## **Sociobiology And Mental Disorder A New View:**

**Sociobiology & Mental Disorder** Brant Wenegrat, 1984

**Origins of Psychopathology** Horacio Fabrega (Jr.), 2002

What are the origins of human psychopathology Is mental illness a relatively recent phenomenon or has it been with us throughout evolution In *Origins of Psychopathology* Horacio Fabrega Jr employs principles of evolutionary biology to better understand the significance of mental illness He explores whether what psychiatry has categorized as mental disorders could have existed during earlier phases of human evolution Fabrega approaches the prominent features of mental disorders as adaptive responses to the environment and life's circumstances which in turn can only be understood in the context of our evolutionary past Taking his cue from theoretical issues raised by research into primate behavior and early hominid evolution he poses the question What if any aspects of mental illness are rooted in our evolution Does mental illness occur in primates and other animals and if so what does this tell us about mental illness in human evolution How has mental illness played an adaptive role How has the development of language and higher cognitive functions affected characteristics of psychopathology Fabrega synthesizes insights from both the clinical and the evolutionary points of view This facet of psychopathology which involves its origins and manifestations viewed across the expanse of human evolution has until now been largely neglected in psychiatric education theory and practice

**Social Support and Psychiatric Disorder** Traolach

S. Brugha, 1995-08-24 This second volume in a series looking at the social dimensions of mental illness collates and critically examines the information currently available on social support as it impacts on mental health The international team of contributors each actively involved in both clinical and research work in this field collectively covers the whole range of perspectives from biological mechanisms through to psychological and social theory An overview of the latest published evidence and a description of the nature and origins of social support are followed by evidence from observational studies and specific interventions and trials The text concludes with a summary which will act as a valuable resource for practitioners in their evaluation of social and psychological treatments and should also serve to stimulate further research and intervention trials Practitioners and researchers in psychiatry psychology and social work are certain to welcome this timely guide

**The Adaptive Design of the Human Psyche** Malcolm Owen Slavin, Daniel H. Kriegman, 1992-09-25

Addressing one of the most fundamental issues in any examination of human experience this important new work connects evolutionary biological concepts to modern psychoanalytic theory and the clinical encounter Synthesizing their years of experience in the practice of psychotherapy and psychoanalysis the authors provide a comparative psychoanalytic map of current theoretical controversies and a new way of deconstructing the hidden assumptions that underlie Freudian Ego Psychological Kleinian Object Relational Self Psychological and Interpersonal theories In so doing they provide a new vantage point from which to integrate competing models into a larger picture that more fully embraces the many facets of human nature Moreover they offer clinicians a new framework with which to understand and respond to the inevitable paradoxes and conflicts that arise in

Ehrlich, 2000 There is no longer sufficient time to rely on the normal pace of cultural evolution to deal with today s dilemmas Human beings have always been the most adaptable creatures on the planet and they should be able to chart a new course for themselves Some of that charting is already being done The old mind today is being challenged and changed by many scattered efforts Can we bring these efforts together to produce a large scale program for a rapid change of mind We know what the problem is The solution is not simple to generate the social and political will to move a program of conscious evolution to the top of the human agenda

**The Adapted Mind** Jerome H. Barkow, Leda Cosmides, John Tooby, 1995-10-19 Although researchers have long been aware that the species typical architecture of the human mind is the product of our evolutionary history it has only been in the last three decades that advances in such fields as evolutionary biology cognitive psychology and paleoanthropology have made the fact of our evolution illuminating Converging findings from a variety of disciplines are leading to the emergence of a fundamentally new view of the human mind and with it a new framework for the behavioral and social sciences First with the advent of the cognitive revolution human nature can finally be defined precisely as the set of universal species typical information processing programs that operate beneath the surface of expressed cultural variability Second this collection of cognitive programs evolved in the Pleistocene to solve the adaptive problems regularly faced by our hunter gatherer ancestors problems such as mate selection language acquisition cooperation and sexual infidelity Consequently the traditional view of the mind as a general purpose computer tabula rasa or passive recipient of culture is being replaced by the view that the mind resembles an intricate network of functionally specialized computers each of which imposes contentful structure on human mental organization and culture The Adapted Mind explores this new approach evolutionary psychology and its implications for a new view of culture
