct and their consequences for urban leadership

The Triumph of the Flexible Society Manuel Hinds, 2003-11-30 Hinds takes offers a fresh perspective on the social political and economic disturbances now affecting our world This book looks at those disturbances not as separate problems but rather as the coherent symptoms of a deep technological revolution that is changing the shape of society on the scale of the Industrial Revolution the Connectivity Revolution the basis of the New Economy Analyzing the resistance to change that erupted violently in response to that last major economic upheaval Hinds shows how Communism Nazism and fundamentalism owe their triumphs not to the prevalence of poverty or oppression but to the rigidity of societies threatened by profound social changes prompted by rapid technological progress Demonstrating that their rigidity was caused by the same kind of state intervention in the economy that is now being proposed to stop globalization he argues persuasively that only a horizontal flexible society can smoothly manage change in such a way that the pain of transformation and therefore the risk of giving birth to new varieties of destructive regimes is minimized
